#### FRESNO CITY COUNCIL

CITY CLERK, FRESNO CA

#### **Supplemental Information Packet**

Agenda Related Items - 5:30P.M. File ID#15-982

#### **Contents of Supplement:** PowerPoint Slides

#### Item(s)

WORKSHOP on the Citywide Development Code

#### **Supplemental Information:**

Any agenda related public documents received and distributed to a majority of the City Council after the Agenda Packet is printed are included in Supplemental Packets. Supplemental Packets are produced as needed. The Supplemental Packet is available for public inspection in the City Clerk's Office, 2600 Fresno Street, during normal business hours (main location pursuant to the Brown Act, G.C. 54957.5(2). In addition, Supplemental Packets are available for public review at the City Council meeting in the City Council Chambers, 2600 Fresno Street. Supplemental Packets are also available on-line on the City Clerk's website.

#### Americans with Disabilities Act (ADA):

The meeting room is accessible to the physically disabled, and the services of a translator can be made available. Requests for additional accommodations for the disabled, sign language interpreters, assistive listening devices, or translators should be made one week prior to the meeting. Please call City Clerk's Office at 621-7650. Please keep the doorways, aisles and wheelchair seating areas open and accessible. If you need assistance with seating because of a disability, please see Security.

# THE CITYWIDE DEVELOPMENT CODE UPDATE

RECEIVED

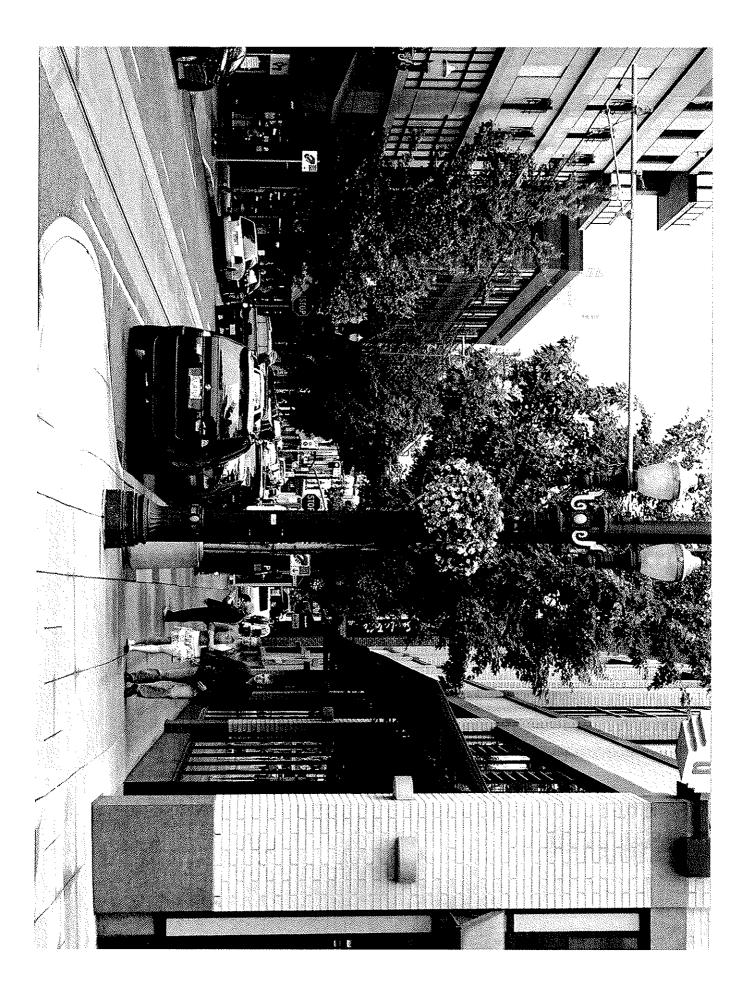

2015 NOV 5 PM 12 49

CITY OF FAX, FRESNO CA

# TURNING THE GENERAL PLAN'S VISION INTO REALITY

DAN ZACK, ASSISTANT DIRECTOR

