Terry Ogle, FCTA
Robert Phipps, Fresno COG
October 31, 2024

What is Measure C?

Adopted in 1986 and renewed in 2006, Measure C's ½ cent retail sales tax has transformed the transportation landscape in the Fresno-Clovis Metro area as well as Fresno County. Measure C has been widely successful due to its focus on transportation needs in Fresno County.

- ✓ Measure C has improved our freeway system, our local city streets and county roads, and our local and rural transit services.
- ✓ Fresno County was one of the first self-help counties in California.
- ✓ Over the past 37 years, Fresno County has been able to leverage over \$8 billion because of Measure C matching funds.
- ✓ Measure C has continued to provide safe, efficient, affordable transportation for Fresno County's 15-cities and rural communities, by connecting its residents to health care, emergency services, education and jobs.
- ✓ Under the current measure, annually 35% of Measure C revenues goes directly to local agencies for road maintenance/street repair.
- ✓ Annually, the current measure provides approx. \$15M for transit and \$1.8M for Trails/Peds, totaling \$155M and \$18.9 for 17 years.

VOTERS APPROVE MEASURE C EXTENSION WITH 78% VOTE

Local Infrastructure Statistics

- Approximately 93% of all home-to-work commute trips in Fresno County occur in a car or a truck. Every trip by car, bus, bicycle or foot “begins and ends” on a local street.
- A properly functioning, well maintained local street or road system is critical for the safety and mobility of the public, emergency responders, law enforcement, agriculture and commerce needs and everyday user.
- The current PCI in our region is 65. If pavement rehabilitation needs are not met in the next 10 years, the PCI in our region is anticipated to drop to 53 within those same ten years.
- Without consistent funding, the percentage of roads in a “failed” condition will continue to increase.
- Over the past 17 years Measure C has helped close that funding gap.

City of Fresno

Measure C Update

Measure C Pass-Through Totals for City of Fresno since 2007

✓ Street Maintenance	\$75.6M	(\$7.56M 2022/23FY)

MEASURE C

Where does Measure C go from here?

- ✓ Set to expire in 2027, FCTA and FCOG are beginning efforts to place a Measure C renewal on the ballot in November 2026.
- ✓ A second renewal of Measure C has the potential to raise from \$2.8 billion to \$5 billion, depending on duration and escalation rates.
- ✓ MC3 will continue to invest in much needed roadway/street repairs, control congestion, improve air quality, transport goods and provide mobility to all Fresno County residents.
- ✓ In addition, MC3 needs to be more forward-looking at how we do transit, what impact the high-speed rail station will have on our local transportation, alternative transportation such as light rail, rapid bus corridors and other commute options while still helping to maintain our county's 6,000-mile road and street network.
- ✓ Our goal is to work with all interested parties in developing a Measure C renewal plan that addresses our current transportation needs while preparing us for the next 20-30 years.

An aerial photograph of a road construction project, overlaid with a semi-transparent blue filter and large, stylized blue arrow shapes pointing right. The road is a multi-lane highway with a central median, curving through a landscape of green fields and trees. In the background, there are rolling hills or mountains under a clear sky. The overall aesthetic is professional and modern.

THANK YOU
