DATE: May 5, 2022

TO: Robert Holt, Planner III
Planning and Development Department

THROUGH: Andrew Benelli, PE, Assistant Director, City Engineer 
Public Works Department, Traffic Operations and Planning Division

FROM: Louise Gilio, Traffic Planning Supervisor
Public Works Department, Traffic Operations and Planning Division

SUBJECT: Public Works Conditions of Approval
T-6410 / P22-00771 a 74-lot single family subdivision
5239 East Church Avenue
Century Communities, Inc. / QK

The Public Works Department, Traffic Operations and Planning Division, has completed its review and the following requirements are to be placed on this tentative map as a condition of approval by the Public Works Department.

COMPLIANCE REQUIRED: Provide the following information prior to the acceptance of the final map submittal. This can result in additional conditions of approval.

1. Provide a cross section, with dimensions, on sheet 1 to identify the FID easement, canal, service roads, Outlot, trail, curb and gutter.
2. Revise the cross section for Church Avenue to provide a 2' pedestrian easement. Dimension 5.5' from face of curb to sidewalk, 6' sidewalk, .5' from back of walk to the pedestrian easement.
3. Revise local streets to provide a 10' Planting and Public Utilities easement per *Public Works Standard P-56A*.
4. Correctly identify all existing and proposed easements on the map. Verify right of way along Church and easements within the map border. Correctly dimension existing rights of way to the west and the east of this subdivision. Check against original maps and records. Identify and dimension existing and proposed offsite improvements within the limits of this subdivision and adjacent to it. Identify existing utilities to remain or be relocated and proposed sidewalks which provide 4' accessibility. What do you plan for Church? Will additional easements be needed? Provide details to depict how you are tying into existing improvements. Are you matching or transitioning?
5. Provide notes on the plan regarding the vacation of existing easements no longer needed.
6. Provide assessor's parcel numbers for all adjacent parcels.

7. Identify the relinquishment of vehicular access. It is shown in the legend but not on the map.

General Conditions:

1. Street Dedications: Provide corner cut dedications at all intersections for accessibility ramps.
2. Right of way: All right-of-way "outside" of the subdivision border shall either be acquired **prior** to recordation of Final Map, or a deposit equal to the value of the right-of-way and an estimate of the City staff time necessary to acquire the right-of-way shall be submitted **prior** to recordation of the Final Map.
3. Plan Submittal: Submit the following plans, as applicable, in a single package, to the Public Works Department for review and approval **prior** to recordation of the Final Map. Street: construction, signing, striping, traffic signal and streetlight and Trail: construction, grading, lighting, striping, signing, landscape and irrigation.
4. Local to Collector Street Intersections: The intersection of two local continuous streets shall have a minimum of **160'** offset measured from centerline to centerline.
5. Outlots: If the subdivider seeks to dedicate to the City, in fee, an outlot for open space purposes, subdivider shall prove to the City that the outlot is free of toxic or hazardous materials pursuant to the requirements of *City Administrative Order 8-1*, including, but not limited to, performing a Phase I Soils Investigation. The soils Investigation report shall be submitted to the Public Works Department for review and approval. The subdivider must obtain Public Works approval of the soils investigation report and complete any mitigation work identified by the soils investigation prior to subdivider's submittal of the Final Map to the Public Works Department. Any and all costs associated of the soils investigation and any required mitigation work shall be performed at the sole expense of the subdivider.
6. Encroachment Covenants: The construction of any overhead, surface or sub-surface structures and appurtenances in the public right of way is prohibited unless an encroachment covenant is approved by the City of Fresno Public Works Department, Engineering Services Division, **(559) 621-8681**. Encroachment covenants must be approved prior to issuance of building permits.
7. Street widening and transitions shall also include utility relocations and necessary dedications.
8. Overhead Utilities: Underground all existing overhead utilities with the limits of this map in accordance with *Fresno Municipal Code Section 15-4114*.
9. When permanent facilities are not available from the Fresno Metropolitan Flood Control District, the applicant shall identify a temporary onsite storm water basin per *Public Works Standard P-97* for review and approval from Public Works.
10. Irrigation /Canal Requirements: The developer shall enter into an agreement with the Fresno Irrigation District (FID) providing for piping the canal(s) and submit an executed copy of the agreement or commitment letter from FID to the Public Works Department. All piping shall be located outside of the proposed street right of way. Any piping across city streets shall be rubber gasketed reinforced concrete pipe (RGRCP) constructed perpendicular to the street. Submit engineered plans to Public Works

- Department, Engineering Services Division for review and approval. Identify the proposed easement and provide a final cross-sectional detail on the map.
11. Backing onto a major street: Backing onto a major street is prohibited.
 12. The first order of work shall include a minimum of two points of vehicular access to the major streets for **any** phase of this development.
 13. Intersection Visibility: Maintain visibility at all intersections as described in the *Fresno Municipal Code Section 15-2018*.
 14. Sidewalks shall not exceed a 5% longitudinal slope.
 15. Driveway Approaches: The throat of the driveway approaches shall be the same width as the driveway. Approach widths shall be built to *Public Works Standard P-6*.
 16. FAX: When a bus shelter is required by the Transportation Department, FAX Division, a thicker sidewalk will be required. Contact Jeff Long at 559 621-1436. Coordinate all conditions of approval between Public Works and FAX.

Frontage Improvement Requirements:

Public Streets:

Church Avenue: Collector

1. Dedication Requirements:
 - a. Where not existing, dedicate **47'-55'** of property, from ¼ section / centerline, for public street purposes, within the limits of this application, per *Public Works Standards*. Centerline shall be established per *Official Plan Line No. 90-02*.
 - b. Dedicate a **2'** pedestrian easement per *Public Works Standard P-53 (modified)*.
 - c. Dedicate corner cuts for public street purposes at the intersections of
 - Church and Adrian.
 - Church and Homsey.
 - d. Relinquish direct access rights to Church Avenue from all lots within this subdivision.
2. Construction Requirements:
 - a. Construct concrete curb, gutter and a **6'** sidewalk to *Public Works Standard P-5*. The curb shall be constructed to a **10' pattern with a 2' Pedestrian Easement (5.5' – 6' - .5')**.
 - b. Construct standard curb ramps per *Public Works Standard* at all intersections.
 - Major street to local street: **R=20'-25'** per **P-24** and **P-25**
 - c. Construct **20'** of permanent paving per *Public Works Standard P-50* (measured from face of curb) within the limits of this subdivision and transition paving, as necessary.
 - d. Construct an underground street lighting system to *Public Works Standard E-1 and E-7A, E-7B, E-8*, within the limits of this subdivision. Streetlights installed on major streets shall be fed from a service pedestal with a master photo control as detailed in *Section 3-3.17* of the *City Specifications and Standard Drawings E-15, E-17 and/or E-18* or as approved by the City Engineer.

