CITY OF FRESNO – ENVIRONMENTAL ASSESSMENT FINDING OF CONFORMITY / MEIR SCH No. 2012111015

Pursuant to Section 21157.1 of the California Public Resource Code (California Environmental Quality Act) the project described below is determined to be within the scope of the Master Environmental Impact Report (MEIR) SCH No. 2012111015 prepared for the Fresno General Plan adopted by the Fresno City Council on December 18, 2014.

DATE RECEIVED FOR FILING:

Filed with the Fresno County Clerk's office on July 1, 2016

Applicant: Wilma Quan City of Fresno 2600 Fresno Street Fresno, CA 93721	Initial Study Prepared By: McKencie Contreras, Supervising Planner July 1, 2016
Environmental Assessment Number: EA-16-011	Project Location (including APN): 5735 East Tulare Street; Located on the southwest corner of East Tulare Street and South Argyle Avenue in the County of Fresno, California
	APNs: 313-021-02T and 03T
	Site Latitude: 36°44'29.3676" N & Site Longitude: 119°41'39.6486" W
	Mount Diablo Base & Meridian, Township 14S, Range 21E, Section 4 & 9

Project Description: Environmental Assessment No. EA-16-011 was filed by the City of Fresno and pertains to \pm 4.15 acres of property. The City of Fresno proposes to purchase the property from the Housing Authority and construct a City of Fresno Police Substation and a Bus Rapid Transit (BRT) Facility. The purchase will be completed through a real property purchase and sale agreement with joint escrow instructions. The Police substation will include a \pm 15,000 square foot building with parking facilities and a \pm 10,000 square foot ancillary service building for vehicle maintenance. The BRT Facility will be developed in accordance with adopted BRT specifications and will be located on the northern portion of the property. The BRT station includes a 29 foot shelter, benches, bike racks, information booth, and a station platform with related equipment. Entitlements for the proposed development will be submitted at a later date.

Conformance to Master Environmental Impact Report (MEIR) SCH No. 2012111015 prepared for the Fresno General Plan adopted by the Fresno City Council on December 18, 2014:

The northern parcel (APN: 313-021-02T) is zoned PI (*Public and Institutional*), which is consistent with the Public and Institutional planned land use designation of the Fresno General Plan and the Roosevelt Community Plan. The southern parcel (APN: 313-021-03T) is zoned CMX (*Corridor/Center Mixed-Use*), which is consistent with the Corridor/Center Mixed-Use planned land use designation of the Fresno General Plan and the Roosevelt Community Plan.

The Development and Resource Management Department staff has prepared an Initial Study (See Attached "Appendix G To Analyze Subsequent Project Identified In MEIR No. SCH No. 2012111015/Initial Study") to evaluate the proposed application in accordance with the land use and environmental policies and provisions of lead agency City of Fresno's General Plan adopted by the Fresno City Council on December 18, 2014 and the related MEIR SCH No. 2012111015. The proposed application will not facilitate an additional intensification of uses beyond that which would be allowed by the above-noted planned land use designation. Moreover, it is not expected that the future development will adversely impact existing city service systems or the traffic

Finding of Conformity
Environmental Assessment No. EA-16-011
July 1, 2016
Page 2 of 3

circulation system that serves the subject property. These infrastructure findings have been verified by the Public Works and Public Utilities Departments. It has been further determined that all applicable mitigation measures of the MEIR have been applied to the project necessary to assure that the project will not cause significant adverse cumulative impacts, growth inducing impacts, and irreversible significant effects beyond those identified by the MEIR as provided by CEQA Guidelines Section 15177(b)(3).

Pursuant to Section 21157.1 of the California Public Resources Code (California Environmental Quality Act), it may be determined that a subsequent project falls within the scope of the MEIR, provided that the project does not cause additional significant impacts on the environment that were not previously examined by the MEIR. Relative to this specific project proposal, the environmental impacts noted in the MEIR, pursuant to the Fresno General Plan land use designation, include impacts associated with the above mentioned planned land use designation specified for the subject site. Based on this Initial Study, the following findings are made: (1) The proposed project was identified as a Subsequent Project in the MEIR because its, location, land use designation and permissible densities and intensities are set forth in Figure LU-1 of the Fresno General Plan; (2) The proposed project is fully within the scope of the MEIR because it will not generate additional significant effects on the environment not previously examined and analyzed by the MEIR for the reasons set forth in the Initial Study; and (3) other than identified below, there are no new or additional mitigation measures or alternatives required.

In addition, after conducting a review of the adequacy of the MEIR pursuant to Public Resources Code Section 21157.6(b)(1), the Development and Resource Management Department, as lead agency, finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and that no new information, which was not known and could not have been known at the time that the MEIR was certified as complete, has become available. Moreover, as lead agency for this project, the Development and Resource Management Department, per Section 15177(d) of the CEQA Guidelines, has determined that all feasible mitigation measures from the MEIR shall be applied to the project as conditions of approval as set forth in the attached MEIR Mitigation Measure Monitoring Checklist (See "Master Environmental Impact Report (MEIR) SCH No. 2012111015 for the General Plan, Mitigation Monitoring Checklist".)

Public notice has been provided regarding staff's finding in the manner prescribed by Section 15177(d) of the CEQA Guidelines and by Section 21092 of the California Public Resources Code (CEQA provisions).

Filed with:

FRESNO COUNTY CLERK 2220 Tulare Street, First Floor, Fresno. CA 93721

PROJECT DESCRIPTION: Environmental Assessment No. EA-16-011 was filed by the City of Fresno and pertains to \pm 4.15 acres of property located on the southwest corner of East Tulare Street and South Argyle Avenue. The City of Fresno proposes to purchase the property from the Housing Authority and construct a City of Fresno Police Substation and a Bus Rapid Transit (BRT) Facility. The purchase will be completed through a real property purchase and sale agreement with joint escrow instructions. The Police substation will include a \pm 15,000 square foot building with parking facilities and a \pm 10,000 square foot ancillary service building for vehicle maintenance. The BRT Facility will be developed in accordance with adopted BRT specifications and will be located on the northern portion of the property. The BRT station includes a 29 foot shelter, benches, bike racks, information booth, and a station platform with related equipment. Entitlements for the proposed development will be submitted at a later date.

The northern parcel (APN: 313-021-02T) is zoned PI (*Public and Institutional*), which is consistent with the Public and Institutional planned land use designation of the Fresno General Plan and the Roosevelt Community Plan. The southern parcel (APN: 313-021-03T) is zoned CMX (*Corridor/Center Mixed-Use*), which is consistent with the Corridor/Center Mixed-Use planned land use designation of the Fresno General Plan and the Roosevelt Community Plan.

The City of Fresno has conducted an initial study of the above-described project and it has been determined to be a subsequent project that is fully within the scope of the Master Environmental Impact Report (MEIR) SCH No. 2012111015 prepared for the Fresno General Plan adopted by the

Fresno City Council on December 18, 2014. Therefore, the Development and Resource Management Department proposes to adopt a Finding of Conformity for this project.

With mitigation imposed, there is no substantial evidence in the record that this project may have additional significant, direct, indirect or cumulative effects on the environment that are significant and that were not identified and analyzed in the MEIR. After conducting a review of the adequacy of the MEIR pursuant to Public Resources Code, Section 21157.6(b)(1), the Development and Resource Management Department, as lead agency, finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and that no new information, which was not known and could not have been known at the time that the MEIR was certified as complete has become available. The project is not located on a site which is included on any of the lists enumerated under Section 65962.5 of the Government Code including, but not limited to, lists of hazardous waste facilities, land designated as hazardous waste property, hazardous waste disposal sites and others, and the information in the Hazardous Waste and Substances Statement required under subdivision (f) of that Section.

Additional information on the proposed project, including the proposed environmental Finding of Conformity, initial study and all documents and technical studies referenced in the initial study, as well as electronic copies of documents, may be obtained from the Development and Resource Management Department, Fresno City Hall, 2600 Fresno Street, Third Floor, Room 3043, Fresno, California 93721-3604. Please contact McKencie Contreras at (559) 621-8066 for more information.

ANY INTERESTED PERSON may comment on the proposed environmental finding. Comments must be in writing and must state (1) the commentor's name and address; (2) the commentor's interest in, or relationship to, the project; (3) the environmental determination being commented upon; and (4) the specific reason(s) why the proposed environmental determination should or should not be made. Comments may be submitted at any time between the publication date of this notice and close of business on August 3, 2016. Please direct all comments to McKencie Contreras, City of Fresno Development and Resource Management Department, City Hall, 2600 Fresno Street, Third Floor, Room 3043, Fresno, California, 93721-3604; or by email, McKencie.Contreras@fresno.gov; or by facsimile, (559) 498 1026. Para información en español, comuníquese con McKencie Contreras al teléfono (559) 621-8066.

