PROJECT ASSUMPTIONS

GENERAL PROJECT ASSUMPTIONS

This access must be provided through industry standard tools such as Virtual Private Network (VPN). Failure to provide this access in a timely fashion will result in a project delay. Such a delay will result in a Change Order.
- Agency will ensure that Accela resources have access to a Dev or Test version of the 3rd party systems for interface development. All interfaces will be developed against 1 (one), agreed upon version of the 3rd party system.
- Agency will provide source code for relevant interfaces in scope. If source code is unavailable, then the project may be delayed or addition cost may result from the re-development of a new interface.

Integration Assumptions

- The agency will purchase the Enhanced Reporting Database (ERD) as part of their SaaS license. If the agency does not purchase ERD, then additional scope may be required to migrate interfaces.

PROJECT TIMELINE

The project is estimated to take 24 weeks. The projected start date for the Project is forty-five (45) calendar days after mutual acceptance and signature of this SOW.

PROJECT COMPLETION

Upon completion of the work defined above, this contract will be closed.

PROJECTS PUT ON HOLD

It is understood that sometimes Agency priorities are revised requiring the Agency to place the Accela implementation on hold. The Agency must send a formal written request sent to Accela to put the project on hold. Delays of 2 weeks or more that have a tangible impact to Accela's resource plan are subject to change order.

If an Agency-based delay puts the project on hold for more than 90 days, Accela reserves the right to terminate the contract and negotiate new terms. If an Agency-based delay puts the project on hold past the termination period, Accela reserves the right to terminate the contract at the time of the delay. After that time, Accela can choose to cancel the rest of the Statement of Work. To finish the project will require a new Statement of Work at new pricing.