Class I Trail: Outlot A

1. Dedicate:
 - a. Dedicate **29'-36'** to the City of Fresno for Bike, Pedestrian and Landscape purposes **only**. (**36'** from face of curb) Additional right of way may be required for grading and drainage purposes.
2. Construct:
 - a. Construct a **12'** wide Bike and Pedestrian Class I Trail, complete with lighting, signing, striping and landscaping, per the *Fresno General Plan, the Public Works Standard P-60, P-61 and the Caltrans Highway Design Manual*. Identify route on the site plan complete with a cross section.

Interior Streets:

1. Entry Streets: The following entries are shown on the tentative map to be constructed to *Public Works Standard P-86*:
 - a. Church and Adrian
 - b. Church and HomsyNo parking is allowed within the limits of the proposed median. **-OR-** Resubmit to be constructed to **P-56A**.
1. Relinquish direct vehicular access rights to:
 - a. the east property line of lot **12**.
 - b. the west property line of lot **1**.
2. Dedicate, design and construct all driveways, ramps, curb, gutter, sidewalk, permanent paving, cul-de-sacs, easements and underground street lighting systems on all interior local streets to *Public Works Standards P-4, P-5, P-6, P-18, P-28, P-50, P-56A, P-86, E-1 and E-9A, E-9B and E-11*. Pedestrian easements are required behind driveways with sidewalk patterns less than **10'**.
3. All streets and pedestrian ways shall connect to other streets and pedestrian ways to form a continuous vehicular and pedestrian network with connections within the subdivision and to adjacent development. Pedestrian paths of travel must meet current accessibility regulations. Identify ramps within the proposed subdivision wherever sidewalks are provided.
4. Garages: Garage or carport setbacks are recommended to be a minimum of **18'** from the back of walk or curb, whichever is greater.
5. Provide a **12'** visibility triangle at all driveways.
6. Design local streets with a minimum of **250'** radius.

Specific Mitigation Requirements:

Within the subdivision border-

1. Adrian Avenue: **42' local**
 - a. Parking is prohibited on the north side of the street, adjacent to the trail.

Outside of the subdivision border-

1. Safe Route to School: Provide a minimum 4' accessible path of travel to the corner of Peach and Church.

Traffic Signal Mitigation Impact (TSMI) Fee: This project shall pay all applicable TSMI Fees **at the time of building permit**. Contact the Public Works Department, Frank Saburit at (559)621-8797. The fees are based on the Master Fee schedule. In some cases, traffic signals may be conditioned on multiple maps. If the signal is existing at the time of the final map, the applicant would not be required to construct the signal but would be required to pay the applicable fee.

TSMI fee is credited against traffic signal and Intelligent Transportation System (ITS) improvements, provided that the improvements are constructed at ultimate locations, contained within the build out of the *General Plan* circulation element and are included in the latest Nexus Analysis for TSMI fee. Project specific impacts that are not consistent with the *General Plan*, *Public Works Standard Drawings* or not incorporated in the TSMI fee infrastructure costs, are not reimbursable. Failure to pay this fee or construct improvements that are credited / reimbursable with this fee will result in a significant unmitigated impact as this fee is applied to all projects within the City Sphere of Influence. If the applicant is conditioned with improvements that are credited / reimbursable with this fee, they should work with the Department of Public Works and identify, with a Professional Engineer's estimate, the costs associated with the improvements, prior to paying the TSMI fee at time of building permit.

1. The signal at the intersection of Church Avenue and Peach Avenue shall be modified to the City of Fresno Standards, at the ultimate location, complete with left turn phasing, actuation and signal pre-emption **prior** to occupancy. This work is eligible for reimbursement and/or credit against Traffic Signal Mitigation Impact Fees. The applicant shall design the traffic signal and obtain City approval of the plans **prior** to issuance of any building permits.

Fresno Major Street Impact (FMSI) Fee: This Map is in the **New Growth Area**; therefore, pay all applicable growth area fees and City-wide regional street impact fees. In some cases, center section improvements or bridges may be conditioned on multiple maps. If the improvements are existing at the time of the final map, the applicant would not be required to construct them, but would be required to pay the applicable fee.

Fresno Major Street Impact (FMSI) Requirements:

Church Avenue: 2-Lane Collector (New Growth Area / Regional Street)

1. Where not existing, (within the limits of this subdivision and continue to Peach Avenue.
 - mid-block: Construct a 12' center two-way left turn lane, **(2)** 11' westbound travel lanes and a 7' bike lane.

- APN 481-020-51ST: Construct a **12'** center two-way left turn lane, **(2) 11'** westbound travel lanes, a **5'** bike lane, a **10'** right turn lane, curb and gutter per **P-69**. Stripe **200'** left turn pockets at Church and Peach. Dedication shall be sufficient to accommodate additional paving and any other grading or transitions as necessary based on a **45** MPH design speed.

Regional Transportation Mitigation Fee (RTMF): Pay all applicable **RTMF** fees to the Joint Powers Agency located at 2035 Tulare Street, Suite 201, Fresno, CA 93721; (559) 233-4148 ext. 200; www.fresnocog.org. Provide proof of payment or exemption **prior** to certificate of occupancy.

DEPARTMENT OF PUBLIC WORKS

TO: Robert Holt, Planner III
Planning & Development Department

FROM: Hilary Kimber, Parks Supervisor II
Public Works, Street Maintenance Division

DATE: April 21, 2022

SUBJECT: **P22-00771; Tract 6410** (APN: 481-020-60S) located on the north side of E. Church Ave. east of S. Peach Ave. The Department of Public Works has reviewed the Tentative Tract Map submitted by Quad Knopf. The Department of Public Works offers the following comments regarding the requirements for landscaping and irrigation in the street rights-of-way, landscape easements, outlots and median islands:

