Each bidder has agreed to allow the City sixty-four (64) days from date bids are opened to accept or reject their bid proposal. Purchasing requests that you complete the following sections and return this bid evaluation to the Purchasing Division at the latest by Wednesday, May 12, 2016, 5:00 P.M.

The Engineer's Estimate for this expenditure is \$200,000. The contract price is 1.1% above the Engineer's Estimate.

BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

The City of Fresno Department of Public Utilities, Wastewater Management Division through the Collection System Maintenance work group is responsible for maintaining the City's Sewer Infrastructure consisting of over 15 lift stations. The purpose of these lift stations is to pump wastewater from areas of lower elevation to sewer mains at higher elevations. The current size of the lift station and driveway is inadequate in size for the collections work trucks. Maneuvering the equipment in limited space poses a safety risk for City employees. Safety concerns arose when an accident occurred involving a collections work truck. A passing car side swiped the work truck, ripping off the driver's side door when a City worker was exiting the truck cab. Rehabilitation of this lift station will improve accessibility and safety for City employees as they perform maintenance duties.