8. **Description of project:**

Environmental Assessment No. EA-16-011 was filed by the City of Fresno and pertains to \pm 4.15 acres of property located on the southwest corner of East Tulare Street and South Argyle Avenue. The City of Fresno proposes to purchase the property from the Housing Authority and construct a City of Fresno Police Substation and a Bus Rapid Transit (BRT) Facility. The purchase will be completed through a real property purchase and sale agreement with joint escrow instructions. The Police substation will include a \pm 15,000 square foot building with parking facilities and a \pm 10,000 square foot ancillary service building for vehicle maintenance. The BRT Facility will be developed in accordance with adopted BRT specifications and will be located on the northern portion of the property. The BRT station includes a 29 foot shelter, benches, bike racks, information booth, and a station platform with related equipment. Entitlements for the proposed development will be submitted at a later date.

9. Surrounding land uses and setting:

	Planned Land Use	Existing Zoning	Existing Land Use
North	Medium-Low Density Residential	RS-4 (Residential Single Family, Medium-Low Density District)	Vacant Land & Single Family Residence
East	Corridor/Center Mixed-Use	CMX (Corridor/Center Mixed-Use District)	Multi-Family Residential
South	Corridor/Center Mixed-Use	CMX (Corridor/Center Mixed-Use District)	Multi-Family Residential

West	Regional Commercial & Corridor/Center Mixed-Use	CR (Commercial-Regional District) CMX (Corridor/Center Mixed-Use District)	Vacant Land & Multi-Family Residential
------	--	--	--

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

<u>City of Fresno (COF) Department of Public Works; COF Department of Public Utilities; COF Building and Safety Services Division; COF Fire Department; Fresno Metropolitan Flood Control District; Fresno County Department of Public Health; San Joaquin Valley Air Pollution Control District; and Fresno Irrigation District</u>

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

Pursuant to Public Resources Code Section 21157.1(b) and CEQA Guidelines 15177(b)(2), the purpose of this Master Environmental Impact Report (MEIR) initial study is to analyze whether the subsequent project was described in MEIR SCH No. 2012111015 and whether the subsequent project may cause any additional significant effect on the environment, which was not previously examined in MEIR SCH No. 2012111015 adopted for the Fresno General Plan.

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

Aesthetics	Agriculture and Forestry Resources	Air Quality
Biological Resources	Cultural Resources	Geology /Soils
Greenhouse Gas Emissions	Hazards & Hazardous Materials	Hydrology/Water Quality
Land Use/Planning	Mineral Resources	Noise
Population /Housing	Public Services	Recreation
Transportation/Traffic	Utilities/Service Systems	Mandatory Findings of Significance

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

<u>X</u>	I find that the proposed project is a subsequent project identified in the MEIR and that it is fully within the scope of the MEIR because it would have no additional significant effects that were not examined in the MEIR such that no new additional mitigation measures or alternatives may be required. All applicable mitigation measures contained in the Mitigation Measure Monitoring Checklist shall be imposed upon the proposed project. A FINDING OF CONFORMITY will be prepared.
	I find that the proposed project is a subsequent project identified in the MEIR but that it is not fully within the scope of the MEIR because the proposed project could have a significant effect on the environment that was not examined in the MEIR. However, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project specific mitigation measures and all applicable mitigation measures contained in the MEIR Mitigation Measure Monitoring Checklist will be imposed upon the proposed project. A MITIGATED NEGATIVE DECLARATION will be prepared.
Mck	I find that the proposed project is a subsequent project identified in the MEIR but that it MAY have a significant effect on the environment that was not examined in the MEIR, and an ENVIRONMENTAL IMPACT REPORT is required to analyze the potentially significant effects not examined in the MEIR pursuant to Public Resources Code Section 21157.1(d) and CEQA Guidelines 15178(a). Cencie Contreras. Supervising Planner Date

EVALUATION OF ADDITIONAL ENVIRONMENTAL IMPACTS NOT ASSESSED IN THE MEIR:

- 1. For purposes of this MEIR Initial Study, the following answers have the corresponding meanings:
 - a. "No Impact" means the subsequent project will not cause any additional significant effect related to the threshold under consideration which was not previously examined in the MEIR.
 - b. "Less Than Significant Impact" means there is an impact related to the threshold under consideration that was not previously examined in the MEIR, but that impact is less than significant;

- c. "Less Than Significant with Mitigation Incorporation" means there is a potentially significant impact related to the threshold under consideration that was not previously examined in the MEIR, however, with the mitigation incorporated into the project, the impact is less than significant.
- d. "Potentially Significant Impact" means there is an additional potentially significant effect related to the threshold under consideration that was not previously examined in the MEIR.
- 2. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 3. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 4. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 5. A "Finding of Conformity" is a determination based on an initial study that the proposed project is a subsequent project identified in the MEIR and that it is fully within the scope of the MEIR because it would have no additional significant effects that were not examined in the MEIR.
- 6. "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).
- 7. Earlier analyses may be used where, pursuant to the tiering, program EIR or MEIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

- a. Earlier Analysis Used. Identify and state where they are available for review.
- b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in the MEIR or another earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
- c. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 8. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 9. Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 10. This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 11. The explanation of each issue should identify:
 - a. The significance criteria or threshold, if any, used to evaluate each question; and
 - b. The mitigation measure identified, if any, to reduce the impact to less than significance.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
I. AESTHETICS Would the project:				
a) Have a substantial adverse effect on a scenic vista?				X

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				X
c) Substantially degrade the existing visual character or quality of the site and its surroundings?			Х	
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			Х	

The proposed use is to be located on a site in an area planned for residential, mixeduse, and commercial uses, and not located near a scenic vista. The immediate area is substantially developed with residential uses; therefore, no public or scenic vista will be obstructed by the project and no valuable vegetation will be removed for this project. The project will not damage any scenic resources nor will it degrade the visual character or quality of the subject site and its surroundings.

Future development of the site will not create a new source of substantial light or glare which would affect day or night time views in the project area, given that during the entitlement process, staff will ensure that lights are located in areas that will minimize light sources to the neighboring properties. Further, Mitigation Measure (MM) AES-1 and MM AES-3 require lighting systems for street and parking areas to be shielded to direct light to surfaces and orient light away from adjacent properties. As a result, the project will have no impact on aesthetics. The proposed construction would not significantly impact the visual character of the site as the proposed new construction type and appearance will provide an enhanced street frontage and landscaping to a vacant site surrounded by development.

In addition, a condition of approval will require that lighting, where provided for security and to illuminate parking area and public streets, shall be hooded and so arranged and controlled so as not to cause a nuisance either to highway traffic or to the living environment. The amount of light shall be provided according to the standards of the Department of Public Works. As a result, the project will have a less than significant impact on aesthetics. Conditions to ensure the project is aesthetically appealing will be incorporated into the project approval.

In conclusion, with MEIR mitigation measures incorporated, the project will not result in any aesthetic impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
II. AGRICULTURE AND FORESTRY RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?				X
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				Х

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				X
d) Result in the loss of forest land or conversion of forest land to non-forest use?				Х
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?				X

The subject site is designated as "Urban and Built-Up Land" on the 2014 Rural Mapping Edition: Fresno County Important Farmland Map and thus has no farmland considered to be prime farmland, farmland of statewide importance, or unique farmland. The subject site is not currently under cultivation.

The land surrounding the sites to the north, south, and east are designated as "Urban and Built-Up Land" by the above mentioned map. The land to the west is designated "Farmland of Local Importance". The subject site and property adjacent to the subject site are not under a Williamson Act contract. Therefore, the proposed project on the subject site will not affect the Williamson Act contract parcels.

The proposed project does not conflict with any forest land or Timberland Production or result in any loss of forest land. The proposed project does not include any changes which will affect the existing environment.

In conclusion, the proposed project would not result in any agriculture and forestry resource environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
III. AIR QUALITY AND GLOBAL CLIMATE CHANGE - (Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations.) Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan (e.g., by having potential emissions of regulated criterion pollutants which exceed the San Joaquin Valley Air Pollution Control Districts (SJVAPCD) adopted thresholds for these pollutants)?			X	
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?			Х	
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?			X	
d) Expose sensitive receptors to substantial pollutant concentrations.				Х
e) Create objectionable odors affecting a substantial number of people?				х

Setting

The subject site is located in Fresno County and within the San Joaquin Valley Air Basin (SJVAB). This region has had chronic non-attainment of federal and state clean air standards for ozone/oxidants and particulate matter due to a combination of topography and climate. The San Joaquin Valley (Valley) is hemmed in on three sides by mountain ranges, with prevailing winds carrying pollutants and pollutant precursors from urbanized areas to the north (and in turn contributing pollutants and precursors to downwind air basins). The Mediterranean climate of this region, with a high number of sunny days and little or no measurable precipitation for several months of the year, fosters photochemical reactions in the atmosphere, creating ozone and particulate matter.

Regional factors affect the accumulation and dispersion of air pollutants within the SJVAB. Air pollutant emissions overall are fairly constant throughout the year, yet the concentrations of pollutants in the air vary from day to day and even hour to hour. This variability is due to complex interactions of weather, climate, and topography. These factors affect the ability of the atmosphere to disperse pollutants. Conditions that move and mix the atmosphere help disperse pollutants, while conditions that cause the atmosphere to stagnate allow pollutants to concentrate. Local climatological effects, including topography, wind speed and direction, temperature, inversion layers, precipitation, and fog can exacerbate the air quality problem in the SJVAB.