GENERAL REQUIREMENTS

STREET TREE REQUIREMENTS

1. The subdivider is required to provide street trees on all public street frontages per Fresno Municipal Code and for the dedication of planting and buffer landscaping easements as determined by the Planning Department. Street trees shall be planted at the minimum rate of one tree for each 40' of street frontage or one tree per home (whichever is greater) by the Developer. The subdivider is required to provide irrigation for all street trees. The irrigation system shall comply with AB 1881.
2. Street Tree Planting by Developer: For those lots having internal street tree frontage available for street tree planting, the developer shall plant one tree for each 40' of street frontage, or one tree per lot having street frontage, whichever is greater. Tree planting shall be within a 10' Public Planting and Utility Easement.
 - a. Street tree inspection fees shall be collected for each 40' of public street frontage or one tree per lot whichever is greater.
 - b. Street trees shall be planted in accordance with the City of Fresno, Department of Public Works "Standard Specifications."
 - c. Landscape plans for all public use areas, such as parkways, buffers, medians and trails, shall be reviewed and approved by the Department of Public Works, Engineering Services. A street tree planting permit shall be required for all residential street tree planting.
 - d. Performance and payment securities, paid with final map, will be released when all landscaping installed on public and/or city-controlled property is in conformance with the Specifications of the City of Fresno.
 - e. Upon acceptance of the required work, warranty security shall be furnished to or retained by the city for guaranty and warranty of the work for a period of ninety days following acceptance.

The designated street tree for E. Church Ave. (matches T 5235) is:

Ginkgo biloba 'Autumn Gold'

Maidenhair Tree

BUFFER LANDSCAPING & MAINTENANCE REQUIREMENTS

1. The subdivider shall provide long term maintenance for all proposed landscaped areas by either petitioning for annexation in the Community Facilities District or by forming a Home Owner's Association.
2. Maintenance Service Through Annexation into the Community Facilities District. Landscape and Irrigation plans are required and shall be submitted to the Department of Public Works for review and approval prior to a Council approval of the final map. Plans shall be numbered to conform to and be included in the Department of Public Works street construction plan set for the final map. Fees are applicable when the subdivider elects to have landscaping maintained by annexing into the City's Community Facilities District.
 - A. Landscaping shall comply with Landscape Buffer Development Standards approved by the City Council on October 2, 1990. Landscape and irrigation plans shall comply with AB1881, water efficient landscaping.
 - B. Should the proposed landscape buffers and/or parkway strips be located next to an existing buffer and/or parkway strip, the planting concept shall simulate the adjacent landscape design to present a more uniform appearance on the street. Variances in the landscape concept will be acceptable, but the design of the new landscape buffer and/or parkway strip shall strive to mimic the existing as much as possible.
 - C. Landscape plans shall indicate grades on a cross-section detail to include fencing or wall details. All fencing shall be placed outside the landscape easement. Maximum slopes shall not exceed 4:1 with 1 foot of level ground between the slope and the back of the side walk and/or face of fence. Erosion control measures shall be implemented on all slopes of 4:1, including the use of synthetic erosion control netting in combination with ground cover species approved by the Department of Public Works/Engineering Services Division.
 - D. The water meter(s) serving the buffer landscaping shall be sized for the anticipated service flows.
 - E. No private flags, signs or identification of any kind shall be permitted in the right-of-way, within the City - controlled easement or on the fence or wall facing the street.
 - F. Landscaping in the right-of-way and landscape setback adjacent to water well sites shall be the responsibility of the City of Fresno Water Division and may not be included in the CFD.

OUTLOTS

1. Outlots which are utilized for water well purposes **will not** be included in the CFD. The Water Division Department in Public Utilities will provide the maintenance of all plant material on the well site.

TRAIL REQUIREMENTS

1. The trail shall be constructed in accordance with the "Master Trails Manual" and the Public Works Department standards. The subdivider is responsible for the trail construction. The subdivider is responsible for all landscape and irrigation improvements for and within the trail. Construction plans shall be submitted and shall include landscaping and automatic drip irrigation design. Trail cross-sections will be required with submittal of Street Plans and Landscaping/Irrigation Plans for review and approval. These plans shall

be in compliance with current City standards and approved by the Department of Public Works. Landscaping within the regional/multipurpose trail shall include large, medium and low-growing shrubs planted from 3 to 6 feet apart depending on variety, and trees spaced approximately 25 to 45 feet apart to provide 50% shade coverage onto the planting area and pathway. Landscaping adjacent to walls or fences shall comply with "Landscaped Buffer Development Standards." All planting areas shall be irrigated with an automatic system.

2. The existing trail to the east at Tract 5235 is concrete, to match.

DATE: May 16, 2022

TO: Robert Holt, Planner III
Planning and Development Department

FROM: Harmanjit Dhaliwal, PE Supervising Professional Engineer
Public Works Department, Traffic Operations and Planning Division

SUBJECT: PUBLIC WORKS CONDITIONS OF APPROVAL FOR VESTING TENTATIVE TRACT MAP NO. 6410 REGARDING MAINTENANCE REQUIREMENTS (P22-00771)

LOCATION: 5239 East Church Avenue
APN: 481-020-60

The Public Works Department, Traffic Operations and Planning Division, has completed its review and the following requirements are to be placed on this tentative map as a condition of approval. These requirements are based on City of Fresno code, policy, standards and the public improvements depicted on the exhibits submitted for this development.

ATTENTION: The item below requires a separate process with additional costs and timelines. In order to avoid delays with the final map approval, the following item shall be submitted for separate processing to the Public Works Department, Traffic Operations and Planning Division prior to final map approval.			
X	CFD Annexation Request Package	Adrian Gonzalez	(559) 621-8693 Luis.Gonzalez@fresno.gov

The Community Facilities District annexation process takes from three to four months and SHALL be completed prior to final map approval. INCOMPLETE Community Facilities District (“CFD”) Annexation Request submittals may cause delays to the annexation process and final map approval.

All applicable construction plans for this development shall be submitted to the appropriate City Department for review and approval **prior** to the CFD process.

- a. Landscape and Irrigation Plans are required to be approved prior to the finalization of the CFD process and the approval of the final map.
- b. **Proposed park amenities shall be reviewed and approved by the Building & Safety Services Division or as approved in writing by the City Engineer at time of submittal for the CFD process and prior to final map approval.**

Requirements not addressed due to omission or misrepresentation of information, on which this review process is dependent, will be imposed whenever such conditions are disclosed and shall require a revision of this letter.

Any change affecting the items in these conditions shall require a revision of this letter.

1. The Property Owner's Maintenance Requirements

The long term maintenance and operating costs, including repair and replacement, of certain required public improvements ("Services") associated with all new Single-Family developments are the ultimate responsibility of the Developer. The Developer shall provide these Services either by a mechanism approved by the Public Works Department or by annexing to the City of Fresno's Community Facilities District No. 11 ("CFD No. 11").

