
TRANSFORM FRESNO

QUARTERLY COMMUNITY MEETING

TRANSFORM FRESNO

- We received \$66.5 M in State funding
- Matched with \$122 M in Local funding
- 24 different projects
- Centered around Environmental and Economic solutions

Transform Fresno Project Area

PROJECT #1 - MONARCH @ CHINATOWN

- Construction to be complete August 2022

4 Story Building
with 56 Housing Units

PROJECT #2 – SOLAR AND WEATHERIZATION

FREE SOLAR FOR YOUR HOME

Provides up to a 6kWatts system for the home. The solar system and installation is 100% free. Homeowner will own the system free and clear. A limited amount of systems are available.

Eligibility Requirements

- Home must be owner-occupied and up-to-date on property taxes.
- Home must qualify for weatherization or have been weatherized within the last two years.
- Home must be located within the Transform Fresno project area (parts of 93706).
- Household must have an income of 60% or less of the California Median Income.
- Home must have a good composition roof (at least 10-15 years of life left).
- Roof must be unshaded and facing in the right direction (typically south or southwest or west).
- Electrical panel needs to be able to handle the Solar PV.
- All attachments, improvements, and additions to the home must be legally permitted.

Applications are available at Fresno EOC Street Saints
Sunset Community Center: 1345 West Eden Ave., Fresno, CA 93706
or online at www.FresnoEOC.org/energy/solar

For more information, please call (559) 513-1182

TRANSFORM FRESNO
This project has been made possible by financing from California Climate Investments (funded through the Greenhouse Gas Reduction Fund) Transformative Climate Communities Program through the Strategic Growth Council.

- To date:
 - 19 homes
 - 44 weatherization installations
 - 68 applications approved

FREE Weatherization FOR YOUR HOME

Weatherization includes the installation of energy conservation measures and provides energy education to help make your home safer and more comfortable.

Weatherization Measures Could Include:

- Weather-stripping doors and caulking windows
- Testing, repairing, or replacement* of refrigerators, water heaters, heating and/or cooling systems, and cooking appliance
- Installing ceiling fans and/or insulation
- Installing low-flow shower heads
- Replacing interior and exterior lights
- Smart or programmable thermostats

These changes help to increase the comfort of your home while saving you money. Without weatherization, homes waste energy, making heating/cooling units work harder to keep your home at a constant temperature, resulting in increased utility costs.

* Measures eligibility will vary on conditions of the home.

Applications are available at Fresno EOC Street Saints
Sunset Community Center: 1345 West Eden Ave., Fresno, CA 93706
or online at www.FresnoEOC.org/energy/solar

CALIFORNIA

**BIKE
SAFE**
FRESNO

PROJECT #6 – CHINATOWN URBAN GREENING

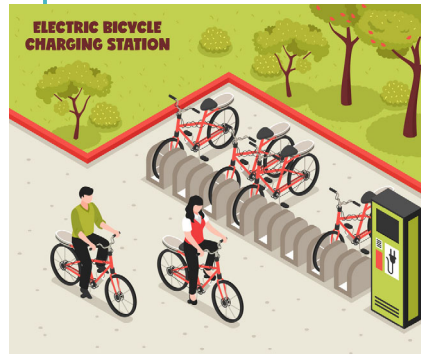

- Urban greening improvements to Chinatown
- Installing trees, lighting, permeable paving

PROJECT #7 – CLEAN SHARED MOBILITY

- Low Carbon transit system:
 - 34 Electric Cars
 - 8 Vanpool Vans
 - 200 Electric Bikes
 - Medical transport (non-emergency)
- Electric Vehicle Infrastructure Charging systems

EV Bicycles

EV Cars

Medical Transport

Van Pool

PROJECT #8 – ANNADALE MODE SHIFT

- 14,070 sq feet of sidewalk
- 1,196 linear feet of Class II bike lanes
- Signage for existing Class II bike lane

PROJECT #9 – MARIPOSA PLAZA

- Trees and landscaping
- Permeable paving
- Rainwater capture
- Local Art Work
- Canopies
- Public Pavilion
- Construction planned for April 2022