The SJVAB is approximately 250 miles long and averages 35 miles wide, and is the second largest air basin in the state. The SJVAB is defined by the Sierra Nevada in the east (8,000 to 14,000 feet in elevation), the Coast Ranges in the west (averaging 3,000 feet in elevation), and the Tehachapi mountains in the south (6,000 to 8,000 feet in elevation). The Valley is basically flat with a slight downward gradient to the northwest. The Valley opens to the sea at the Carquinez Straits where the San Joaquin-Sacramento Delta empties into San Francisco Bay. The Valley, thus, could be considered a "bowl" open only to the north.

During the summer, wind speed and direction data indicate that summer wind usually originates at the north end of the Valley and flows in a south-southeasterly direction through the Valley, through Tehachapi pass, into the Southeast Desert Air Basin. In addition, the Altamont Pass also serves as a funnel for pollutant transport from the San Francisco Bay Area Air Basin into the region.

During the winter, wind speed and direction data indicate that wind occasionally originates from the south end of the Valley and flows in a north-northwesterly direction. Also during the winter months, the Valley generally experiences light, variable winds (less than 10 mph). Low wind speeds, combined with low inversion layers in the winter, create a climate conducive to high carbon monoxide (CO) and particulate matter (PM10 and PM2.5) concentrations. The SJVAB has an "Inland Mediterranean" climate averaging over 260 sunny days per year. The Valley floor is characterized by warm, dry

summers and cooler winters. For the entire Valley, high daily temperature readings in summer average 95°F. Temperatures below freezing are unusual. Average high temperatures in the winter are in the 50s, but highs in the 30s and 40s can occur on days with persistent fog and low cloudiness. The average daily low temperature is 45°F.

The vertical dispersion of air pollutants in the Valley is limited by the presence of persistent temperature inversions. Solar energy heats up the Earth's surface, which in turn radiates heat and warms the lower atmosphere. Therefore, as altitude increases, the air temperature usually decreases due to increasing distance from the source of heat. A reversal of this atmospheric state, where the air temperature increases with height, is termed an inversion. Inversions can exist at the surface or at any height above the ground, and tend to act as a lid on the Valley, holding in the pollutants that are generated here.

Regulations

The San Joaquin Valley Air Pollution Control District (SJVAPCD) is the local regional jurisdictional entity charged with attainment planning, rulemaking, rule enforcement, and monitoring under Federal and State Clean Air Acts and Clean Air Act Amendments.

The Master Environmental Impact Report (MEIR) prepared for the Fresno General Plan and Policy RC-4-c of the Fresno General Plan require that computer models used by the SJVAPCD be used to analyze development projects and estimate future air pollutant emissions that can be expected to be generated from operational emissions (vehicular traffic associated with the project), area-wide emissions (sources such as ongoing maintenance activities and use of appliances), and construction activities.

CalEEMod is a statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects. The model quantifies direct emissions from construction and operations (including vehicle and off-road equipment use), as well as indirect emissions, such as GHG emissions from energy use, solid waste disposal, vegetation planting and/or removal, and water use. Further, the model identifies mitigation measures to reduce criteria pollutant and GHG emissions along with calculating the benefits achieved from measures chosen by the user. The GHG mitigation measures were developed and adopted by the California Air Pollution Control Officers Association (CAPCOA).

In addition to the above-mentioned factors, the CalEEMod computer model evaluates the following emissions: ozone precursors (Reactive Organic Gases (ROG)) and NOX; CO, SOX, both regulated categories of particulate matter, and the greenhouse gas carbon dioxide (CO2). The model incorporates geographically-customized data on local vehicles, weather, and SJVAPCD Rules.

The analysis was conducted using the CalEEMod Model, Version 2013.2.2. The project

is proposing to construct \pm 15,000 square foot a Police Substation building with parking facilities and a \pm 10,000 square foot ancillary service building for vehicle maintenance. The Bus Rapid Transit (BRT) Facility will be developed in accordance with adopted BRT specifications and will be located on the northern portion of the property. The BRT station includes a 29 foot shelter, benches, bike racks, information booth, and a station platform with related equipment.

<u>Construction Emissions – Short Term</u>

It was assumed that the project would be constructed in one phase, over a one-year period. Construction equipment estimates were based on CalEEMod default assumptions.

Project Construction Emissions

[all data given in tons/year]	ROG	NOx	CO	SO2	PM10	PM2.5	CO2
2017 Construction	0.45	3.86	2.99	0.00443	0.36	0.28	390.54
2018 Construction	0.62	0.18	0.17	0.00027	0.01	0.01	23.30
Project Total	1.07	4.04	3.16	0.0047	0.37	0.29	413.84
District Thresholds	10	10	N/A	N/A	15	15	N/A

The analysis determined that the proposed project will not exceed the threshold of significance limits for regulated air pollutants. SJVAPCD Regulation VIII addresses not only construction and demolition dust control measures, but also regulates ongoing maintenance of open ground areas that may create entrained dust from high winds. The applicant will be required to provide landscaping on the project site which will contain trees to assist in the absorbsion of air pollutants, reduce ozone levels, and curtail storm water runoff.

<u>Operational Emissions – Long Term</u>

Operational emissions include emissions associated with area sources (energy use, landscaping, etc.) and vehicle emissions. Emissions from each phase of the project were estimated using the CalEEMod model. The average trips were based on default assumptions in the CalEEMod model.

Project Annual Operational Emissions

[all data given in tons/year]	ROG	NOx	CO	SO2	PM10	PM2.5	CO2
Area	0.40	0.00	0.00025	0.00	0.00	0.00	0.00047
Mobile	0.91	2.20	9.41	0.01	0.70	0.20	957.62
Project Totals	1.31	2.20	9.41	0.01	0.70	0.20	957.62
District Thresholds	10	10	N/A	N/A	15	15	N/A

Project specific emissions of criteria pollutants are not expected to exceed District significance thresholds of 10 tons/year NOX, 10 tons/year ROG, and 15 tons/year PM10. Project specific criteria pollutant emissions would have no significant adverse impact on air quality.

The SJVAPCD has developed the San Joaquin Valley 1991 California Clean Air Act Air Quality Attainment Plan (AQAP), which continues to project nonattainment for the above-noted pollutants in the future. This project will be subject to applicable SJVAPCD rules, regulations, and strategies. In addition, the project will be subject to the SJVAPCD Regulation VIII, Fugitive Dust Rules, related to the control of dust and fine particulate matter. This rule mandates the implementation of dust control measures to reduce the potential for dust to the lowest possible level. The plan includes a number of strategies to improve air quality including a transportation control strategy and a vehicle inspection program.

The proposed project is subject to District Rule 9510 (Indirect Source Review). District Rule 9510 is intended to mitigate a project's impact on air quality through project design elements or by payment of applicable off-site mitigation fees.

The proposed project would result in additional vehicle trips, specifically the buses operating as part of the BRT service. These trips would, in part, replace trips made as part of an existing bus route. Furthermore, the project's emissions as a percentage of the area source, energy use, and vehicle emissions within Fresno County are very small. The project's overall contribution to the overall emissions is negligible. Therefore, there is no air quality or global climate change impacts perceived to occur as a result of the proposed project. Both short and long term impacts associated with construction and operation are below the District's significance thresholds.

A Health Risk Assessment was prepared by Skinner Associates on July 1, 2010 and no increase in cancer exposure was observed. The project will not occur at a scale or scope with potential to contribute substantially or cumulatively to existing or projected air quality violations, impacts, or increases of criteria pollutants for which the San Joaquin Valley region is under an applicable federal or state ambient air quality standard (including releasing emissions that exceed quantitative thresholds for ozone precursors). The proposed transit station will assist with the reduction of vehicular use and traffic. The proposed project will comply with all applicable air quality plans. Therefore, no violations of air quality standards will occur and no net increase of pollutants will occur.

In conclusion, with MEIR mitigation measures incorporated, the project will not result in any air quality impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
IV. BIOLOGICAL RESOURCES Would the project:				

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				X
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				Х
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				Х
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				Х

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				Х
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				Х

The proposed project would not directly affect any sensitive, special status, or candidate species, nor would it modify any habitat that supports them. There is no riparian habitat or any other sensitive natural community identified in the vicinity of the proposed project by the California Department of Fish and Game or the US Fish and Wildlife Service. No federally protected wetlands are located on the subject site. Therefore, there would be no impacts to species, riparian habitat or other sensitive communities and wetlands. There are also no bodies of water on the subject site or in the immediate vicinity of the subject site. There is an existing active canal that runs southwesterly along the western portion of the subject property. However, the proposed project would have no impact on the movement of migratory fish or wildlife species or on established wildlife corridors or wildlife nursery sites. No local policies regarding biological resources are applicable to the subject site and there would be no impacts with regard to those plans.