The following public improvements (Existing and Proposed) are eligible for Services by CFD No. 11 as associated with this development:

- All landscaped areas, trees and irrigation systems, as approved by the Public Works Department, within the street rights-of-way and landscape easements; including without limitation, the median island (1/2, if fronting only one side of median), parkways, buffers, street entry medians and sides **(10' wide minimum landscaped areas allowed)** in **all Local and Major Streets**.
- All landscaping, trees, irrigation systems, hardscaping and amenities within Outlots having the purpose for open spaces and trails.
- Concrete curb and gutters, valley gutters, sidewalks, curb ramps, traffic calming structures, median island concrete maintenance band and cap (1/2, if fronting only one side of median), and street lights in **all Major Streets**.
- Concrete curb and gutters, valley gutters, sidewalks, curb ramps, traffic calming structures, and street entry and interior median island curbing and hardscape, street paving, street name signage and street lights in **all Local Streets**.

***All end lots, side yards, and front yards are the responsibility of the property owner and are not eligible for Services for maintenance by the CFD.**

The Property Owner may choose to do one or both of the following:

- a. The Property Owner may petition the City of Fresno to request annexation to CFD No. 11 by completing and submitting an Annexation Request Package to the Public Works Department, Traffic Operations and Planning Division for review and approval. The Annexation Request Form is available, along with current costs, on-line at the City's website at <http://www.fresno.gov>, under the Public Works Department, Land Development.
 - **Proceedings to annex the final map to CFD No. 11 SHALL NOT commence** unless the final map is within the City limits and all construction plans (this includes Street, Street Light, Signal, Landscape and Irrigation plans, and any other plans needed to complete the process) and the final map are considered technically correct.
 - The annexation process will be put on **HOLD** and the developer notified if all of the requirements for processing are not in compliance. **Technically Correct shall mean that the facilities and quantities to be maintained by CFD No. 11 are not subject to change and after acceptance for processing.**
 - Public improvements not listed above will require written approval by the Public Works Department Director or his designee.
 - All areas not within the dedicated street rights-of-way and approved for Services by CFD No. 11 shall be dedicated as a public easement for maintenance purposes. Outlots purposed for required public open space or City trails shall be dedicated in fee to the City of Fresno or as approved by the Public Works Department City Engineer.

- b. The Property Owner may provide for Services privately for the above maintenance requirements. All City maintenance requirements not included for annexation to CFD No. 11 for Services **SHALL** be included in the DCC&Rs or some other City approved mechanism for the required Services associated with this development. Contact the Planner in the Development and Resource Management Department for more details.

For questions regarding these conditions please contact Adrian Gonzalez at (559) 621-8693 or Luis.Gonzalez@fresno.gov

DEPARTMENT OF PUBLIC UTILITIES

MEMORANDUM

DATE: May 4, 2022

TO: MINDI MARIBOHO – Development Services Coordinator
Planning & Development Department – Current Planning

FROM: ROBERT A. DIAZ, Supervising Engineering Technician
Department of Public Utilities – Utilities Planning & Engineering

KEVIN GRAY Supervising Engineering Technician
Department of Public Utilities – Utilities Planning & Engineering

**SUBJECT: CONDITIONS OF APPROVAL P22-00771 VESTING TENTATIVE
TRACT MAP 6410 APN 481-020-60S**

General Requirements

1. Engineered improvement plans prepared by a Registered Civil Engineer shall be submitted for Department of Public Utilities review and approvals.
2. All Department of Public Utilities facilities shall be constructed in accordance with The Department of Public Works standards, specifications, and policies.
3. Street easements and/or deeds shall be recorded prior to approval of improvement plans.
4. Street work permit is required for any work in the Right-of-Way.

Water Service Requirements

1. Water mains (including installation of City fire hydrants) shall be extended within the proposed tract to provide service to each lot.
2. Separate water services with meter boxes shall be provided to each lot.
3. Destruct any existing on-site well in compliance with the State of California Well Standards, Bulletin 74-81 and a 74-90 or current revisions issued by California Department of Water Resources and City of Fresno standards.

MEMORANDUM

Page 2 of 3

4. All Public water facilities shall be constructed in accordance with the Department of Public Works standards, specifications, and policies.

Water Supply Requirements

1. The project applicant shall be required to pay Water Capacity Fee charges for the installation of new water services and meters to serve the property.
 - a. The Water Capacity Fee charge assessed to the applicant shall be based on the number and size of service connections and water meters required to serve the property.
 - b. The Water Capacity Fee charges by meter size are defined in the City's Master Fee Schedule.
 - c. The City reserves the right to require an applicant to increase or decrease the size of a water meter for a project or a property to ensure that the meter is properly sized to accommodate fire protection requirements, and to allow for accurate volumetric flow measurements at low- and high-flow conditions.
 - d. The Water Capacity Fee Charge for any new or expanded service connection shall be payable prior to the issuance of a building permit at the fee level in effect on the date such permit is issued.
2. The project applicant shall be required to pay all other water-related fees and charges in accordance with the City's Master Fee Schedule and Municipal Code.

Sewer Requirements

The nearest sanitary sewer main to serve the proposed project is an 54-inch sewer main located in East Church Avenue. Sanitary sewer facilities are available to provide service to the site subject to the following requirements:

1. All sanitary sewer mains shall be extended within the proposed tract to provide service to each lot.
2. Installation of sewer house branch(s) shall be required.
3. Separate sewer house branches are required for each lot.

MEMORANDUM

4. Abandon any existing on-site private septic systems.

Sanitary Sewer Fees

The following Sewer Connection Charges are due and shall be paid for the Project:

1. Sewer Lateral Charge.
2. Sewer Oversize Area #35.
3. Wastewater Facilities Charge (Residential Only)
4. Trunk Sewer Charge: Fowler

General Requirements:

Tract Map 6410 will be serviced as Single Family Residential properties with Basic Container Service. Property owners will receive 3 containers to be used as follows: 1 Gray container for solid waste, 1 Green container for green waste and 1 Blue container for recyclable material.

