*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

Located on the southwest side of Van Ness Avenue at the corner of Inyo Street, this parking garage features a dynamic, Expressionistic design. Accessed via two multi-level spiral ramps, the garage rises seven stories and has a rectangular plan and flat roof. The walls of the spiral ramps are faced with small square blocks of smooth concrete. Contrasting with the design of the spiral access ramps, the body of the garage consists of a steel post-and-beam structure, with vertical slats screening upper stories. The parking garage extends toward the Fulton Mall to the southwest. The mall-facing elevation displays a row of commercial storefronts. Alterations include some non-original doors in the tower section of the garage. In good condition, the parking structure exhibits a good level of integrity.

BUILDING, STRUCTURE, AND OBJECT RECORD

Page 2 of 3

*NHRP Status Code 3CS, 5S3

*Resource Name or #: 801 Van Ness Avenue

- B1. **Historic Name:** Inyo-Van Ness Parking Structure
- B2. **Common Name:** Spiral Parking Garage
- B3. **Original Use:** Parking Structure
- B4. **Present Use:** Parking Structure
- *B5. **Architectural Style:** Mid-Century Modern (Expressionistic)
- *B6. **Construction History:** (Construction date, alterations, and date of alterations):

According to the original building permit, the parking garage at 801 Van Ness was constructed in 1968 at a cost of \$3,018,118. Alterations to the parking structure appear limited to the replacement of doors in the tower section of the garage. Building permits did not document any further major alterations to the parking structure.

- *B7. **Moved?** No Yes Unknown **Date:** _____ **Original Location:** _____
- *B8. **Related Features:** None.

- B9a. **Architect:** Walter Wagner & J. Martin Temple Architects
- B9b. **Builder:** Harris-Stephens Co.
- *B10. **Significance: Theme** Mid-20th Century Commercial **Area** Downtown Fresno
- Period of Significance:** 1968 **Property Type:** Parking Structure
- Applicable Criteria:** CRHR: 2, 3; City of Fresno: ii, iii.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity)

801 Van Ness Avenue is significant under Criterion 2,3/ii, iii as a unique example of a parking structure featuring a multi-story spiral design and as a representative work of noted local architects Walter Wagner and J. Martin Temple. A 1934 graduate of the University of California, Berkeley, Wagner, along with his associates, contributed several buildings to postwar revitalization efforts in the downtown area, including the Fresno Police Headquarters and the Fresno County Courthouse, which was completed in 1966. Temple, a native of Arizona, also attended the University of California, Berkeley. Upon his graduation in 1958, Temple joined the firm of William Wagner & Partners; in 1966, Temple became a partner and the firm became Walter Wagner-Martin Temple, Architects, Engineers, and Planners. In 1967, then-mayor Floyd H. Hyde appointed Temple to the city's first architectural review committee. The spiral parking garage at 801 Van Ness Avenue, which is one of two architect-designed garages in downtown, reflects the ideas expressed in Victor Gruen's General Plan emphasizing the need for the strategic placement of structured parking facilities to accommodate downtown shoppers. The parking structure is in good condition and retains a good level of integrity.

801 Van Ness Avenue does not meet National Register Criterion Consideration G of "exceptional importance" required for properties that are less than fifty years old, and therefore it does not appear eligible for listing in the National Register of Historic Places.
