The Budget Allocation for this expenditure is \$341,000. The contract price is 12.3% below the Budget Allocation. ✓

BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

The Fresno/Clovis RWRf operates thirteen mesophilic anaerobic digesters. The digesters range in size from 860,000 to 1,870,000 gallons. The digesters are used in the treatment of the solids generated at the RWRf to eliminate the pathogens and volatile organic compounds. Over the period of approximately eight years these digesters accumulate debris associated with the treatment (i.e. solids consisting of sludge, sand, plastics and hair). This project will remove all the accumulated debris and inspect the interior surfaces for corrosion, wear, and structural stability for digesters 3 and 10.