Fire Department

May 3, 2022
Byron Beagles

Comments

1. This is a proposed 73 lot public street sub-division with primarily standard 50-foot ROW streets and there are no on street parking restrictions except for lots 13 and 73. Those 2 lots front a median and no parking is permitted in front of those lots as the travel lane on each side of the median is 18 feet. It is recommended that the median/diverters be deleted. If installed, curbs in front of those two lots need to be painted red or Public Works Standard no parking towaway signs installed.
2. This tract is within the primary service area of Fire Station 15 and there are no development restrictions related to fire service response.
3. Each lot is subject to the City-wide fire service delivery impact fee.
4. Fire hydrant locations are typically reviewed on the Water Job submittal to Public Utilities. As hydrant locations are shown on the tract map and there needs to be a couple of revisions for preparing the Water Job plans:
 - Relocate the hydrant proposed between lots 64/65 to the lot line between 61/62
 - Relocate lot line 54/55 hydrant to lot line 3/4.
 - Delete the hydrant proposed at lot line 42/43.
5. Fire hydrant shall be installed and approved all-weather fire access roads provided before delivery of combustible material to the job site.

DEVELOPMENT SERVICES/PLANNING
CITY OF FRESNO
2600 FRESNO STREET, THIRD FLOOR
FRESNO, CA 93721-3604

DEVELOPER

JEROME KEENE, CENTURY COMMUNITIES OF
CALIFORNIA, LLC
7330 N. PALM AVE., SUITE 106
FRESNO, CA 93711

PROJECT NO: **6410**

ADDRESS: **2380 S. HOMSY AVE.**

APN: **481-020-60S**

SENT: **May 20, 2022**

Drainage Area(s)	Preliminary Fee(s)	Development Review Service Charge(s)	Fee(s)	
BD	\$116,662.00	NOR Review	\$513.00	To be paid prior to release of District comments to Public Agency and Developer.
		Grading Plan Review	\$1,430.00	Amount to be submitted with first grading plan submittal.
Total Drainage Fee: \$116,662.00		Total Service Charge:	\$1,943.00	

The proposed development will generate storm runoff which produces potentially significant environmental impacts and which must be properly discharged and mitigated pursuant to the California Environmental Quality Act and the National Environmental Policy Act. The District in cooperation with the City and County has developed and adopted the Storm Drainage and Flood Control Master Plan. Compliance with and implementation of this Master Plan by this development project will satisfy the drainage related CEQA/NEPA impact of the project mitigation requirements.

Pursuant to the District's Development Review Fee Policy, the subject project shall pay review fees for issuance of this Notice of Requirements (NOR) and any plan submittals requiring the District's reviews. The NOR fee shall be paid to the District by Developer before the Notice of Requirement will be submitted to the City. The Grading Plan fee shall be paid upon first submittal. The Storm Drain Plan fee shall be paid prior to return/pick up of first submittal.

The proposed development shall pay drainage fees pursuant to the Drainage Fee Ordinance prior to issuance of a building permit at the rates in effect at the time of such issuance. The fee indicated above is valid through 2/28/23 based on the site plan submitted to the District on 4/19/22 Contact FMFCD for a revised fee in cases where changes are made in the proposed site plan which materially alter the proposed impervious area.

Considerations which may affect the fee obligation(s) or the timing or form of fee payment:

- a.) Fees related to undeveloped or phased portions of the project may be deferrable.
- b.) Fees may be calculated based on the actual percentage of runoff if different than that typical for the zone district under which the development is being undertaken and if permanent provisions are made to assure that the site remains in that configuration.
- c.) Master Plan storm drainage facilities may be constructed, or required to be constructed in lieu of paying fees.
- d.) The actual cost incurred in constructing Master Plan drainage system facilities is credited against the drainage fee obligation.
- e.) When the actual costs incurred in constructing Master Plan facilities exceeds the drainage fee obligation, reimbursement will be made for the excess costs from future fees collected by the District from other development.
- f.) Any request for a drainage fee refund requires the entitlement cancellation and a written request addressed to the General Manager of the District within 60 days from payment of the fee. A non refundable \$300 Administration fee or 5% of the refund whichever is less will be retained without fee credit.

**FR
TRACT
No. 6410**

**FRESNO METROPOLITAN FLOOD CONTROL DISTRICT
NOTICE OF REQUIREMENTS**

Page 2 of 4

**FR
TRACT No. 6410**

Approval of this development shall be conditioned upon compliance with these District Requirements.

1. ☐ a. Drainage from the site shall
☒ b. Grading and drainage patterns shall be as identified on Exhibit No. 1
☐ c. The grading and drainage patterns shown on the site plan conform to the adopted Storm Drainage and Flood Control Master Plan.

2. The proposed development shall construct and/or dedicate Storm Drainage and Flood Control Master Plan facilities located within the development or necessitated by any off-site improvements required by the approving agency:
☐ Developer shall construct facilities as shown on Exhibit No. 1 as
☒ None required.

3. The following final improvement plans and information shall be submitted to the District for review prior to final development approval:
☒ Grading Plan
☒ Street Plan
☐ Storm Drain Plan
☐ Water & Sewer Plan
☒ Final Map
☒ Drainage Report (to be submitted with tentative map)
☐ Other
☐ None Required

4. Availability of drainage facilities:
☐ a. Permanent drainage service is available provided the developer can verify to the satisfaction of the City that runoff can be safely conveyed to the Master Plan inlet(s).
☐ b. The construction of facilities required by Paragraph No. 2 hereof will provide permanent drainage service.
☒ c. Permanent drainage service will not be available. The District recommends temporary facilities until permanent service is available.
☐ d. See Exhibit No. 2.

5. The proposed development:
☒ Appears to be located within a 100 year flood prone area as designated on the latest Flood Insurance Rate Maps available to the District, necessitating appropriate floodplain management action. (See attached Floodplain Policy.)
☐ Does not appear to be located within a flood prone area.

6. ☒ The subject site contains a portion of a canal or pipeline that is used to manage recharge, storm water, and/or flood flows. The existing capacity must be preserved as part of site development. Additionally, site development may not interfere with the ability to operate and maintain the canal or pipeline.