PROJECT #11 – SOUTHWEST URBAN FOREST EXPANSION

295 Trees Planted

- Sidewalks
- Street Medians
- Park Strips
- Parks

Jensen Ave. & Fruit Ave. -150 Trees

PROJECT #12 – YO'VILLE COMMUNITY GARDEN

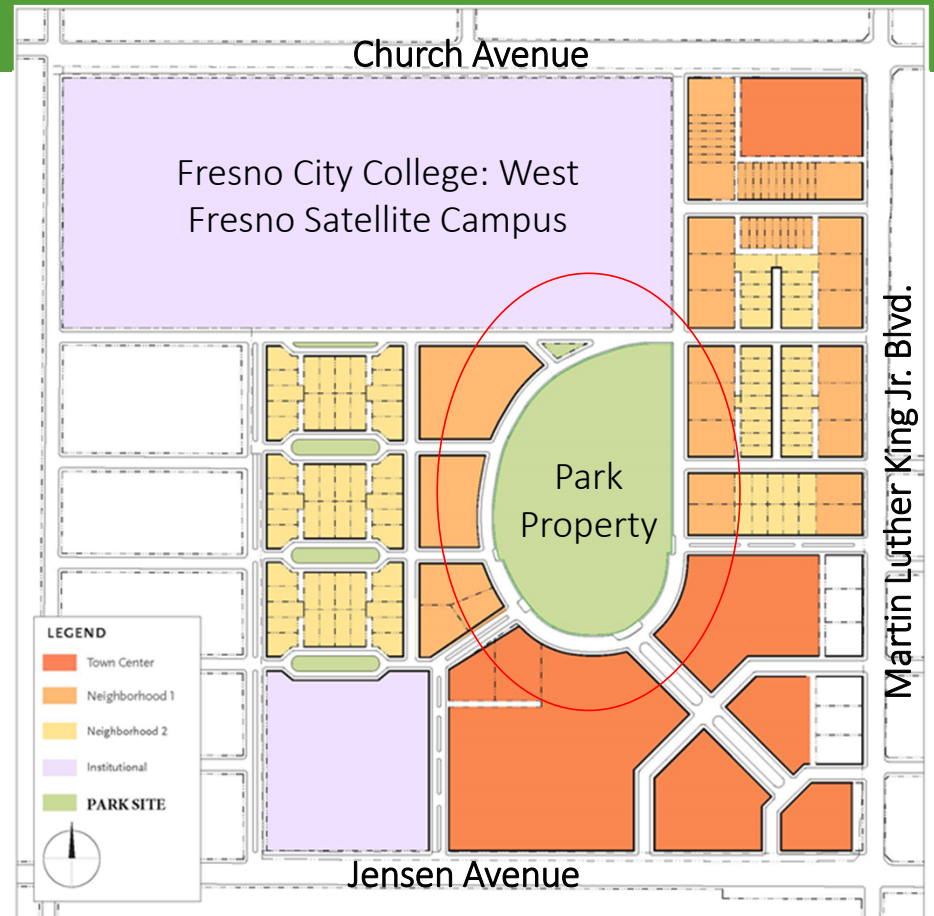

- 7 acres of empty land
- Community members help take care of it
- Incorporate cooking demos
- Permaculture technique

PROJECT #13 – PARK AT MLK MAGNET CORE

Park Features:

- 100 trees, low water use planting, irrigation, restrooms, walking path, site furnishings and LED lighting

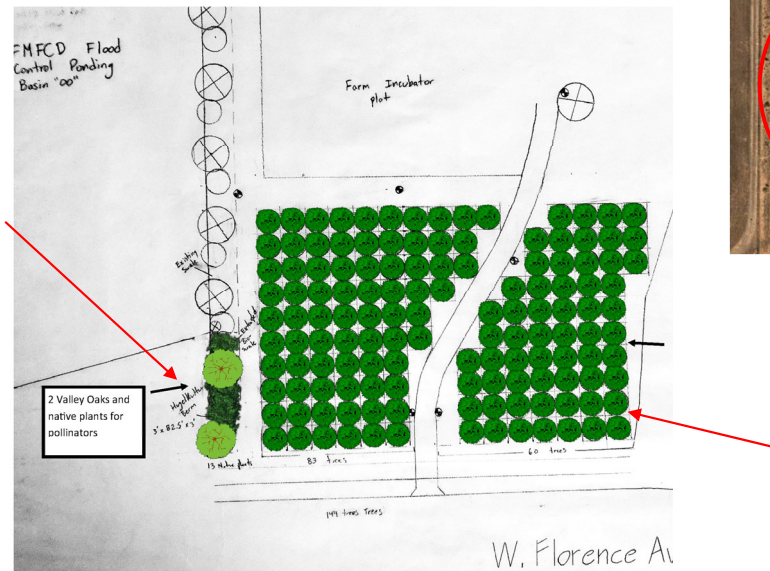

PROJECT #14 – INSIDE OUT COMMUNITY GARDEN

PROJECT #15 – YO'VILLE COMMUNITY ORCHARD

Site will host:

- 120 citrus, stone fruit and nut trees
- Bioswales utilizing hügelkultur methods