DEVELOPMENT AND RESOURCE MANAGEMENT DEPARTMENT

# **WORKSHOP #2**

Multifamily, Mixed-Use, Commercial, and Employment Districts

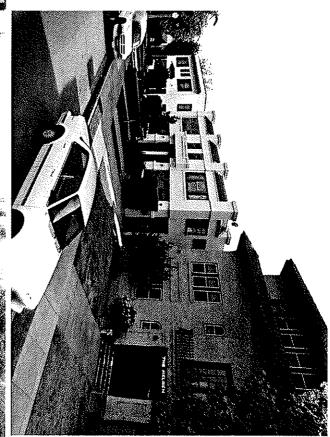

#### **GOALS**

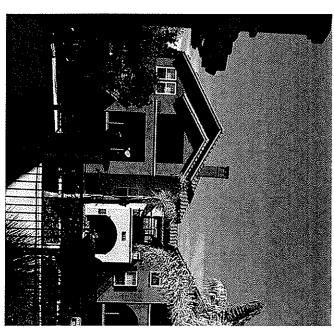

- Implement the General Plan.
- Create a variety of lifestyle options for Fresnans.
- Support BRT system with transit-oriented development.
- Support robust job creation.

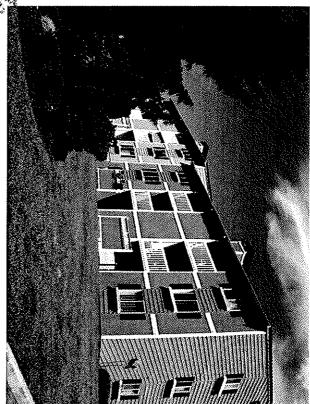

# MULTIFAMILY RESIDENTIAL

# DEVELOPMENT STANDARDS

### MARCH DRAFT

- Removed requirements for grouping and distributing parking through the apartment complex.
- Removed language specifying that on-site open space include a specified amount of playfields, game courts, and other active recreation facilities.
- Removed storage requirement.
- Simplified some of the façade design requirements.

# Changes After the MARCH DRAFT

• Added AH Overlay to preserve pattern of older apartment communities.

### SEPTEMBER DRAFT

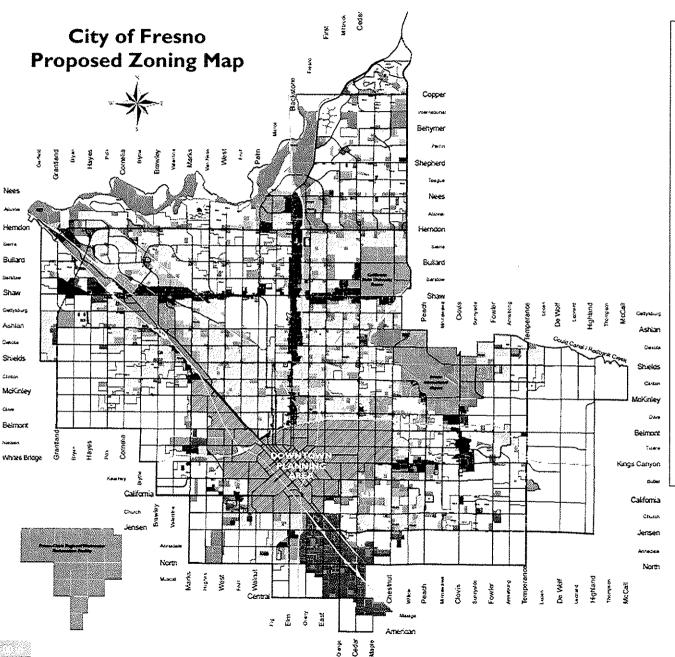

- Reduced minimum size requirement for balconies.
- Allowed for exception to requirement for street-facing units in areas where the street design and surrounding development isn't supportive.
- Allowed flexibility in precise location of connections to shopping areas.

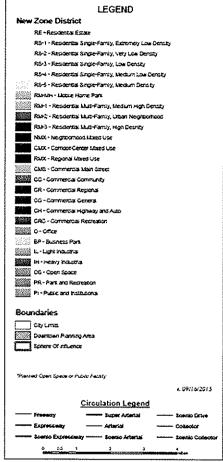

# Changes After the **SEPTEMBER DRAFT**

• Created process to deviate from remaining façade design standards.

# MIXED USE

# DEVELOPMENT STANDARDS

The Observan Planning Area will be returned as part of a separate effort, currently anticipated to take place in the spring of 201s.