**FRESNO METROPOLITAN FLOOD CONTROL DISTRICT
NOTICE OF REQUIREMENTS**

Page 3 of 4

**FR
TRACT No. 6410**

7. The Federal Clean Water Act and the State General Permits for Storm Water Discharges Associated with Construction and Industrial Activities (State General Permits) require developers of construction projects disturbing one or more acres, and discharges associated with industrial activity not otherwise exempt from National Pollutant Discharge Elimination System (NPDES) permitting, to implement controls to reduce pollutants, prohibit the discharge of waters other than storm water to the municipal storm drain system, and meet water quality standards. These requirements apply both to pollutants generated during construction, and to those which may be generated by operations at the development after construction.
- a. State General Permit for Storm Water Discharges Associated with Construction Activities, effective July 1, 2010, as amended. A State General Construction Permit is required for all clearing, grading, and disturbances to the ground that result in soil disturbance of at least one acre (or less than one acre) if part of a larger common plan of development or sale). Permittees are required to: submit a Notice of Intent and Permit Registration Documents to be covered and must pay a permit fee to the State Water Resources Control Board (State Board), develop and implement a storm water pollution prevention plan, eliminate non-storm water discharges, conduct routine site inspections, train employees in permit compliance, and complete an annual certification of compliance.
 - b. State General Permit for Storm Water Discharges Associated with Industrial Activities, April, 2014 (available at the District Office). A State General Industrial Permit is required for specific types of industries described in the NPDES regulations or by Standard Industrial Classification (SIC) code. The following categories of industries are generally required to secure an industrial permit: manufacturing; trucking; recycling; and waste and hazardous waste management. Specific exemptions exist for manufacturing activities which occur entirely indoors. Permittees are required to: submit a Notice of Intent to be covered and must pay a permit fee to the State Water Resources Control Board, develop and implement a storm water pollution prevention plan, eliminate non-storm water discharges, conduct routine site inspections, train employees in permit compliance, sample storm water runoff and test it for pollutant indicators, and annually submit a report to the State Board.
 - c. The proposed development is encouraged to select and implement storm water quality controls recommended in the Fresno-Clovis Storm Water Quality Management Construction and Post-Construction Guidelines (available at the District Office) to meet the requirements of the State General Permits, eliminate the potential for non-storm water to enter the municipal storm drain system, and where possible minimize contact with materials which may contaminate storm water runoff.
8. A requirement of the District may be appealed by filing a written notice of appeal with the Secretary of the District within ten days of the date of this Notice of Requirements.
9. The District reserves the right to modify, reduce or add to these requirements, or revise fees, as necessary to accommodate changes made in the proposed development by the developer or requirements made by other agencies.
10. X See Exhibit No. 2 for additional comments, recommendations and requirements.

<h1>POLICY MANUAL</h1>	Date Adopted: September 11, 1981
Classification: FLOOD PLAIN MANAGEMENT	Date Last Amended: August 10, 2005
Subject: Flood Plain Policy	Approved By: 

Because of the relatively high velocities and volumes of flood flow associated with primary flood plains, and because the primary flood plain is responsible for passing the greatest percentage of the flood event, development located in such flood plains is subject to substantial risk, both to itself and to others as a result of the potential for blockage and diversion of flood waters. In view of these factors:

Policy:

- (1) All proposed development activity shall reference the Flood Insurance Rate Map to determine if it is located in a 100-year flood plain (special flood hazard areas inundated by a 100-year flood) "Primary Flood Plain". Any project not located within a FIRM or located in any area where the FIRM is determined to be inaccurate shall be the subject of a detailed hydrological flood hazard investigation to determine the relationship of the proposed development to the primary flood plain; and, further, to identify the calculated water surface elevation of the 100-year flood event.
- (2) The development must be properly flood proofed below the calculated water surface elevation of the 100-year flood event.
- (3) All development and/or permanent improvement activity which, if located within the primary floodway, may unduly impede, retard or change the direction of flow of water either, by itself, or by the catching or collecting of other debris or is placed where the flow of water would carry such obstruction downstream to the damage or detriment of either life or property, should not be permitted.
- (4) The development shall not cause displacement of any and all floodwaters from that portion of the flood plain to be developed.

NOTE: THIS MAP IS SCHEMATIC.
DISTANCES, AMOUNT OF CREDITABLE
FACILITIES, AND LOCATION OF INLET
BOUNDARIES ARE APPROXIMATE.

TRACT 6410
DRAINAGE AREA "BD"

EXHIBIT NO. 1

FRESNO METROPOLITAN FLOOD CONTROL DISTRICT

Prepared by: danielg

Date: 5/12/2022

Path: K:\Autocad\DWGS\0EXHIBIT\TRACTS\6410.mxd

OTHER REQUIREMENTS

EXHIBIT NO. 2

The minimum finish floor elevation shall be 304.62 (U.S.G.S. Datum)

The Master Plan system has been designed such that during a two-year event flow will not exceed the height of the 6-inch curb. Should wedge curb (4.5 inches height) be used the same criteria shall apply whereby flow remains below the top of curb. Any extensions or pipe size increases due to meeting the requirement listed above shall be at the developer's expense.

Lot coverage must be provided to the District prior to submittal of improvement plans. The final drainage fee will be calculated commensurate with the lot coverage provided by the developer. If the lot coverage indicates a density higher than Master Planned, mitigation may be required. The lot coverage calculated by the District includes the front yard walkway, sidewalk walkway and the rear yard patio equaling an additional 6% of impervious area in addition to the City's typical lot coverage calculation.

RE: Tentative Tract Map Application No. P22-00771
N/E Church and Peach avenues
FID's Central No. 23

Dear Mr. Holt:

The Fresno Irrigation District (FID) has reviewed Development Review Committee Application No. P21-05848, proposing to subdivide the property into 78 lots, APN: 481-020-60S. FID has the following comments:

1. FID previously reviewed and commented on the subject property on November 22, 2021, as Development Review Committee Application No. P21-05848. Those comments and conditions still apply, and a copy has been attached for your review.

Thank you for submitting this for our review. We appreciate the opportunity to review and comment on the subject documents for the proposed project. If you have any questions, please feel free to contact Jeremy Landrith at (559) 233-7161 extension 7407 or jlandrith@fresnoirrigation.com.

Sincerely,

Laurence Kimura, P.E.
Chief Engineer

RE: Development Review Committee Application No. P21-05848
N/E Church and Peach avenues
FID's Central No. 23

Dear Ms. Mariboho:

The Fresno Irrigation District (FID) has reviewed Development Review Committee Application No. P21-05848, proposing to subdivide the property into 78 lots, APN: 481-020-60S. FID has the following comments:

Summary of Requirements:

- FID Board Approval.
- Varying Width Grant of Easement.
- Canal Bank Improvements.
- Channel Improvements.
- Existing Encroachments removed and/or relocated.
- Review and Approval of all Plans.
- Execute additional Agreement(s), if necessary.
- Project Fees.
- No Encroachments (i.e. trees, monuments, fences, PUE, etc.).

Area of Concern

Central No. 23

1. FID's Central No. 23 runs westerly, crosses Minnewawa Avenue approximately 1,700 feet east of the subject property, traverses the northern portion of the subject property and crosses Peach Avenue approximately 100 feet west of the subject property, as shown on the attached FID exhibit map and will be impacted by the proposed development. Should this project include any street and or utility improvements along Minnewawa Avenue, Peach Avenue, Church Avenue, or in the vicinity of this canal, FID requires it review and approve all plans.

