Briefly explain your qualifications or areas of demonstrated expertise for this board or commission.

As a citizen I believe strongly in the consensus process for public policy and procedure. Moreover in a personal capacity, I cycle for recreation and exercise throughout Fresno and Fresno County. Cycling in the region provides a unique perspective of transportation and the safety of individuals using vehicles without motors. Professionally, I study the impact of carbon emissions on our climate. Motor vehicles are critical piece of the puzzle to solving global warming and climate change. Rethinking how we move about the world and our urban areas is a crucial component moving forward as we progress towards electric vehicles and the creation of spaces for alternative modes of transportation. I work on the Climate Council as part of the California State University system and I am a representative for the Fresno State campus on the Council on Ocean, Affairs, Science, and Technology. Both of these initiatives work to promote and financially support research between local stakeholders and the CSU's that addresses climate, science, and technology-based challenges in our state. I have worked a peer-reviewer for funded proposals and submitted successful proposals for my own researching and funding. I believe that my personal and professional experiences make me uniquely suited to serve on this committee that requires thoughtfulness and a willingness to collaborate.

Question applies to multiple boards

The Political Reform Act of 1974 prohibits public officials from using their official positions to influence governmental decisions in which they have a financial interest. The Board Members in the designed positions must disclose their financial interests as specified in the agency's conflict of interest code.

I agree that I have read the above and agree to file a Statement of Economic Interest Form should I be appointed to a Board, Commission, or similar body according to the adopted resolution.