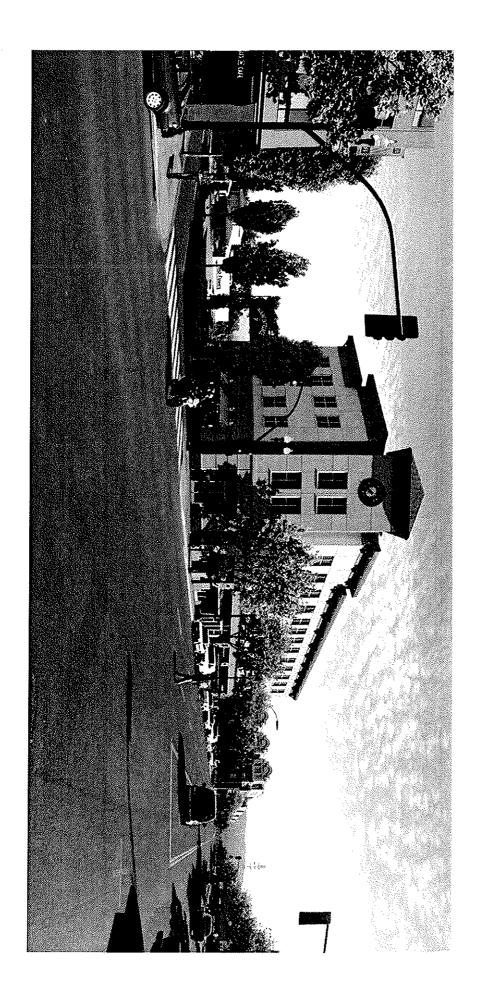

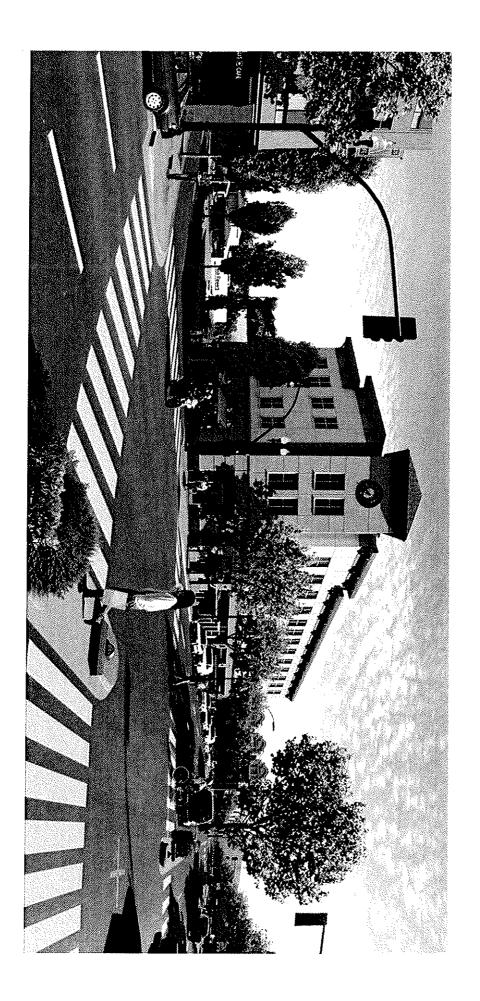

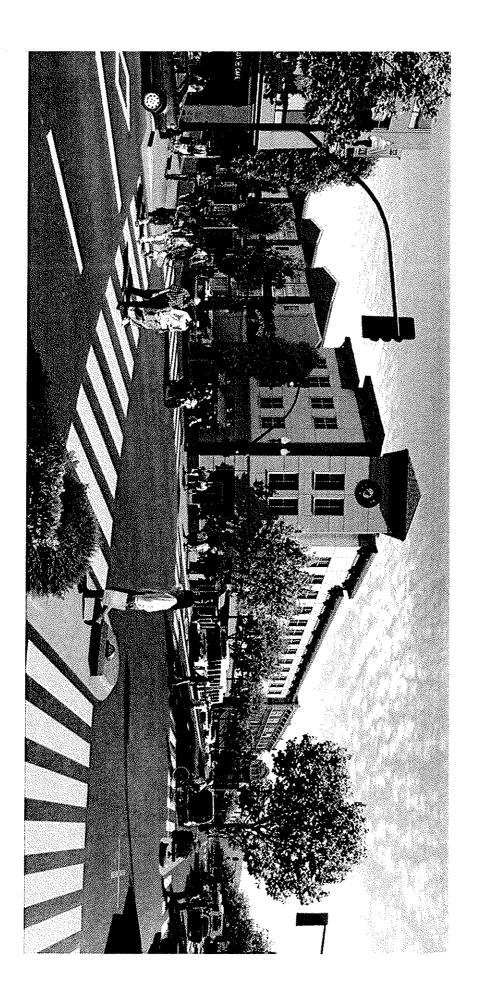

#### **MEET CITYLINE'S S500M TOD NEIGHBOR**

waxay ya 😥

Dirt will be flying within 90 days on a new \$300M TOD just west of KDC's manimoth CityLine project. We talked with one of the developers vesterday to find out how this project will make a good neighbor to State Farm.

Joe Altemore, one of three principals heading up BC Station Partners (which includes Jim Will's and Sam Swanson), tells us they just closed on 54 neres at the southeast corner of Central Expression and the President George Bush Turnpike adjacent to DART's Bush Turnpike light rail station. BCSP's project (which hasn't been named yet) could make this intersection the new front door for Richardson, ECSP plans more than 1.35M SF of office.

#### Other Places Nipping at Heels of Arlington's Transit-Oriented Development

MAY 27, 2014

T COMMENTS

Arlington, Virginia has long been a national and local leader of transit-oriented development (TCD). It's been the jurisdictional equivalent of an iPad when the majority of places were still desktop PCs

Now, many other places are patterning themselves based on the traits Adincton perfected, that is, relatively dense and containing mixed-use, walk-able, and bikeable neighborhoods that emphasize transportation choices. Meanwhile, with more localities

#### Cleveland's HealthLine gives more development bang for the buck than other transit corridors, study finds

by Asson Grant, The Plain George Emiliating author - Follow on Twetter

on September 24, 2013 on 6:00 Acts, signaless Suprember 24, 2013 of 306 Acts

CLEVELAND, Ohio - Bus rapid transit - led by Cleveland's Healthlane - is proving to be a form of mass transit that efficiently sparks urban development, according to a study of 21 North American transit comdons released this morning.

"It can move an urban economy forward quarkly and efficiently," said Walter Hook. head of the Institute for Transportation & Development Policy.

