PO BOX 81977
Bakersfield, California 93380

\$10,147,090.00

Each bidder has agreed to allow the City sixty-four (64) days from date bids are opened to accept or reject their bid proposal. Purchasing requests that you complete the following sections and return this bid evaluation to the Purchasing Division at the latest by Monday, November 21, 2022 5:00 P.M.

The Engineer's Estimate for this expenditure is \$11,815,021. The contract price is 14% below the Engineer's Estimate.

BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

The MSC was constructed in the 1970's and is the central hub for core City services. These services include Fleet Maintenance, Facilities Maintenance, Traffic Operations Center, Street Maintenance, Solid Waste Management, 911 backup center, fuel stations, and houses critical citywide communication infrastructure. The MSC's current electrical infrastructure is obsolete, does not meet current safety requirements, and parts are no longer manufactured. To bridge the gap, refurbished parts have been used to keep systems operating, however this is becoming increasingly more difficult to maintain. As exhibited by recent power outages, the existing infrastructure cannot reliably provide back-up power to Building I, supporting critical citywide communications. This includes back-up 911 center communications, one of the City's two internet connections, connectivity for vehicle computers in police vehicles, bus rapid transit security cameras, traffic signal priority systems, and network services within the MSC.

This project focuses on the replacement of the end-of-life electrical infrastructure at the MSC. It also replaces the single existing generator with three separate generators increasing the capability of emergency backup power systems.