No habitat conservation plans or natural community conservation plans in the region pertain to the natural resources that exist on the subject site or in their immediate vicinity. Therefore, there would be no impacts.

In conclusion, with MEIR mitigation measures incorporated, the project will not result in any biological resource impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
V. CULTURAL RESOURCES Would the project:				

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Cause a substantial adverse change in the significance of a historical resource as defined in '15064.5?				Х
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to '15064.5?				Х
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?				Х
d) Disturb any human remains, including those interred outside of formal cemeteries?				Х

There are no structures which exist within the project area that are listed in the National or Local Register of Historic Places, and the subject site is not within a designated historic district. There are no known archaeological or paleontological resources that exist within the project area; previously unknown paleontological resources or undiscovered human remains could be disturbed during project construction.

In conclusion, with MEIR mitigation measures incorporated, the project will not result in any cultural resource impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VI. GEOLOGY AND SOILS Would the project:				
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.				X
ii) Strong seismic ground shaking?				Х
iii) Seismic-related ground failure, including liquefaction?				Х
iv) Landslides?				Х
b) Result in substantial soil erosion or the loss of topsoil?			X	
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				Х
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?				Х
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				Х

The proposed project will not expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving seismic ground shaking, seismic-related ground failure, including liquefaction, or landslides.

The existing topography is flat with no apparent unique or significant land forms such as vernal pools. Development of the property requires compliance with grading and drainage standards of the City of Fresno and the Fresno Metropolitan Flood Control District (FMFCD) Standards. Grade differentials at property lines must be limited to one foot or less, or a cross-drainage covenant must be executed with affected adjoining property owners.

Records indicate that a waste water treatment facility occupied the subject property in the 1960s and 1970s. Two surface assessments were conducted by the Twinning Laboratories, Inc. of Fresn0 in 2004 and 2005. These assessments revealed elevated concentrations of Total Kjeldahl Nitrogen, (TKN) in shallow soils within the subject Additional studies were required to determine whether or not additional assessment and/or site remediation was warranted. Krazan & Associates, Inc. conducted a Phase II Limited Subsurface Assessment (LSA) for the subject property. This LSA was based on the findings provided in Krazan's April 29, 2016 Phase I Environmental Site Assessment (ESA). The LSA stated that TKN in soil is not considered especially toxic to humans. According to the LSA, borings B5 and B7 had higher concentrations in May 2016 than 2004/2005 and boring B10 increased in TKN with depth. However, this is not a significant impact given that it is anticipated that the areas will be paved, which will reduce or eliminate infiltration into the ground. The LAS concluded that the current concentrations of TKN detected did not appear to represent a significant environmental concern. No adverse environmental effects related to topography, soils or geology are expected as a result of this project.

In conclusion, the proposed project would not result in any geology or soil environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VII. GREENHOUSE GAS EMISSIONS Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			X	

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			X	

The proposed project will not occur at a scale or scope with potential to contribute substantially or cumulatively to the generation of greenhouse gas emissions, either directly or indirectly. The General Plan and MEIR rely upon a Greenhouse Gas Reduction Plan that provides a comprehensive assessment of the benefits of city policies and proposed code changes, existing plans, programs, and initiatives that reduce greenhouse gas emissions. The plan demonstrates that even though there is increased growth, the City would still be reducing greenhouse gas emissions through 2020 and per capita emission rates drop substantially. The benefits of adopted regulations become flat in later years and growth starts to exceed the reductions from all regulations and measures. Although it is highly likely that regulations will be updated to provide additional reductions, none are reflected in the analysis since only the effect of adopted regulations is included. See Section III, Air Quality, for a full discussion of air quality and greenhouse gas emissions.

In conclusion, the proposed project would not result in any greenhouse gas emission environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VIII. HAZARDS AND HAZARDOUS MATERIAL Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?				Х

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			X	
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				Х
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				Х
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				Х
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?				Х

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				Х
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				X

See Section VI, Geology and Soils, for a discussion of soil impacts of the subject property. The project is not located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. The project itself will not generate or use hazardous materials in a manner outside health department requirements, is not near any wildland fire hazard zones, and poses no interference with the City's or County's Hazard Mitigation Plans or emergency response plans. The subject site has not been under cultivation for many years. The subject site is not located within an airport land use plan and is not within the vicinity of a private airstrip. Therefore, there will be no significant impacts related to hazards.

In conclusion, with MEIR mitigation measures incorporated, the project will not result in any hazards and hazardous material impacts beyond those analyzed in MEIR SCH No. 2012111015.

	ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	
	IX. HYDROLOGY AND WATER QUALITY Would the project:					
-	a) Violate any water quality standards or waste discharge requirements?				Х	

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?			X	
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?			X	
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?			X	
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?			Х	
f) Otherwise substantially degrade water quality?			Х	

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
g) Place housing within a 100- year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				Х
h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?				Х
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				Х
j) Inundation by seiche, tsunami, or mudflow?				Х

<u>Setting</u>

Fresno is one of the largest cities in the United States still relying primarily on groundwater for its public water supply. Surface water treatment and distribution has been implemented in the northeastern part of the City, but the city is still subject to an EPA Sole Source Aquifer designation. While the aquifer underlying Fresno typically exceeds a depth of 300 feet and is capacious enough to provide adequate quantities of safe drinking water to the metropolitan area well into the twenty-first century, groundwater degradation, increasingly stringent water quality regulations, and an historic trend of high consumptive use of water on a per capita basis (some 250 gallons per day per capita), have resulted in a general decline in aquifer levels, increased cost to provide potable water, and localized water supply limitations.

The adverse groundwater conditions of limited supply and compromised quality have been well- documented by planning, environmental impact report and technical studies over the past 20 years including the Master Environmental Impact Report (MEIR) No. SCH No. 2012111015 for the Fresno General Plan, the MEIR 10130 for the 2025 Fresno General Plan, Final EIR No.10100, Final EIR No.10117, and Final EIR No. SCH 95022029 (Fresno Metropolitan Water Resource Management Plan), et al. These conditions include water quality degradation due to DBCP, arsenic, iron, and

manganese concentrations; low water well yields; limited aquifer storage capacity and recharge capacity; and, intensive urban or semi-urban development occurring upgradient from the Fresno Metropolitan Area.

Project

Currently, there is an eight inch water main in East Tulare Street along the frontage of the subject site. If the development creates additional water demands beyond the levels allocated in the version of the City's Urban Water Management Plan it will have to be offset in a manner approved by the Department of Public Utilities.

When development permits are issued, the subject site will be required to pay drainage fees pursuant to the Drainage Fee Ordinance. The project will also be required to provide storm drainage in concurrence with FMFCD staff.

Occupancy of this site will generate wastewater containing human waste, which is required to be conveyed and treated by the Fresno-Clovis Regional Wastewater Treatment and Reclamation Facility. There will not be any onsite wastewater treatment system. This development will be required to abandon any existing on-site private septic systems, install separate sewer house branches and pay connection and sewer facility fees.

In conclusion, with MEIR mitigation measures incorporated, the project will not result in any hydrology and water quality impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
X. LAND USE AND PLANNING - Would the project:				
a) Physically divide an established community?				Х

b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?		X	
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?		X	

The proposed project is consistent with the PI and CMX zone districts and planned land use designations of the subject properties. The proposed project will not divide an established community or conflict with any conservation plans since it is not located within any conservation plan areas. No habitat conservation plans or natural community conservation plans in the region pertain to the natural resources that exist on the subject site or in its immediate vicinity. Therefore, there would be no impacts.

In conclusion, the proposed project would not result in any land use and planning environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XI. MINERAL RESOURCES Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				Х
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				Х

The subject site is not located in an area designated for mineral resource preservation or recovery, therefore, will not result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state. The subject site is not delineated on a local general plan, specific plan or other land use plan as a locally-important mineral resource recovery site; therefore it will not result in the loss of availability of a locally-important mineral resource.

In conclusion, the proposed project would not result in any mineral resource environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XII. NOISE Would the project result in:				
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			X	
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?			X	
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				Х
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?				Х
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose				

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
people residing or working in the project area to excessive noise levels?				Х
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?				Х

Generally, the three primary sources of substantial noise that affect the City of Fresno and its residents are all transportation-related and consist of local streets and regional highways; airport operations at the Fresno Yosemite International, the Fresno-Chandler Downtown, and the Sierra Sky Park Airports; and railroad operations along the BNSF Railway and the Union Pacific Railroad lines.

Potential noise sources at the project site would be roadway noise from the major street west of the subject site.

Short Tern Noise Impacts

The construction of a project involves both short-term, construction related noise, and long term noise potentially generated by increases in area traffic, nearby stationary sources, or other transportation sources. The Fresno Municipal Code (FMC) allows for construction noise in excess of standards if it complies with the section below (Chapter 10, Article 1, Section 10-109 – Exemptions). It states that the provisions of Article 1 – Noise Regulations of the FMC shall not apply to:

Construction, repair or remodeling work accomplished pursuant to a building, electrical, plumbing, mechanical, or other construction permit issued by the city or other governmental agency, or to site preparation and grading, provided such work takes place between the hours of 7:00 a.m. and 10:00 p.m. on any day except Sunday.

