Each bidder has agreed to allow the City sixty-four (64) days from date bids are opened to accept or reject their bid proposal. Purchasing requests that you complete the following sections and return this bid evaluation to the Purchasing Unit at the latest by: Monday, April 11, 2022, 5:00 P.M.

The Engineer's Estimate for this expenditure is \$320,000. The contract price is 7.35% below the Engineer's Estimate. If the overage is greater than 10% or only one bid was received, give explanation: N/A

BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

The design phase of the project was initiated in FY21 when the City of Fresno received a grant award through the CDBG program. The scope of the project includes the installation of Midwest-guardrail barricade with steel posts along the Dry Creek Canal frontage of Clark Street and a portion of Floradora Avenue. The project will also install an asphalt-concrete dike at the existing edge of paving, beneath and in front of the dike, as well as a 12" wide concrete lining cap behind the railing. The area between the AC dike and concrete cap will receive a layer of decomposed granite to stabilize the soil beneath the barricade and provide a low-maintenance, weed-resistant barrier. New signage will be installed on along the affected streets as well as the intersections of the existing cross-streets that "T" into Clark Street, including Hedges Avenue and Lamona Avenue. Public Works and FID staff worked to prepare and execute a Common-Use Agreement for the areas where both agencies need to maintain their respective infrastructure. No additional right-of-way was needed to complete this project. The preliminary engineering design and project management was completed over 24 months by City of Fresno staff.
