Each bidder has agreed to allow the City sixty-four (64) days from date bids are opened to accept or reject their bid proposal. Purchasing requests that you complete the following sections and return this bid evaluation to the Purchasing Division at the latest by Monday, June 6, 2016, 5:00 P.M.

The Engineer's Estimate for this expenditure is \$196,020. The contract price is 21% above the Engineer's Estimate. If the overage is greater than 10% or only one bid was received, give explanation:

The Fresno Sanitary Sewer Rehabilitation F Street and Santa Clara Street Project is a simple but relatively small project. Construction of a small project such as this will come with a large amount of overhead for out of town contractors. The two bids received for this bid were out of town contractors which will require additional mobilization costs. In addition, this is first time BKF Engineering has designed a sewer project and provided an estimate in the City of Fresno.

BACKGROUND OF PROJECT

As per the Collection System Master Plan (CSMP), the Collection System Maintenance work group performs inspections of the sewer systems within the City of Fresno. The goals of these inspections are to evaluate the structural integrity and capacity of all sewer pipes within the City of Fresno. The investigation was done using Closed Circuit Television (CCTV). During routine inspection of the sewers in 2010, areas were identified that required rehabilitation or replacement. This sewer line in particular was showing significant signs of structural deficiencies. Rehabilitation of the existing sewer line was found to be the best option after evaluation of all applicable remediation options.