Thus, construction activity would be exempt from City of Fresno noise regulations, as long as such activity is conducted pursuant to an applicable construction permit and occurs between 7:00 a.m. and 10:00 p.m., excluding Sunday. Therefore, short-term construction impacts associated with the exposure of persons to or the generation of noise levels in excess of standards established in the general plan or noise ordinance or applicable standards of other agencies would be less than significant.

Long Term Noise Impacts

The project area is currently served by bus routes that would be replaced by the proposed project. Although the proposed BRT route would occur more frequently (with 10- to 15-minute headways compared to the existing 20-minute headways). Additional features associated with the project, such as queue jump and signal timing would reduce the overall amount of acceleration associated with bus and other traffic on the roadways. Therefore, the proposed project would not substantially increase the amount of traffic on the affected roadways, and would therefore not cause a substantial increase in traffic noise.

The proposed project is not located within an airport land use plan or within the vicinity of a private airstrip.

In conclusion, the proposed project would not result in any noise environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XIII. POPULATION AND HOUSING Would the project:				
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			X	
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				Х
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				Х

The subject site and surrounding properties are designated for residential and mixed use planned land uses. The development will occur at an intensity and scale that is permitted by the existing zone district. Thus, the development of the subject site is

allowed under the existing zone district designation and will not facilitate an additional intensification of uses beyond that which would be allowed.

There are no existing residences on the subject site; therefore the proposed project does not have the potential to displace existing housing or residents and will not either directly or indirectly induce substantial population growth in the area.

In conclusion, the proposed project would not result in any population and housing environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XIV. PUBLIC SERVICES				
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered				
governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?			X	
Police protection?			X	
Drainage and flood control?			Х	
Parks?			X	
Schools?			X	
Other public services?			X	

City police services are also available to serve the proposed project. City Fire Station No. 15 is located southwest of the subject site, less than 1.25 miles from the subject site. The subject site is proposed as a police substation; therefore, police services will be available for the surrounding area.

The proposed development is within the boundaries of the Fresno Metropolitan Flood Control District (FMFCD). Prior to entitlement submittal, the applicant shall meet with the FMFCD staff to discuss drainage options.

The demand for parks generated by the project is within planned services levels of the City of Fresno Parks and Community Services Department and the applicant will pay any required impact fees at the time building permits are obtained.

Any future development occurring as a result of the proposed project may have an effect on the school district's student housing capacity. The school district, through local funding, is in a position to mitigate its shortage of classrooms to accommodate planned population growth for the foreseeable future. However, the school district recognizes that the legislature, as a matter of law, has deemed under Government Code Section 65996, that all school facilities impacts are mitigated as a consequence of SB 50 Level 1, 2 and 3 developer fee legislative provisions. The developer will pay appropriate impact fees at time of building permits.

Currently, there is an eight inch water main in East Tulare Street along the frontage of the subject site. If the development creates additional water demands beyond the levels allocated in the version of the City's Urban Water Management Plan it will have to be offset in a manner approved by the Department of Public Utilities. There is a 15-foot Sewer Easement located on the West side of both parcels with a 10-inch sewer main. Buildings must stay clear of the easement and no trees shall be located eight-feet from the easement. There is proposed 12" sewer main including easement that will run perpendicular to the parcel within the northern 20 feet of parcel 313-021-02T. Buildings must stay clear of the easement and no trees shall be located eight-feet from the easement. There is also a proposed 12" sewer main including easement that will run perpendicular to the parcel within the southern 20 feet of parcel 313-021-03T. Buildings must stay clear of the easement and no trees shall be located eight-feet from the easement.

In conclusion, with MEIR mitigation measures incorporated, the project will not result in any public service impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XV. RECREATION				
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?			X	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X

The proposed project will not result in the physical deterioration of existing parks or recreational facilities; and, will not require expansion of existing recreational facilities or affect recreational services beyond what was analyzed in the MEIR for the Fresno General Plan.

In conclusion, the proposed project would not result in any recreation environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVI. TRANSPORTATION/TRAFFIC Would the project:				
a) Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass				

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths and mass transit?			X	
b) Conflict with an applicable congestion management program, including but not limited to level of service standards and travel demand measures or other standards established by the county congestion management agency for designated roads or highways?				X
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that result in substantial safety risks?				х
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?				х
e) Result in inadequate emergency access?				X
f) Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?				Х

The subject site is located on the southwest corner of East Tulare Street and South Argyle Avenue. In the Fresno General Plan Circulation Element, East Tulare Street is

designated as a collector street, which has a primary function of connecting local streets and arterials and neighborhood traffic generators and providing access to abutting properties. South Argyle Avenue is designated a local street, which is designed to provide direct access to properties, while discouraging excessive speeds and volumes of motor vehicle travel incompatible with neighborhoods being served through the implementation of multiple, well connected routes and traffic calming measures. The project will be required to construct all necessary street frontage improvements to City Standards.

The subject site is located within Traffic Impact Zone II (TIZ-II). Zone TIZ-II represents areas of the City currently built up and wanting to encourage infill development. Maintain a peak hour level of service (LOS) standard of E or better for all intersections and roadway segments. A traffic impact study is required for all development projected to generate 200 or more peak hour new vehicle trips within Zone TIZ-II. The proposed project is projected to generate 171 vehicle trips during the morning peak hour travel period (7 to 9 a.m.), 54 vehicle trips during the evening peak hour travel period (4 to 6 p.m.) on a weekday, and 1,915 average daily trips. Therefore, the proposed project is not required to prepare a traffic impact study is not required at this time. Further analysis may be required at the time of entitlement submittal.

The developer of this project, in accordance with the Policy MT-2-j of the MEIR SCH No. 2012111015 prepared for the Fresno General Plan adopted by the Fresno City Council on December 18, 2014, will be required to pay impact fees specific to the traffic signalization of the major street intersections. This project shall pay its Traffic Signal Mitigation Impact (TSMI) Fee at the time of building permit based on the trip generation rate(s) as set forth in the latest edition of the ITE Trip Generation Manual.

The project shall pay Fresno Major Street Impact fees which will be determined at time of building permit, and shall also pay into the Regional Transportation Mitigation Impact (RTMI) Fee at such time as the RTMI fee program is approved and applicable.

In conclusion, the proposed project would not result in any transportation/traffic environmental impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVII. UTILITIES AND SERVICE SYSTEMS Would the project:				
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?				Х

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				Х
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				Х
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?				Х
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				Х
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				Х
g) Comply with federal, state, and local statutes and regulations related to solid waste?				Х

Currently, there is an eight inch water main in East Tulare Street along the frontage of the subject site. If the development creates additional water demands beyond the levels allocated in the version of the City's Urban Water Management Plan it will have to

be offset in a manner approved by the Department of Public Utilities. There is a 15-foot Sewer Easement located on the West side of both parcels with a 10-inch sewer main. Buildings must stay clear of the easement and no trees shall be located eight-feet from the easement. There is proposed 12" sewer main including easement that will run perpendicular to the parcel within the northern 20 feet of parcel 313-021-02T. Buildings must stay clear of the easement and no trees shall be located eight-feet from the easement. There is also a proposed 12" sewer main including easement that will run perpendicular to the parcel within the southern 20 feet of parcel 313-021-03T. Buildings must stay clear of the easement and no trees shall be located eight-feet from the easement.

The proposed project is not expected to exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board, and will not result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, or result in the construction of new storm water drainage facilities or expansion of existing facilities. For additional soil impacts, see Section VI – Geology and Soils.

Conditions of approval for the proposed project will include measures for properly storing solid waste on the site to allow for safe trash truck pickup and minimize littering, and for segregating solid waste to maximize recycling to continue the City's compliance with State solid waste diversion laws (Fresno currently has the highest rate of solid waste recycling/landfill diversion among large cities in the United States). Landfill capacity serving the City, at the American Avenue Landfill operated by Fresno County, is adequate for the foreseeable future.

In conclusion, with MEIR mitigation measures incorporated, the project will not result in any utilities and service system impacts beyond those analyzed in MEIR SCH No. 2012111015.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVIII. MANDATORY FINDINGS OF SIGNIFICANCE				
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or				X

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				X
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?				Х

The project is considered to be proposed at a size and scope which is neither a direct or indirect detriment to the quality of the environment through reductions in habitat, populations, or examples of local history (through either individual or cumulative impacts).

The proposed project does not have the potential to degrade the quality of the environment or reduce the habitat of wildlife species and will not threaten plant communities or endanger any floral or faunal species. Furthermore the project has no potential to eliminate important examples of major periods in history.

Therefore, as noted in preceding sections of this Initial Study, there is no evidence in the record to indicate that incremental environmental impacts facilitated by this project would be cumulatively significant. There is also no evidence in the record that the proposed project would have any adverse impacts directly, or indirectly, on human beings.