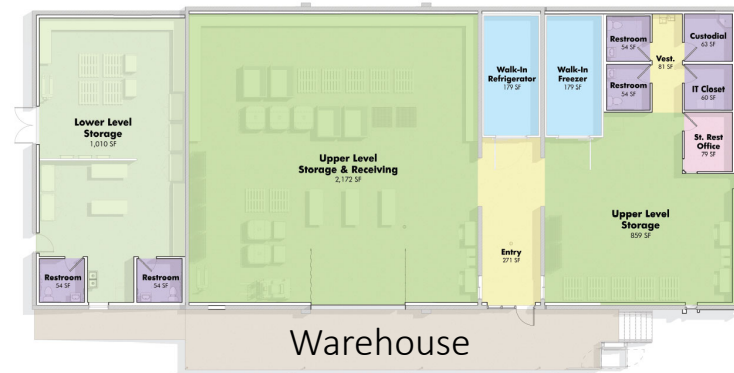

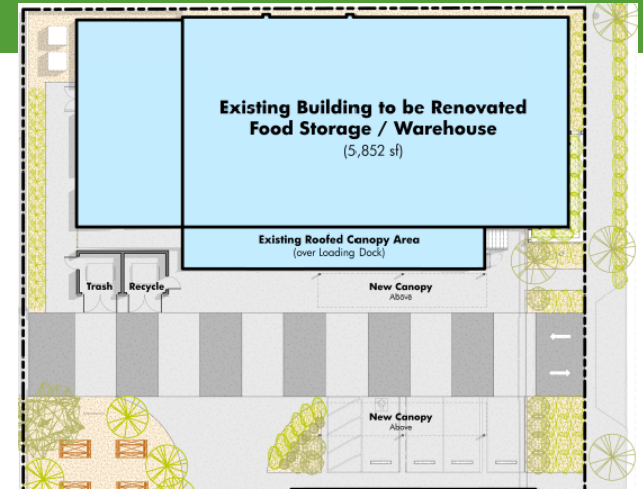

PROJECTS #16 & #17 – ST. REST + FOOD TO SHARE HUB

- Construct hardscapes, landscapes, trees, irrigation and drainage
- Warehouse Distribution Center

Campus Rendering

Warehouse

PROJECT #18 – FCC WEST FRESNO CAMPUS

Construction Site

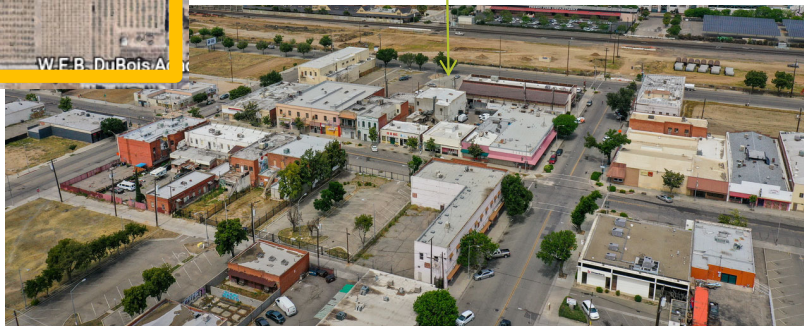

- 1 mile of bicycle and pedestrian pathways
- Over 450 trees and drought resistant plants
- Pathway lighting

Campus will open
to students
Spring 2023

LEVERAGE ONLY PROJECTS

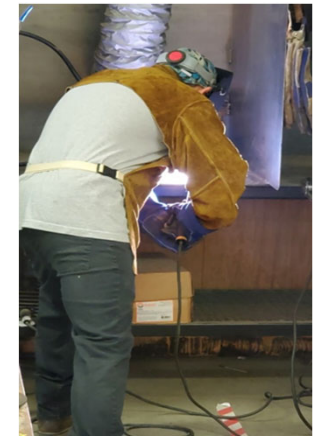

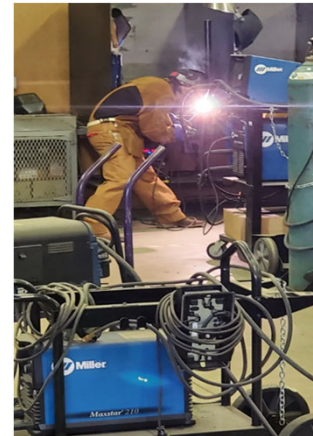

- Electric Buses and added routes
- Off-site improvements
- Plus-Up Electric Vehicle
- Chinatown PBID

WORKFORCE – WELDING PROGRAM

- 108 people trained
- Services include:
 - Supportive intake
 - Mentorship
 - Case management
 - Training and Instruction
 - Skills lab
 - Trainee placement

TRANSFORMATIVE PLANS

Community Engagement Plan

- Prime Community Partner
- Media and Communications
- Direct Outreach
- Event Coordination
- Leadership Development
- Data and Reporting

Displacement Avoidance Plan

- Data, research and policy to prevent displacement
- Educational workshops and presentations for:
 - First time homebuyers
 - Business development

TRANSFORMATION

- Investment of \$188 M into the Community
- Improve Public Health and Environmental Benefits
 - Reduction of Green House Gas Emissions
- Expand Economic Opportunities and Shared Prosperity
 - Improvement of access to training
 - Creation of high quality jobs for residents
 - Development of Local Businesses

Spark future investment in the area and improve the health of our community.

THANK YOU