Hook said but rapid transit first emerged at a mode of city transportation in Latin America and is now being adopted in the United States and Canada. After about a decade of use in the U.S., it has become established enough to track results, he said.

What those results show (see study in document viewer below) is Cleveland ranks at the very top when it comes to being for the back.

The Greater Cleveland Regional Transit Authority's Euclid Avenue HealthLine generated \$114.54 in economic development for every dollar spent on the bus corndor, the researchers concluded.

That's based on a \$50 million price tag for the Healthlane, or strictly the costs of the

#### ARTICLE IV. TRANSIT CORRIDOR DEVELOPMENT

- Sec. 42-401. Purpose; scope.
- Sec. 42-402. Transit corridor street and type a street pedestrian access standards.
- Sec. 42-403. Single family residential developments on transit corridor streets and type A streets.
- Sec. 42-404. Dedication.
- Sec. 42-405. Construction and maintenance standards.
- Sec. 42-406. Provisions cumulative.

#### Sec. 42-401. Purpose; scope.

- (a) Any person owning property abutting a transit corridor street or a type A street may use the performance standards provided by this article for improvements to that property if the person complies with all the standards of this article.
- (b) If a person desires to use the performance standards provided by this article, then the person shall submit for approval by the department a papplication for building permit, development plat, or other city permit, as appropriate, for the new development or improvements to that proper describe the proposed pedestrian realm, including the locations of existing and proposed sidewalks, clear pedestrian spaces, hardscape, per improvements, obstructions, utility lines (both above and below ground), roadways, street lights, required street trees, landscape elements, so other information required by the director or the city engineer to determine compliance with this article.
- (c) The director is authorized and directed to prepare a map showing type A streets consistent with the requirements and standards of this Code directed to periodically revise the map.

