P3.a. Description (Continued from page 1):

The 1420 H Street building is three-bays wide and symmetrical in design on the two-upper floors with an asymmetrical ground floor fenestration pattern. Exterior building materials consist of painted concrete and stucco, and composition roll roofing, with a metal cornice. Fenestration consists of a recessed ground floor entrance, a roll-up metal bay on the north side, and two narrow rectangular fixed metal-framed windows set horizontally into the façade on the south side of the ground floor. Three aligned steel sash windows are on the ground floor, one above the entrance, one above the roll-up metal bay, and the other above the fixed horizontally hung windows. The ground floor windows and bays were filled in sometime after 1994 however, the original shapes are still visible because of cracking in the stucco. Each of the building's two upper floors feature three borizontally aligned tri-partite steel sash windows. An oversized metal coffee can painted with the Dale Brothers Coffee Company logo is mounted to the roof of the 1420 H Street building, and represents the building's use as the Dale Brothers Coffee Company headquarters from the late 1930s through the early 1970s. A two-story brick building with a flat roof and a rectangular plan is appended to the rear of the 1420 H Street building, and is visible from the property's rear alley. Overall the exterior of the 1420 H Street building, including the roof mounted coffee can signage, appears to be in fair to good condition.

The 1432 H Street building is single-story with a low gabled, extant wood trusses, and a low parapet along the front facade. The front street-facing elevation is marked by a series of infilled bays containing metal roll-up doors, wood and metal entry doors, and storefront windows shaded by green cloth awnings. Many of the infill treatments appear to be reversible/removable. Exterior building materials consist of peach colored stucco siding for the exterior walls and composition roll roofing. Overall, the exterior of the building appears to be in good condition, although, the infill fenestration changes have diminished the building's integrity.

Historical Overview of the 1420-1432 H Street Property

A review of Sanborn Fire Insurance Maps for the 1420-1432 H Street property reveals that prior to the construction of the Benham Ice Cream Company building in 1913, the property contained two detached single-family dwellings set on wide lots, with several ancillary structures set at the rear of each lot. The dwellings and their respective parcels originally appeared to be separate and distinct with regards to ownership and development. The 1420 H Street property is first depicted on the 1898 Sanborn Map as containing a single-story dwelling with a basement identified as 1316 H Street, and two rear buildings identified as 1316 ½ and 1316 1/3. The 1432 H Street property is depicted on the 1898 Sanborn Map as containing a single-story dwelling identified as 1320 H Street, with an unidentified out-building at the rear of the lot. By 1906, when the next Sanborn was published for Fresno, the street numbering changed from 1300 to 1400, which is consistent with the addresses found on the block today. The 1906 map indicates that the 1316 H Street property was renamed 1420 H Street, and the 1320 H Street property was renamed 1436 H Street.

By 1918 both dwellings were replaced with new construction. The 1436 H Street residence was demolished or removed from the lot and replaced with another single-story, single-family dwelling identified as 1430 H Street. The 1420 H Street property had been developed with the Benham Ice Cream Company building, a three-story commercial/low-industrial building with a rectangular plan, identified as 1420-1424 H Street. The 1918 Sanborn Map depicted the ice cream building as containing a ground-floor auto and wagon house/garage at the north side, with office space in the center section of the ground floor.

Historical research indicates the 1420 H Street building was originally designed and constructed in 1913 by the R.F. Felchin Company, a Fresno based architectural and engineering firm. The three-story warehouse was constructed for use as the offices, and production and storage plant for the Benham Ice Cream Company, which eventually became recognized as the largest manufacturer of ice cream products in California. The Benham Ice Cream Company occupied the 1420 H Street warehouse upon completion of construction in 1913 through approximately 1927 when J.A. Benham sold his part of the company interests to Standard Creameries, Inc. Standard Creameries operated its Fresno branch at 1420 H Street from 1927-1928 through 1937, when the building was purchased by the Dale Brothers Coffee Company for use as the company's coffee production and storage warehouse. The Dale Brothers Coffee Company occupied the building upproximately 1972, when the coffee roasting business sold the property back to Dale family descendents, Jeff and Jerry Dale.

Between approximately 1972 and 1982 Jeff and Jerry Dale operated their own coffee roasting business at the 1420-1432 H Street buildings, which eventually expanded to include the sale and/or rental of other restaurant supplies. During this period the Dale's also used the buildings for miscellaneous storage purposes. Today Jeff and Jerry Dale operate Coffee Break Service Inc., a coffee and restaurant supply company based out of the adjacent 1408 H Street building.

In approximately 1982 Jon Maroot purchased the 1420-1432 H Street property from Jeff and Jerry Dale, and Maroot's son Matthew Maroot presently owns the property jointly with his parents. Since 1985, the 1420 H Street building has been utilized as a photography studio and for general storage purposes by the Maroot's, and the 1432 H Street building has served as a banquet and reception hall run by Matthew Maroot and known as Jon Jon's Grand Central Station.

Construction History

The 1420-1432 H Street property appears to have been constructed in three phases over an approximate eleven-year period between 1912 and 1923, and later in 1937, the building underwent major modifications that culminated in the current appearance and configuration of the structure. The current 1420 and 1432 H Street buildings were originally constructed as separate buildings that were physically connected through interior passageways. The buildings represent distinct phases of construction/modification to the original Benham Ice Cream Company plant and later the Dale Brothers Coffee Company plant, and are for the purposes of this evaluation considered to be one structure rather than two independent and distinct buildings.

The original three-story building that today is identified as 1420 H Street was constructed for use as the Benham Ice Cream Company building in 1912-1913, and a historic photograph of the building from approximately 1915 (shown on the photo continuation sheet). In approximately

The 1420 H Street building appears to be individually eligible for the California Register of Historical Resources at the local level under Criterion 3: Design/Construction as an intact example of commercial warehouse construction. Additionally, the original 1420 H Street building was designed by the noted Fresno design and engineering firm the R.F. Felchlin Company, headed by architect Richard Ferdinand Felchlin and engineer Charles Franklin. The building is a very early example of the company's work, and later the firm went on to design several major buildings in Fresno including the impressive San Joaquin Light & Power Company building at the corner of Fulton and Tuolumne Streets. The 1432 H Street building does not appear to be significant under Criterion 3: Design/Construction due to modifications.

In its current configuration, the 1420-1432 H Street property does not appear to be eligible under Criterion 3 as an outstanding example of the work of contractors Trewhitt & Shields. The original 1420 H Street building was not designed or constructed by the contracting firm. Trewhitt & Shields served as the contractors for the 1937 remodel to the 1420-1432 H Street property, which resulted in the removal of two-upper stories of the 1432 H Street volume. Today the building configuration resembles the 1937 remodel effort, however, the work does not rise to a level of significance for its association with or representation of Trewhitt & Shields work.

The 1420 H Street building was categorized as a "2" in the 1994 Powell Survey, which means that the building was determined to be eligible for the City of Fresno Local Register of Historic Resources. The 1432 H Street building was categorized as a "4" in the 1994 Powell Survey, which means that the building was considered to be non-contributing, or not individually eligible.
