Each bidder has agreed to allow the City sixty-four (64) days from date bids are opened to accept or reject their bid proposal. Purchasing requests that you complete the following sections and return this bid evaluation to the Purchasing Division at the latest by Monday, February 24, 2020, 5:00 P.M.

The Engineer's Estimate for this expenditure is \$1,044,750.00. The contract price is 6% below the Engineer's Estimate. If the overage is greater than 10% or only one bid was received, give explanation: N/A

BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

Through a detailed analysis of the wastewater collection system, the Wastewater Collection Sewer Master Plan identified sewer pipes and appurtenances in need of rehabilitation and replacement. The scope of work for the Project will correct sewer system structural deficiencies in the vicinity of South Martin Luther King Jr. Boulevard and East Jensen Avenue.

The 2015 Wastewater Collection System Master Plan incorporated inspections of the City's sewer system. The goal of these inspections was to evaluate the structural and capacity handling capability of all the downtown sewer pipes. Through this investigation, portions of these sewer pipes were found to have structural deficiencies such as cracks and voids and some are past the design useful life.

The ages of the pipes in the Project area range from 58 to 70. The typical design life of a sewer pipe is 50 to 75 years. The advanced age and structural deficiencies discovered in these areas require that portions of the sewer pipes be rehabilitated. Additionally, localized point repairs will take place in areas of severe damage at various locations along these sewer mains.
