Dear Property Owners and Ratepayers:

The City of Fresno Department of Public Utilities operates and maintains surface water treatment facilities, groundwater recharge facilities, groundwater pumping facilities, water storage reservoirs, and water distribution pipelines, valves, fire hydrants, and water meters. The Department of Public Utilities is responsible for purchasing, treating, and delivering an average of 123 million gallons of water per day (MGD) to approximately 100,000 accounts at single-family residential, multi-family residential, commercial, institutional, and industrial sites.

In accordance with Article 13D, Section 6 of the California Constitution, the City of Fresno is providing this written notification to owners of record and customers of record at parcels that receive and/or pay for public water service provided by the City. Specifically, this written notification describes proposed changes to the schedule of rates, fees, and charges that will be assessed in order to provide a safe, clean, and reliable water supply. The City of Fresno will conduct a public hearing on the proposed changes to the schedule of rates, fees, and charges for public water service on February 5, 2015, beginning at 5:00 P.M. at Fresno City Hall. At the public hearing, the Fresno City Council will consider all protests against the proposed changes. If on or before the close of the public hearing on February 5, 2015, written protests against the proposed changes are presented by a majority of parcels that receive public water service, the Fresno City Council will not enact the proposed rate plan. If less than a majority of parcels requesting public water services protest the proposed changes, the proposed rate plan will become effective thirty days after the changes are enacted by the Fresno City Council. Fresno City Hall is located at 2600 Fresno Street, Fresno, CA 93721.
