Re: 4715 W Dakota Ave – APN 511-220-37S City Water Connection

To: Projects Administrator Mr. Dejan Pavic, PE,

Mr. Pavic,

I wanted to connect to City water to ensure reliability of domestic water supply to my home and family. I have wife and 3 young children. When there was loss of utility power the well wasn't able to operate. The well system has several parts that require service, and the well's operation is paused during service. It is best practice for well water to be tested annually when serving domestic need and this was a recurring annual cost. The well consumes more electricity to supply domestic + irrigation water vs just irrigation water. The well is still able to provide irrigation water to my ≈2.5 acre parcel.

Sincerely,

David Lantis
