

**CITY OF FRESNO
CATEGORICAL EXEMPTION
ENVIRONMENTAL ASSESSMENT**

THE PROJECT DESCRIBED HEREIN IS DETERMINED TO BE CATEGORICALLY
EXEMPT FROM THE PREPARATION OF ENVIRONMENTAL DOCUMENTS
PURSUANT TO ARTICLE 19 OF THE STATE CEQA GUIDELINES.

PROJECT TITLE: Concrete Liner Installation at the Northeast Surface
Water Treatment Facility (NESWTF) Sludge Drying
Beds 1 and 2

PROJECT LOCATIONS: Northeast Surface Water Treatment Facility (NESWTF)
10120 N. Chestnut Ave.
Fresno, CA 93730

PROJECT DESCRIPTION: The project includes stripping and removal of the top 2
inches of surface soil, and other loose sediments from
the existing sludge drying beds 1 and 2, placement of
aggregate base rock surfacing, including, but not limited
to, subgrade preparation, compaction, and the
installation of 6 inches thick concrete liner.

**The Project is exempt under Section 15301/Class 1 and Section 15302/Class 2 of
the California Environmental Quality Act (CEQA) Guidelines.**

Under Section 15301/Class 1, projects are exempt from CEQA requirements when they
consist of operation, repair, maintenance, permitting, leasing, licensing, or minor
alteration of existing public or private structures, facilities, mechanical equipment, or
topographical features, involving negligible or no expansion of existing or former use.

Under Section 15302/Class 2, projects are exempt from CEQA requirements when they
consist of the replacement or reconstruction of existing structures and facilities where the
new structure will be located on the same site as the structure replaced and will have
substantially the same purpose and capacity as the structure replaced.

The Project described herein represents the recommended upgrade to existing sludge
drying beds 1 and 2 at the Northeast Surface Water Treatment Facility (NESWTF). The
specific work tasks are as follows:

- Stripping and removal of the top 2 inches of surface soil and other loose sediments, placement of aggregate base rock surfacing, including, but not limited to subgrade preparation and compaction.
- Installation of 6 inches thick concrete liner.

As such, the stripping and removal, and installation work are exempt under Section 15301/Class 1 and Section 15302/Class 2.

The Project will not expand the use of the existing facility, nor will it relocate any existing facilities or structures. The Project merely represents recommended sludge drying bed improvements by installing concrete liners to reduce maintenance issues related to solids removal, eliminate the necessity for groundwater pumping during facility maintenance periods.

None of the exceptions to Categorical Exemptions set forth in the CEQA Guidelines, Section 15300.2, apply:

- | | |
|----------------------------------|---|
| (a) Location | The Project is not located in a sensitive environment or an environmental resource of hazardous or critical concern as designated by federal, state, or local agencies. The work is entirely located at the NESWTF. |
| (b) Cumulative Impact | The Project will not have a cumulative negative impact over time that is significant. The Project merely entails stripping and removal of loose surface soil and/or concrete lining an existing facility. |
| (c) Significant Effect | The Project will not have a significant effect on the environment due to unusual circumstances. All work will be limited to an existing facility at the NESWTF. |
| (d) Scenic Highways | The Project will not result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway. The Project is not located near scenic highways. |
| (e) Hazardous Waste Sites | The Project is not located on a hazardous waste site which is included on any list compiled pursuant to Section 65962.5 of the Government Code. |
| (f) Historical Resources | The Project will not cause a substantial adverse change in the significance of a historical resource. |

The existing facilities at the NESWTF are not considered historical resources.

Furthermore, the proposed project is not expected to have a significant effect on the environment. Accordingly, a categorical exemption, as noted above, has been prepared for the project.

Date: September 22, 2023
