BACKGROUND OF PROJECT:

The City of Fresno Department of Public Utilities, Wastewater Management Division through the Collection System Maintenance workgroup is responsible for maintaining the City's sewer infrastructure consisting of over 1,490 miles of sewer mains. Existing sewer mains with manholes spaced more than 750 feet are a problem for the Sewer Collection System Maintenance workgroup to clean and properly inspect. The purpose for installing these new structures is to help reduce the distance between existing maintenance manholes and allow for proper inspection, viewing and cleaning the sanitary sewers trunk and mainlines.
