BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

The existing sewer trunk main in North Avenue conveys an average of 11.5 million gallons of wastewater per day to the Fresno-Clovis Regional Wastewater Reclamation Facility. This sewer trunk main experienced a localized structural failure in North Avenue from just west of Golden state Boulevard to Maple Avenue due to the complete corrosion of the crown of the sewer trunk main from hydrogen sulfide gas.

On April 4, 2023 Floyd Johnston Construction Co., Inc., was contracted and completed a temporary repair by slip lining the unstable section of sewer main with a 42-inch pipe until the permanent realignment of the 66-inch could be constructed. This project will complete the 66-inch realignment within the project limits.
