City of Fresno
Comparison Chart

Department: Police Department

Equipment: Navigation Computers

Features	Churchill Availability		Aerocomputer Availability
1. Worked as designed during in-flight testing?	Yes		No
2. Ability to work with legacy hardware on both helicopters?	Yes		No
3. Product lifetime free software updates?	Yes		Yes
4. Remote software updates?	Yes		Yes
Total Cost:	$280,735.00		$280,832.18

Explanation of Features:

1. In-flight testing with Aerocomputer took one week and not all features worked. CAD was never installed and tested due to the issues. Churchill was installed and tested for one day and worked as designed.

2. The air crew were unable to get the legacy touchscreen to work with the Aerocomputer and another touchscreen was damaged by the product during testing. The Churchill product worked as designed with the legacy hardware on the helicopter.

3. Churchill has offered free lifetime software updates. Aerocomputer has now matched that feature.

4. Churchill has offered remote software updates. Aerocomputer now offers this feature but it was not tested.
