RFP No.3873
RFP Opening:
08/23/22**PROPOSERS**

(In alphabetical order)

TOTAL PROPOSAL AMOUNT

1. Enterprise Automation 210 Goddard Irvine, CA 92618	\$149,919.00
---	--------------

Each proposer has agreed to allow the City one hundred twenty (120) days from date proposals were opened to accept or reject their proposal.

BACKGROUND OF PROJECT: Water for the City of Fresno comes from two (2) primary sources, groundwater and surface water. Additionally the City runs an aggressive recharge program to supplement the natural replenishment of the aquifer. Groundwater is distributed through pipelines to individual customer services. There are approximately 260 active wells scattered throughout the City of Fresno with each well having a Remote Terminal Unit (RTU) that communicates using SCADA to talk to the main station at the Water Division Head Quarters. The City of Fresno currently has three (3) facilities that treat surface water 1. The NESWTF, 2. The SESWTF and 3. Tank 3 Package Plant. Each surface water facility along with the groundwater system run using the SCADA system and that system requires around the clock support for various programming issues pertaining to system optimization, PLC programming, top view alarm support and reporting systems.
