Comment:

on March 4, 2015 W. M. Lyles submitted a letter from KNK Painting and Coating, Inc. seeking relief from their bid to provide painting and coating subcontract work for the Tertiary Treatment and Disinfection Facility Project. KNK Painting and Coating Inc. has lost its project manager due to prolonged illness and was unable to staff the project with its remaining qualified individuals due to the long distance from the company office to the project job site.

A call was placed to KNK Painting and Coating on 8:45 AM on March 10, 2015 to determine the validity of the request. The company President, Charles Price, confirmed that KNK Painting and Coating did refuse to sign a subcontract agreement for the reasons listed above. Mr. Price also confirmed that he did not expect to be able to perform the work within the contract time period and consented to have W.M. Lyles substitute another firm to perform the work Mr. Price also confirmed that the company waived its right to file an objection within the 5 day period as allowed by Public Contract Code Section 4100 et seq.

Mr. Charles Price is listed as the Responsible Managing Officer for the company on the California State Department of Consumer Affairs Contractor Registry. Mr. Price confirmed that the decision by KNK Painting and Coating Inc., to not enter into a subcontract agreement was not coerced and that he had the authority to make that decision for the company.

Action Required:

No further action is required by KNK Painting and Coating. Carollo Engineers confirms that the substitution request to replace KNK Painting and Coating Inc., with F.D. Thomas Inc., meets the requirements set forth in Public Contract Code Section 4107.
