Each bidder has agreed to allow the City sixty-four (64) days from date bids are opened to accept or reject their bid proposal. Purchasing requests that you complete the following sections and return this bid evaluation to the Purchasing Division at the latest by Wednesday, April 22, 2015, 5:00 P.M.

The Engineer's Estimate for this expenditure is \$ 824,000.00 . The contract price is 17% below the Engineer's Estimate. If the overage is greater than 10% or only one bid was received, give explanation:

**BACKGROUND OF PROJECT** (To be completed by Evaluating Department/  
Division. Explain need for project/equipment):

The signalized intersections along Tulare Avenue from "C" to Clovis Avenue operate independently without synchronization that contributes to congestion and higher emissions during peak hours. The Tulare Avenue Wireless I.T.S. Project will construct wireless communication system, install 2070L controllers, and advance networking technologies to synchronize the corridor. This will increase mobility and overall drive quality while reducing fuel consumption and greenhouse gas emissions.
