

Fresno Unified School District  
**MITIGATED NEGATIVE DECLARATION**

**Ventura Alternative Education Campus and Administrative Office Project**  
(State Clearinghouse No. 2018101040)

**Project Title:** Ventura Alternative Education Campus and Administrative Office Project

**Lead Agency and Project Sponsor:** Fresno Unified School District

**Contact Person:**

Alex Belanger, Assistant Superintendent  
Facilities Management & Planning  
4600 N. Brawley Avenue  
Fresno, CA 93722  
Telephone: (559) 457-3074  
Email: William.Belanger@fresnounified.org

**Project Location and Description:** The proposed project includes construction and operation of an alternative educational campus plus the operation of District-level administrative offices in four existing buildings on an approximately 12.65-acre site located on the south side of Ventura Avenue between Ninth Street and Tenth Street in the City of Fresno. The Alternative Education Campus would serve up to 1,350 students; however, the maximum number of students on the campus at any one time would be approximately 800 in grades 7 through 12 and 60 pre-K students in an early learning center. The campus would have up to 130 employees, including administrators, faculty, and support staff. The campus would include 44 classrooms, administrative offices for school functions, a multi-purpose building (will include student union and District CTE catering kitchen), hardcourt areas, and landscaping. Development of the proposed campus would also include demolition of six existing buildings at the site. Four existing buildings in the southern portion of the site would be used for District-level administrative activities, which would function separately from the proposed campus and accommodate up to 138 employees. Additionally, the project would include implementation of a Removal Action Workplan (RAW) to remove approximately 6,600 cubic yards of contaminated soil from the project site pursuant to the regulations and oversight of the California Department of Toxic Substances Control (DTSC).

The project is expected to be completed in three phases, with the initial phase consisting of the demolition of six existing buildings and initiation of the removal action during 2019. The second phase of the project will focus on the reuse of the four remaining buildings located on the southern portion of the property for District administrative offices. The administrative offices would tentatively begin operations in late 2019. The final phase of the project would entail the construction of the Alternative Education Campus. Funding for this phase of the project has yet to be identified, and it is anticipated this phase would begin in the next 3 to 10 years.

**Mitigation Measures:** The District has incorporated into the project mitigation measures for potentially significant project impacts related to aesthetics, air quality, biological resources, cultural resources, geology and soils, noise, transportation, tribal cultural resources, and utilities and service systems. The mitigation measures are included in Table 1 of the Initial Study.

**Finding:** As required by the California Environmental Quality Act, the District prepared an Initial Study for the project (attached). Based on the Initial Study, the District determined that although the project could have a significant effect on the environment, there would not be a significant effect in this case because the District incorporated into the project mitigation measures that would avoid any significant effects of the project or reduce the effects to an insignificant level. Therefore, it is the intent of Fresno Unified School District to adopt a Mitigated Negative Declaration for the project.