MEIR Mitigation Measure Monitoring Checklist

MEIR Mitigation Measure Monitoring Checklist for EA No. EA-16-011 July 1, 2016

INCORPORATING MEASURES FROM THE MASTER ENVIRONMENTAL IMPACT REPORT (MEIR) CERTIFIED FOR THE CITY OF FRESNO GENERAL PLAN UPDATE (SCH No. 2012111015)

This mitigation measure monitoring and reporting checklist was prepared pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15097 and Section 21081.6 of the Public Resources Code (PRC). It was certified as part of the Fresno City Council's approval of the MEIR for the Fresno General Plan update (Fresno City Council Resolution 2014-225, adopted December 18, 2014).

Letter designations to the right of each MEIR mitigation measure listed in this Exhibit note how the mitigation measure relates to the environmental assessment of the above-listed project, according to the key found at right and at the bottoms of the following pages:

- A Incorporated into Project
- **B** Mitigated
- C Mitigation in Progress
- D Responsible Agency Contacted
- **E** Part of City-wide Program
- F Not Applicable

The timing of implementing each mitigation measure is identified in in the checklist, as well as identifies the entity responsible for verifying that the mitigation measures applied to a project are performed. Project applicants are responsible for providing evidence that mitigation measures are implemented. As lead agency, the City of Fresno is responsible for verifying that mitigation is performed/completed.

MITIGATION MEASURE	WHEN IMPLEMENTED	COMPLIANCE VERIFIED BY	Α	В	С	D	E	F
Aesthetics:								
AES-1. Lighting systems for street and parking areas shall include shields to direct light to the roadway surfaces and parking areas. Vertical shields on the light fixtures shall also be used to direct light away from adjacent light sensitive land uses such as residences. Verification comments:	Prior to issuance of building permits	Public Works Department (PW) and Development & Resource Management Dept. (DARM)	X					

Aesthetics (continued):

MITIGATION MEASURE	WHEN IMPLEMENTED	COMPLIANCE VERIFIED BY	Α	В	С	D	E	F
AES-2: Lighting systems for public facilities such as active play areas shall provide adequate illumination for the activity; however, low intensity light fixtures and shields shall be used to minimize spillover light onto adjacent properties. Verification comments:	Prior to issuance of building permits	DARM	X					
AES-3: Lighting systems for non-residential uses, not including public facilities, shall provide shields on the light fixtures and orient the lighting system away from adjacent properties. Low intensity light fixtures shall also be used if excessive spillover light onto adjacent properties will occur. Verification comments:	Prior to issuance of building permits	DARM	Х					
AES-4: Lighting systems for freestanding signs shall not exceed 100 foot Lamberts (FT-L) when adjacent to streets which have an average light intensity of less than 2.0 horizontal footcandles and shall not exceed 500 FT-L when adjacent to streets which have an average light intensity of 2.0 horizontal footcandles or greater. Verification comments:	Prior to issuance of building permits	DARM						X

MITIGATION MEASURE	WHEN IMPLEMENTED	COMPLIANCE VERIFIED BY	Α	В	С	D	Е	F
Biological Resources (continued):								
BIO-2 (continued from previous page) may result in the direct or incidental take of a listed species. Specific mitigation measures for direct or incidental impacts to a listed species will be determined on a case-by-case basis through agency consultation. Verification comments:	[see previous page]	[see previous page]						
BIO-3: Development within the Planning Area should avoid, where possible, special-status natural communities and vegetation communities that provide suitable habitat for special-status species. If a proposed project will result in the loss of a special-status natural community or suitable habitat for special-status species, compensatory habitat-based mitigation is required under CEQA and the California Endangered Species Act (CESA). Mitigation will consist of preserving on-site habitat, restoring similar habitat or purchasing off-site credits from an approved mitigation bank. Compensatory mitigation will be determined through consultation with the City and/or resource agencies. An appropriate mitigation strategy and ratio will be agreed upon by the developer and lead agency to reduce project impacts to special-status natural communities to a less than significant (continued on next page)	Prior to development project approval	DARM	X

level. Agreed-upon mitigation ratios will depend on the quality of the habitat and presence/absence of a special-status species. The specific mitigation for project level impacts will be determined on a case-by-case basis.	page]	page]						
Verification comments:								
BIO-4: Proposed projects within the Planning Area should avoid, if possible, construction within the general nesting season of February through August for avian species protected under Fish and Game Code 3500 and the Migratory Bird Treaty Act (MBTA), if it is determined that suitable nesting habitat occurs on a project site. If construction cannot avoid the nesting season, a pre-construction clearance survey must be conducted to determine if any nesting birds or nesting activity is observed on or within 500-feet of a project site. If an active nest is observed during the survey, a biological monitor must be on site to ensure that no proposed project activities would impact the active nest. A suitable buffer will be established around the active nest until the nestlings have fledged and the nest is no longer active. Project activities (continued on next page)	Prior to development project approval and during construction activities	DARM	X

Utilities and Service Systems - Biological Resources (continue	ed):							
(b) During the construction stage, FMFCD shall avoid all burrowing owl nest sites potentially disturbed by project construction during the breeding season while the nest is occupied with adults and/or young. The occupied nest site shall be monitored by a qualified biologist to determine when the nest is no longer used. Avoidance shall include the establishment of a 160-foot diameter non-disturbance buffer zone around the nest site. Disturbance of any nest sites shall only occur outside of the breeding season and when the nests are unoccupied based on monitoring by a qualified biologist. The buffer zone shall be delineated by highly visible temporary construction fencing.	[see previous page]	[see previous page]						
Based on approval by CDFG, pre-construction and pre- breeding season exclusion measures may be implemented to preclude burrowing owl occupation of the project site prior to project-related disturbance. Burrowing owls can be passively excluded from potential nest sites in the construction area, either by closing the burrows or placing one-way doors in the burrows according to current CDFG protocol. Burrows shall be examined not more than 30 days before construction to ensure that no owls have recolonized the area of construction.

YOUR MOST VALUABLE RESOURCE - WATER May 17, 2016

McKencie Contreras Development and Resource Management City of Fresno 2600 Fresno Street, Third Floor Fresno, CA 93721-3604

RE:

Environmental Assessment No. EA-16-011 N/E Kings Canyon Road and Clovis Avenue FID's Fancher No. 6

Dear Ms. Contreras:

The Fresno Irrigation District (FID) has reviewed Environmental Assessment No. EA-16-011 for which the City of Fresno proposes to purchase the property and construct a City of Fresno Police Substation and a Bus Rapid Transit (BRT) facility, APNs: 313-021-02T & 03T. FID has the following comments and conditions:

Area of Concern

- 1. FID's active Fancher No. 6 Canal runs southwesterly, traverses the western portion of the subject property, crosses Tulare Avenue northwest of the subject property and Clovis Avenue approximately 1,400 feet west of the subject property as shown on the attached FID exhibit map, and will be impacted by the future development. Records do not show a recorded easement, however, FID does own an easement and the width is as shown on FID's attached Standard Detail Page No. 10. Should this project include any street and or utility improvements along Tulare Avenue, Clovis Avenue or in the vicinity of the canal, FID requires it review and approve all plans.
- 2. FID requires that, within the limits of the proposed project [and its remainder], the landowner grant an exclusive easement for the land underlying the canal and associated area along the canal required for maintenance pursuant to Water Code Section 22425 and FID policy. FID's District Canal Right-of-Way Requirements sheet is enclosed for your reference. The proposed easement (width) will depend on several factors including: 1) Width of canal, 2) height of canal banks, 3) final alignment of canal, 4) additional space needed where roads/avenues intersect canal, etc.
- 3. FID requires that the Engineer/Land Surveyor use the inside top hinge of the canal to define the edge of FID's right-of-way such that FID has 20-feet at all points along the canal bank. There are no minimum or suggested numbers of survey shots to take but, there must be enough survey points such that the top inside hinge of the canal bank is

G:\Agencies\FresnoCity\Environmental Assessment Review\EA-16-011.doc

McKencie Contreras Re: Environmental Assessment No. EA-16-011

May 17, 2016 Page 2 of 4

properly identified. Before finalizing the Final Maps, the Engineer/Land Surveyor will need to stake both the inside top hinge and the right-of-way/property for FID Staff to field evaluate an adequate width. FID staff must field verify the right-of-way/property boundary and the hinge line edge before signing plans to ensure that there are enough survey points to properly define the canal.