G:\Agencies\FresnoCity\DRC\P21-05848\P21-05848 FID Comments.doc

BOARD OF DIRECTORS

President RYAN JACOBSEN Vice-President JERRY PRIETO, JR. CHRISTOPHER WOOLF
GEORGE PORTER GREGORY BEBERIAN General Manager BILL STRETCH

2. Records do not show recorded easement for this portion of this canal, however, FID does own an easement and the width is as shown on FID's attached Standard Detail Page No. P-03 – P-05 and 1-01.
3. FID requires that, within the limits of the proposed project [and its remainder], the landowner grant an exclusive easement for the land underlying the canal and associated area along the canal required for maintenance pursuant to Water Code Section 22425 and FID policy. FID's District Canal Right-of-Way Requirements sheet is enclosed for your reference. The proposed easement (width) will depend on several factors including: 1) Width of canal, 2) height of canal banks, 3) final alignment of canal, 4) additional space needed where roads/avenues intersect canal, etc.
4. FID requires that the Engineer/Land Surveyor use the inside top hinge of the canal to define the edge of FID's right-of-way such that FID has a minimum of 20-foot wide right-of-way along the top of bank to be built out full width, clear of obstructions, structures, vegetation, etc. to provide clear passage and full width at all points along the canal bank. There are no minimum or suggested numbers of survey shots to take, but there must be enough survey points such that the top inside hinge of the canal bank is properly identified. Before finalizing plans, the Engineer/Land Surveyor will need to stake both the inside top hinge and the right-of-way/property for FID Staff to field evaluate an adequate width. FID staff must field verify the right-of-way/property boundary and the hinge line edge before signing plans to ensure that there are enough survey points to properly define the canal. The canal right-of-way line should be consistent with adjacent properties so long as the 20 feet minimum width, clear opening, and right-of-way requirements are met.
5. Peach Avenue is planned to be expanded to the east of the current road alignment. FID requires a 50 feet wide right-of-way narrowing to 20 feet wide per FID Standard 1-02 for operations and maintenance on all sides of the canal (which currently FID does not fully have). As the area develops under the City of Fresno and the traffic increases, it will be significantly more difficult and hazardous for FID to maintain and operate the Central Canal without road closures and/or traffic control unless the canal right-of-way is in place. The City needs to consider these issues in development, traffic and road improvements, need for any turn lanes, etc. for the future growth in the area and the expansion of Peach Avenue. All right-of-way and easements necessary for the full build-out of the area must be acquired and reserved now by the City as a part of this development.
6. FID requires the applicant and/or the applicant's engineer meet with FID at their earliest convenience to discuss specific requirements, e.g. easement width and alignment, right-of-way width and alignment, depth and size, fees, etc.

7. Typically, for any type of development that impacts a large open canal or is adjacent to one such as the Central Canal, FID requires the developer to improve the canal with either concrete lining, encasing the canal in a box culvert, or other approved means to protect the canal's integrity for an urban setting. FID does not have sufficient information to determine what kind of improvements will ultimately be required as part of the development. The engineers working on the project and FID's engineering staff must meet to discuss specific requirements as discussed below. In order to meet the "urban" standards for the canal, FID will require the following minimum conditions:

- a. Channel Stabilization: The proposed plan does not indicate any improvements to the Canal. If the Developer is not willing to concrete line the Canal or place it underground within a box culvert, they must come up with another means acceptable to and approved by FID to protect the Canal's integrity. On similar projects, Developers typically propose the following:
 - i. Surrounding Development – All proposed building pad elevations must be a minimum of 12-inches above the canal's high water.
 - ii. Freeboard – FID typically requires between 1.0 to 1.5 feet of freeboard. Because the Canal is used to route stormwaters, and is one of the larger canals used to convey the stormwater, FID will require a minimum of 1.5 feet of freeboard and a maximum of 2.0 feet. The Developer will be required to either import or export material to match FID's standards.
 - iii. Maintenance – this reach of Canal does have a history of high loads of sediment deposits which requires periodic dredging. FID will typically dredge the Canal and deposit the spoils on top of the banks to dry out. Once the spoil has dried, FID will flatten the spoil as time permits. This reach of Canal also has large volumes of trash, debris, shopping carts that are deposited into the Canal. FID's crews will typically remove the trash at the bridge crossings at Minnewawa Avenue and Peach Avenue, and another crew will come by to remove the trash. The hauling off of this material may occur several weeks after the trash has been placed on the side of the canal, and the trash may be considered a nuisance (sight and smell). If the Developer and/or City require a different level of maintenance effort, they will need to enter into an agreement for that purpose. The City and/or Developer will be responsible to fund the "higher level" of maintenance.

b. Drive banks/maintenance roads and encroachments (both banks):

- i. All impacted drive banks must be sloped a minimum of 2%, maximum of 4% away from the canal with provisions made for rainfall. Drainage will not be accepted into the Canal and must be routed away from FID property/drive banks. Runoff must be conveyed to nearby public streets or drainage system by drainage swales or other FID acceptable alternatives.
 - ii. Any drainage systems or swales proposed must be located outside FID's property/easement.
 - iii. Drive banks shall be built out to the required freeboard and elevation for the full width of the required Canal right-of-way width.
 - iv. All drive banks shall be overlaid with 3 inches of Class II aggregate base for all-weather access and for dust suppression.
 - v. Encroachments - All existing trees, bushes, debris, fencing, and other structures must be removed within FID's property/easement.
- 8. Trail - It is FID's understanding that a trail is master-planned along the Central Canal bank. As with other developments with trails proposed along the canals, FID will not allow the trail to encroach/overlap FID's canal easement. The following requirements are intended for trail projects adjacent to FID-owned properties and right-of-ways for open canals:
 - a. FID will not allow the trail easement to be in common use with FID-owned property or easements.
 - b. FID requires all trail improvements be placed outside of FID-owned properties and easements.
 - c. FID will not allow any portion of a tree canopy to encroach within its properties or easements.
 - d. FID's canals will not accept any drainage from the trail or the canal bank.
 - e. FID may require some improvements be made to the canal depending on the existing canal condition, the proposed trail, and the adjacent development.
- 9. A Trail fence between Trail and Canal is required unless an agreement is in place between City of Fresno and FID.

10. If a fence will be installed between the development and open canal, a block/masonry wall shall be required. Chain-link and wood fencing will no longer be accepted for urban developments.

