## 7. FINDINGS & STAFF RECOMMENDATIONS

## Findings and Statement of Overriding Considerations

- The project meets the objectives established by the City;
- The project would enhance **livability and social diversity** within the Tower District by supporting mixed-use infill, reinvestment in aging infrastructure, and new housing opportunities at varied affordability levels. This would improve neighborhood vitality and help meet the City's housing goals while maintaining the area's historic character.
- The project would encourage small business development, cultural programming, and entertainment uses that strengthen the Tower District's role as a local and regional destination. These activities would generate employment, expand the local tax base, and reinforce the district's identity as Fresno's historic arts and cultural hub.
- 4. The project would support **walkability, bicycle and transit** connectivity, and multimodal street design consistent with the Fresno General Plan and Active Transportation Plan. By promoting sustainable infill growth, energy efficiency, and reduced vehicle trips, the project would contribute to sustainability and climate-adaptation goals citywide.
- The project is consistent with and would contribute to achieving the policies, goals, and objectives established by the City of Fresno **General Plan**.