- 4. Typically, for any type of development that impacts a large open canal or is adjacent to one such as the Fancher, FID requires the developer to improve the canal with either concrete lining, encasing the canal in a box culvert, or other approved means to protect the canal's integrity for an urban setting. FID does not have sufficient information to determine what kind of improvements will ultimately be required as part of the development. The engineers working on the project and FID's engineering staff must meet to discuss specific requirements as discussed below. In order to meet the "urban" standards for the canal, FID will require the following minimum conditions:
 - a. Channel Stabilization: The proposed plan does not indicate any improvements to the Canal. If the Developer is not willing to concrete line the Canal or place it underground within a box culvert, they must come up with another means acceptable to and approved by FID to protect the Canal's integrity. On similar projects, Developers typically propose the following:
 - Surrounding Development All proposed earthen building pad elevations (finish grade) must be a minimum of 12-inches above the canal's high water.
 - ii. Freeboard FID typically requires between 1.0 to 1.5 feet of freeboard. Because the Canal is used to route stormwaters, and is one of the larger canals used to convey the stormwater, FID will require a minimum of 1.5 feet of freeboard and a maximum of 2.0 feet. The Developer will be required to either import or export material to match FID's standards.
 - iii. Maintenance this reach of Canal does have a history of high loads of sediment deposits which requires periodic dredging. FID will typically dredge the Canal and deposit the spoils on top of the banks to dry out. Once the spoil has dried, FID will flatten the spoil as time permits. This reach of Canal also has large volumes of trash, debris, shopping carts that are deposited into the Canal. FID's crews will typically remove the trash at the Tulare Avenue bridge and the Clovis Avenue bridge and another crew will come by to remove the trash. The hauling off of this material may occur several weeks after the trash has been placed on the side of the canal, and the trash may be considered a nuisance (sight and smell). If the Developer and/or City require a different level of maintenance effort, they will need to enter into an agreement for that purpose. The City and/or Developer will be responsible to fund the "higher level" of maintenance.

McKencie Contreras Re: Environmental Assessment No. EA-16-011 May 17, 2016 Page 3 of 4

- b. Drive banks/maintenance roads and encroachments (both banks):
 - i. One or both of the drive banks must be sloped a minimum of 2% away from the canal with provisions made for rainfall. Drainage will not be accepted into the Canal and must be routed away from FID property/drive banks. Runoff must be conveyed to nearby public streets or drainage system by drainage swales or other FID acceptable alternatives.
 - ii. One or both of the drive banks shall be overlaid with 3 inches of Class II aggregate base for all-weather access and for dust suppression.
 - iii. Encroachments All existing trees, bushes, debris, fencing, and other structures must be removed within FID's property/easement.
- 5. Canal Access FID will continue to access the Canal from Tulare Avenue and Clovis Avenue. In order to access the maintenance road with our larger equipment, FID requires a drive approach wide enough to accommodate the equipment. FID proposes a 50-foot wide drive approach narrowing to a 20 feet wide drive bank (See attached "Drive Approach in Urban Areas" Detail No. 62). The 50-foot width is defined as starting from the end portion of the bridge/railing outward (away from the bridge). Every road and canal intersection is different and therefore each access will be different. The major factors affecting the proposed width will be the angle of the road intersecting the Canal, grade of canal bank vs. City road, median vs. no median, etc.
- 6. If a fence will be installed between the development and open canal, a block/masonry wall shall be required. Chain-link and wood fencing will no longer be accepted for urban developments.
- 7. This site plan shows a proposed pedestrian and light vehicle bridge across the Fancher Canal. Canal crossings must be at local street crossings. The proposed bridge will not be allowed or approved.

General Comments

- 1. The proposed development may negatively impact local groundwater supplies. The area is currently mostly open land or limited agricultural production with little to no water demand. Under current circumstances the project area is experiencing a modest but continuing groundwater overdraft. Should the proposed development result in a conversion from imported surface water to groundwater, this deficit will increase. FID suggests the City of Fresno require the proposed development balance anticipated groundwater use with sufficient recharge of imported surface water in order to preclude increasing the area's existing groundwater overdraft.
- 2. FID requires the Developer to submit for FID's approval a grading and drainage plan which shows that the proposed development will not endanger the structural integrity of the Canal, or result in drainage patterns that could adversely affect FID.

McKencie Contreras

Re: Environmental Assessment No. EA-16-011

May 17, 2016 Page 4 of 4

- 3. FID requires its review and approval of all improvement plans which affect its property/easements and canal/pipeline facilities including but not limited to Sewer, Water, Fresno Metropolitan Flood Control District (FMFCD), Street, Landscaping, Dry Utilities, and all other utilities.
- 4. FID requires the Developer and or the Developer's engineer contact FID at their earliest convenience to discuss specific requirements.
- 5. FID requires its easements be shown on all maps with proper recording information, and that FID be made a party to signing the final map.
- 6. Footings of retaining walls shall not encroach onto FID property/easement areas.
- 8. The above comments are not to be construed as the only requests FID will have regarding this project. FID will make additional comments and requests as necessary as the project progresses and more detail becomes available.

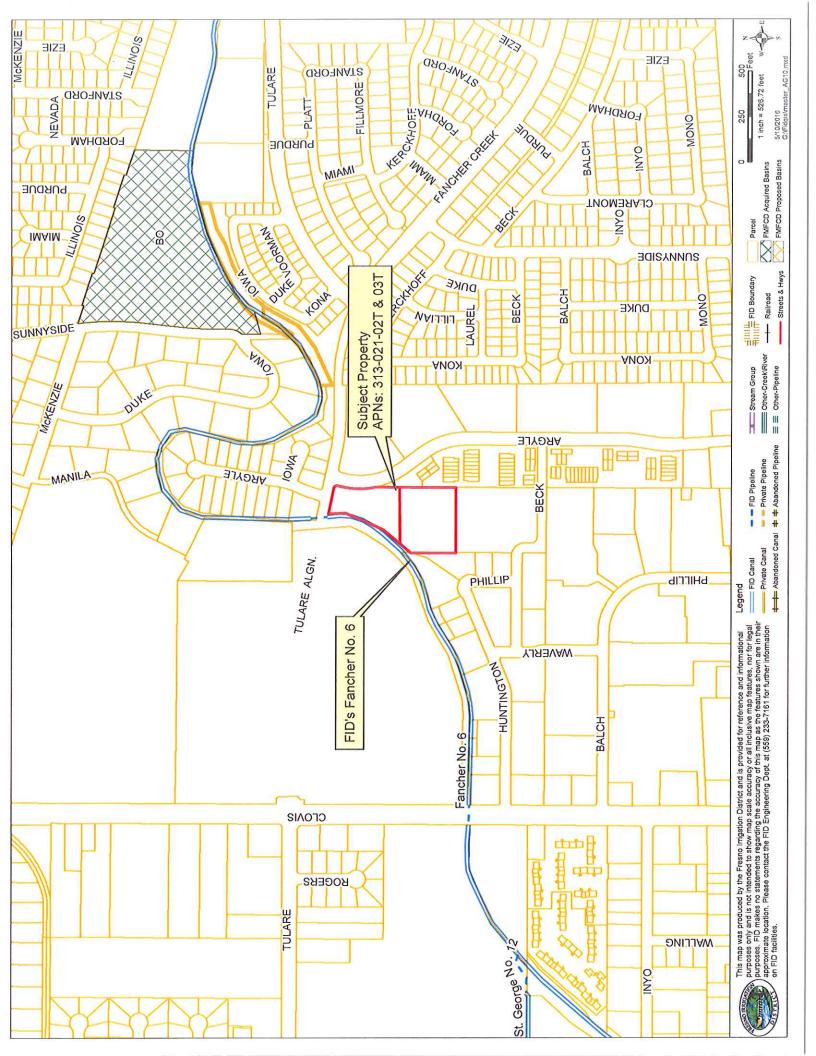

Thank you for submitting the proposed project for our review. We appreciate the opportunity to review and comment on the subject documents for this project. If you have any questions please feel free to contact Chris Lundeen at (559) 233-7161 extension 7410 or clundeen@fresnoirrigation.com.

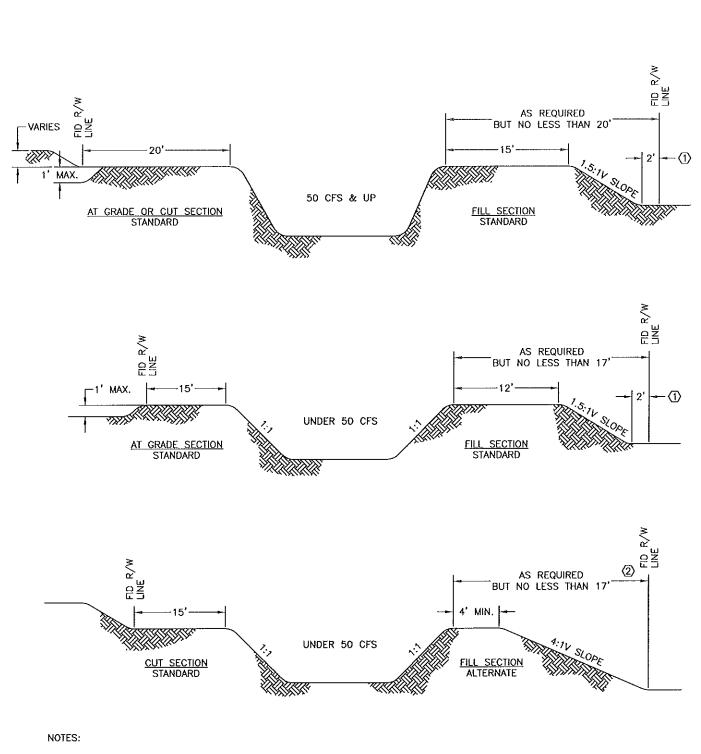

Sincerely,

Laurence Kimura, P.E.