General Comments

1. FID requires its review and approval of all improvement plans which affect its property/easements and canal/pipeline facilities including but not limited to Sewer, Water, Fresno Metropolitan Flood Control District (FMFCD), Street, Landscaping, Dry Utilities, and all other utilities.
2. FID requires the Applicant/Developer to submit for FID's approval a grading and drainage plan which shows that the proposed development will not endanger the structural integrity of the Canal, or result in drainage patterns that could adversely affect FID.
3. All existing trees, bushes, debris, old canal structures, pumps, canal gates, and other non- or in-active FID and private structures must be removed within FID's property/easement and the development project limits.
4. No large earthmoving equipment (paddle wheel scrapers, graders, excavators, etc.) will be allowed within FID's easement and the grading contractor will be responsible for the repair of all damage to the pipeline caused by contractors grading activities.
5. FID does not allow FID owned property or easements to be in common use with public utility and/or road easements and right-of-ways, but will in certain instances allow for its property to be in common use with landscape easements if the City of Clovis enters into the appropriate agreement.
6. FID requires its easements be shown on all maps/plans with proper recording information, and that FID be made a party to signing all final maps/plans.
7. Footings of retaining walls shall not encroach onto FID property/easement areas.
8. Trees will not be permitted within FID's property/easement areas.
9. FID requires its easements be shown on all plans with proper recording information.
10. No large earthmoving equipment (paddle wheel scrapers, graders, excavators, etc.) will be allowed within FID's easement and the grading contractor will be responsible for the repair of all damage to the pipeline caused by contractors grading activities.

11. FID is concerned about the potential vibrations caused by construction efforts near existing District facilities as it may cause damage to FID's canals, pipelines and culverts. The developer and contractor(s) must keep all large equipment, construction material, and soil stockpile outside of FID's easement and a minimum of 30 feet away from existing facilities. The developer and/or its contractor(s) will be responsible for all damages caused by construction activities.
12. FID is concerned that the proposed development may negatively impact local groundwater supplies. The area is currently open land with minimal to no water use, supplemented by groundwater pumping. Under current circumstances the project area is experiencing a modest but continuing groundwater overdraft. Should the proposed development result in a conversion from imported surface water to groundwater, this deficit will increase. FID recommends the City of Fresno require the proposed development balance anticipated groundwater use with sufficient recharge of imported surface water in order to preclude increasing the area's existing groundwater overdraft problem.
13. California enacted landmark legislation in 2014 known as the Sustainable Groundwater Management Act (SGMA). The act requires the formation of local groundwater sustainability agencies (GSAs) that must assess conditions in their local water basins and adopt locally-based management plans. FID and the City of Fresno are members of the North Kings Groundwater Sustainability Agency which will manage the groundwater basin within the FID service area. This area is completely reliant on groundwater pumping and SGMA will impact all users of groundwater and those who rely on it. The City should consider the impacts of the development on the City's ability to comply with requirements of SGMA.
14. For informational purposes, FID's Braly No. 14 runs westerly crosses Minnewawa Avenue approximately 2,300 feet northeast of the subject property, crosses Peach Avenue approximately 1,900 feet northwest of the subject property, and crosses Willow Avenue approximately 3,900 feet northwest of the subject property, as shown on the attached FID exhibit map. Should this project include any street and/or utility improvements along Minnewawa Avenue, Peach Avenue, Willow Avenue, or in the vicinity of this facility, FID requires it review and approve all plans.
15. For informational purposes, FID's Washington Colony No. 15 runs southwesterly crosses Church Avenue approximately 2,300 feet east of the subject property, , as shown on the attached FID exhibit map. Should this project include any street and/or utility improvements along Church Avenue or in the vicinity of this facility, FID requires it review and approve all plans.
16. As with most developer projects, there will be considerable time and effort required of FID's staff to plan, coordinate, engineer, review plans, prepare

Robert Holt
Re: P21-05848
November 22, 2021
Page 7 of 7

agreements, and inspect the project. FID's cost for associated plan review will vary and will be determined at the time of the plan review.

17. The above comments are not to be construed as the only requests FID will have regarding this project. FID will make additional comments and requests as necessary as the project progresses and more detail becomes available.

Thank you for submitting this for our review. We appreciate the opportunity to review and comment on the subject documents for the proposed project. If you have any questions, please feel free to contact Jeremy Landrith at (559) 233-7161 extension 7407 or jlandrith@fresnoirrigation.com.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Laurence Kimura', is positioned above the printed name.

Comments

1. Construction permits for the proposed development should be subject to assurance of sewer capacity of the Regional Wastewater Treatment Facility. Concurrence should be obtained from the California Regional Water Quality Control Board (RWQCB). For more information, contact staff at (559) 445-5116.
2. Construction permits for the proposed development should be subject to assurance that the City of Fresno community water system has the capacity and quality to serve this project. Concurrence should be obtained from the State Water Resources Control Board, Division of Drinking Water-Southern Branch. For more information call (559) 447-3300.
3. The proposed project has the potential to expose nearby residents to elevated noise levels. Consideration should be given to your City's municipal code.
4. Should any underground storage tank(s) be found during construction, the applicant shall apply for and secure an Underground Storage Tank Removal Permit from the Fresno County Department of Public Health, Environmental Health Division. Contact the Fresno County Hazmat Compliance Program at (559) 600-3271 for more information.
5. As a measure to protect ground water, all water wells and/or septic systems that exist or have been abandoned within the project area should be properly destroyed by an appropriately licensed contractor.

**SUBJECT: APPLICATION NO. P22-00771
TENTATIVE TRACT MAP NO. 6410
5239 E. CHURCH AVE.**

Dear Mr. Holt,

In response to your request for school district information regarding the above planning application for Tentative Tract Map 6410 which consists of a 74-lot subdivision to be located on 11.97 acres at 5239 East Church Avenue, Fresno Unified School District submits the following.

Any residential development on the above referenced property would be subject to the residential development fee rate, currently \$4.08 per square foot. Any new development on the property would be subject to the development fee prior to issuance of a building permit and fees would be calculated pursuant to rates effective at time of payment.

The project is presently within the attendance areas identified below. Any developed properties would be serviced by the following schools:

Elementary School: Storey
Middle School: Terronez
High School: Sunnyside

Thank you for the opportunity to comment. Please contact our office at (559) 457-3066 if you have any questions or require additional information regarding our comments.

Sincerely,

Alex Belanger, Chief Executive
Operational Services
