The Engineer's Estimate for this expenditure is \$ 7,173,600. The contract price is 12.2% below the Engineer's Estimate.

BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

The Department of Public Utilities staff have identified 6-inch, 8-inch and 10-inch diameter water mains within the area bound by West Clinton Avenue, West University Avenue, North West Avenue, and North Teilman Avenue. The current facilities may be prone to unexpected failures due to inferior steel water mains installed as early as 1934 that have outlived their life expectancy. The scope of work includes replacement of approximately 7,845 linear feet of 6-inch and 8-inch water mains and approximately 3,255 linear feet of 10-inch water mains with 8,199 linear feet of 8-inch polyvinyl chloride and ductile iron water mains and 3,476 linear feet of 16-inch ductile iron water mains as well as the transfer of approximately 232 water services. The Project will bring water facilities to current standards and will provide more reliable water services and fire protection for constituents. The scope of work also includes trenching, excavation, pavement restoration, reconstruction of existing improvements affected by the Project, and incidentals for complete construction. Funding for this Project is included in the Fiscal Year 2025 Capital Improvement Budget within the Water Enterprise Fund.