Chief Engineer

McKencie Contreras Development & Resource Management 2600 Fresno Street, Third Floor Fresno, CA 93721-3604

Dear Ms. Contreras:

PROJECT NUMBER: EA-16-011

Environmental Assessment No. EA-16-011 was filed by the City of Fresno and pertains to \pm 4.15 acres of property located on the southwest corner of East Tulare Avenue and South Argyle Avenue by the City of Fresno from the Fresno County Housing Authority. The City of Fresno proposes to purchase the property and construct a City of Fresno Police Substation and a Bus Rapid Transit (BRT) Facility. The Police substation will include a \pm 15,000 square foot building with parking facilities and a \pm 10,000 square foot ancillary service building for vehicle maintenance. The BRT Facility will be developed in accordance with adopted BRT specifications and will be located on the northern portion of the property. The BRT station includes a 29 foot shelter, benches, bike racks, information booth, and a station platform with related equipment. Entitlements for the proposed development will be submitted at a later date. The property is zoned PI (*Public and Institutional*) and CMX (*Corridor/Center Mixed-Use*).

APN: 313-021-02T & 03T ZONING: PI & CMX

Recommended Conditions of Approval:

- Facilities proposing to use and/or store hazardous materials and/or hazardous wastes shall meet the
 requirements set forth in the California Health and Safety Code (HSC), Division 20, Chapter 6.95, and
 the California Code of Regulations (CCR), Title 22, Division 4.5. Any business that handles a
 hazardous material or hazardous waste may be required to submit a Hazardous Materials Business
 Plan pursuant to the HSC, Division 20, Chapter 6.95 (http://cers.calepa.ca.gov/ or
 https://www.fresnocupa.com/). Contact the Certified Unified Program Agency at (559) 600-3271 for
 more information.
- The proposed project has the potential to expose nearby residents to elevated noise levels. Consideration should be given to your City's municipal code.
- As a measure to protect ground water, all water wells and/or septic systems that exist or have been abandoned within the project area should be properly destroyed by an appropriately licensed contractor.

Prior to destruction of agricultural wells, a sample of the upper most fluid in the water well column should be sampled for lubricating oil. The presence of oil staining around the water well may indicate the use of lubricating oil to maintain the well pump. Should lubricating oil be found in the well, the oil should be removed from the well prior to

Promotion, preservation and protection of the community's health

McKencie Contreras May 6, 2016 EA-16-011 Page 2 of 2

placement of fill material for destruction. The "oily water" removed from the well must be handled in accordance with federal, state and local government requirements.

• Should any underground storage tank(s) be found during the project, the applicant shall apply for and secure an Underground Storage Tank Removal Permit from the Fresno County Department of Public Health, Environmental Health Division. Contact the Certified Unified Program Agency at (559) 600-3271 for more information.

FRESNO METROPOLITAN FLOOD CONTROL DISTRICT

File 310. "BO" 550.10 "BO"

June 9, 2016

Ms. McKencie Contreras, Supervising Planner Development Services/Planning Division Development and Resource Management 2600 Fresno Street, Third Floor Fresno, CA 93721-3604

Dear Ms. Contreras,

FMFCD Comments and Conditions of Approval Environmental Assessment Review EA-16-011 APN 313-021-02T and 03T Drainage Area "BO"

The proposed project lies within the District's Drainage Area "BO". The Fresno Metropolitan Flood Control District (District) bears responsibility for storm water management within the Fresno-Clovis metropolitan area, including the area of the project site. Within the metropolitan area, storm runoff produced by land development is to be controlled through a system of pipelines and storm drainage retention basins. The community has developed and adopted a Storm Drainage and Flood Control Master Plan. Each property is required to contribute its prorata share to the cost of the public drainage system. It is this form of participation in the cost and/or construction of the drainage system that will mitigate the impact of development. The subject property shall pay drainage fees pursuant to the Drainage Fee Ordinance prior to approval of the final map and/or issuance of a building permit at the rates in effect at the time of such approval. The preliminary drainage fee for the proposed site is \$31,561.

The District is in the process of re-Master Planning the area west of this site. Permanent drainage service is not available for the site at this time. The District recommends the developer of the City of Fresno Police Substation and Bus Rapid Transit Facility contact the District prior to finalizing the site design for storm drainage options. An existing storm drainage facility will require an easement dedication to be completed at the location shown per attached Exhibit "B".

The District's existing Master Plan drainage system is designed to serve the proposed land use for this location.

The proposed development does not appear to be located within a special flood hazard area as designated on the latest Flood Insurance Rate Map available to the District.

Ms. McKencie Contreras EIR for APN 313-021-02T and 03T June 9, 2016 Page 2

In an effort to improve storm runoff quality, outdoor storage areas shall be constructed and maintained such that material that may generate contaminants will be prevented from contact with rainfall and runoff and thereby prevent the conveyance of contaminants in runoff into the storm drain system.

The District encourages, but does not require that roof drains from non-residential development be constructed such that they are directed onto and through a landscaped grassy swale area to filter out pollutants from roof runoff.

Thank you for the opportunity to provide these preliminary comments. The District may provide further requirements when the proposed development is processed through the City of Fresno entitlement process. If you should have any questions or comments, please contact the District at (559) 456-3292.

Very truly yours,

Mark Will

Engineer III, R.C.E.

Project: Environmental Assessment No. EA-16-011 – Police Station

District CEQA Reference No: 20160280

Dear Ms. Contreras:

The San Joaquin Valley Unified Air Pollution Control District (District) has reviewed the project referenced above consisting of construction of a 15,000sf Police Substation and 10,000sf service building for vehicle maintenance, located at East Tulare Avenue and South Argyle Avenue, in Fresno, CA. The District offers the following comments:

- 1. Based on information provided to the District, project specific emissions of criteria pollutants are not expected to exceed District significance thresholds of 10 tons/year NOX, 10 ton/year ROG, and 15 tons/year PM10. Therefore, the District concludes that project specific criteria pollutant emissions would have no significant adverse impact on air quality.
- 2. Based on information provided to the District, the proposed project would equal or exceed 10,000 square feet of government space. Therefore, the District concludes that the proposed project is subject to District Rule 9510 (Indirect Source Review).
 - District Rule 9510 is intended to mitigate a project's impact on air quality through project design elements or by payment of applicable off-site mitigation fees.
 - Any applicant subject to District Rule 9510 is required to submit an AIA application to the District no later than applying for final discretionary approval, and to pay any applicable off-site mitigation fees.
 - If approval of the subject project constitutes the last discretionary approval by your agency, the District recommends that demonstration of compliance with District Rule 9510 be made a condition of project approval. Information about

Seyed Sadredin Executive Director/Air Pollution Control Officer

Northern Region 4800 Enterprise Way Modesto, CA 95356-8718 Tel: (209) 557-6400 FAX: (209) 557-6475

Southern Region 34946 Flyaver Court Bakersfield, CA 93308-9725 Tel: 661-392-5500 FAX: 661-392-5585 how to comply with District Rule 9510 can be found online at: http://www.valleyair.org/ISR/ISRHome.htm.

- 3. The proposed project may be subject to District Rules and Regulations, including: Regulation VIII (Fugitive PM10 Prohibitions), Rule 4102 (Nuisance), Rule 4601 (Architectural Coatings), and Rule 4641 (Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations). In the event an existing building will be renovated, partially demolished or removed, the project may be subject to District Rule 4002 (National Emission Standards for Hazardous Air Pollutants). The above list of rules is neither exhaustive nor exclusive. To identify other District rules or regulations that apply to this project or to obtain information about District permit requirements, the applicant is strongly encouraged to contact the District's Small Business Assistance Office at (559) 230-5888. Current District rules can be found online at: www.valleyair.org/rules/1ruleslist.htm.
- 4. The District recommends that a copy of the District's comments be provided to the project proponent.

If you have any questions or require further information, please call Eric McLaughlin, at (559) 230-5808.

Sincerely,

Arnaud Marjollet

Subject: RE: Request for Comment - Environmental Assessment No. EA-16-011, Police Substation

& BRT Facility

McKencie,

1. The property in question is located in the Bakman Water District. Therefore no comment in regards to water.

- 2. There is a 15-foot Sewer Easement located on the West side of both parcels with a 10-inch sewer main. Buildings must stay clear of the easement and no trees shall be located 8-feet from the easement.
- 3. There is proposed 12" sewer main including easement that will run perpendicular to the parcel within the northern 20 feet of parcel 313-021-02T. Buildings must stay clear of the easement and no trees shall be located 8-feet from the easement.
- 4. There is proposed 12" sewer main including easement that will running perpendicular to the parcel within the southern 20 feet of parcel 313-021-03T. Buildings must stay clear of the easement and no trees shall be located 8-feet from the easement.

These are a few of the big ticket items and will get you to a site plan for official conditions.

Sorry for the hold up.
