**BACKGROUND OF PROJECT** (To be completed by Evaluating Department/Division. Explain need for project/equipment):

This project is for the replacement of an existing 57-inch sewer trunk main in North Avenue from west of State Route 99 to Golden State Boulevard. The existing sewer trunk main conveys an average of 11.5 million gallons of wastewater per day to the Fresno-Clovis Regional Wastewater Reclamation Facility.

This trunk sewer main previously experienced a localized structural failure between Golden State Boulevard and Maple Avenue, which is immediately upstream of this project. Signs of severe deterioration continue downstream throughout the bounds of this project and requires replacement of the sewer trunk main that has reached the end of its useful life.
