BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment): Pump Station 97 has decreased in production over the years and a well video has revealed that the casing is severely plugged. Our Production Site checks have readings of 850 GPM when this well is rated at 2000 GPM. A well rehabilitation will bring this well within 90% of, or back to, the 2000 GPM.