(Ord. No. 2013-343, § 3(Exh. A), 4-24-2013)

#### Sec. 42-402. Transit corridor street and type a street pedestrian access standards.

- (a) Where any proposed development or improvements abut a transit corridor street or a type A street, the property owner may build up to the property corridor street or the type A street, but no closer than 15 feet from the back-of-curb, if the owner provides a pedestrian realm in accordance via
- (b) A pedestrian realm shall be at least 15 feet wide and shall include all the public right-of-way between the back-of-curb and the property, and s wide sidewalk with a minimum six feet wide clear pedestrian space located within a street right-of-way or other public pedestrian access (sid length of the property abutting the transit corridor street or type A street.
- (c) A pedestrian realm shall also comply with all of the following requirements:
  - (1) At least 50% of the property width adjacent to the pedestrian realm shall include a building façade that shall be located within ten feet of
  - (2) Any driveways parallel to the pedestrian realm, parking or vehicular traffic (other than approved driveways crossing the pedestrian realm on an area of the property other than between the pedestrian realm and the façade of a building within 25 feet of the property line parallel.

### MARCH DRAFT

- Removed requirements for distributing parking through the project.
- Removed language specifying that on-site open space include a specified amount of playfields, game courts, and other active recreation facilities.
- Removed storage requirement.
- Simplified some of the façade design requirements.

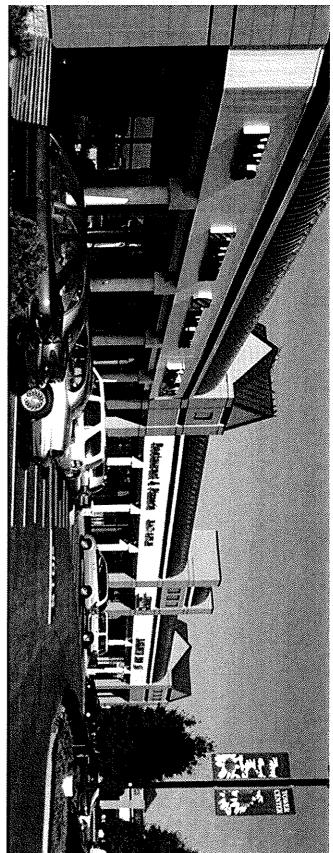

# Changes After the SEPTEMBER DRAFT

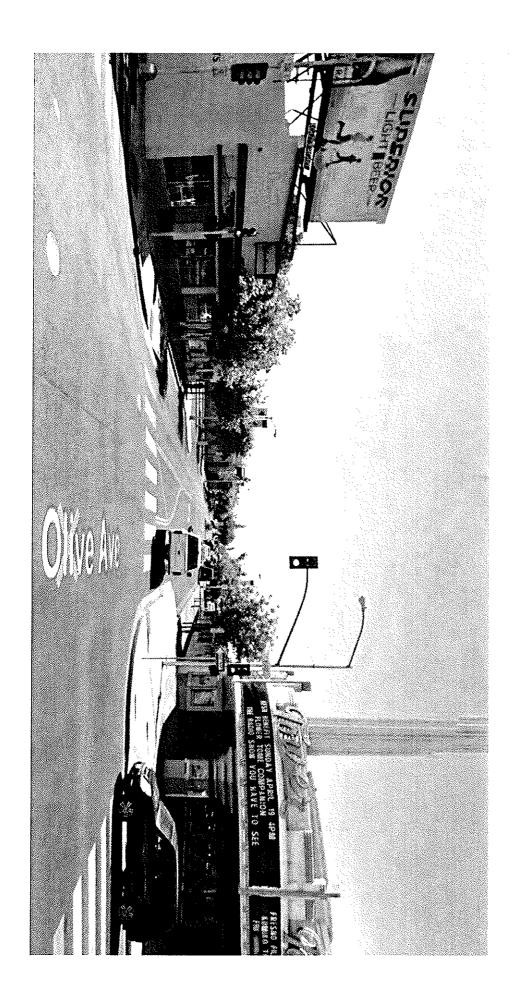

- Reduced minimum size requirement for balconies.
- Allowed for exception to requirement for street-facing units in areas where the street design and surrounding development isn't supportive.
- Allowed flexibility in precise location of connections to adjacent development.
- Allowed service stations and drive-throughs in some areas.

## **COMMERCIAL**

# DEVELOPMENT STANDARDS

# Changes After the MARCH DRAFT

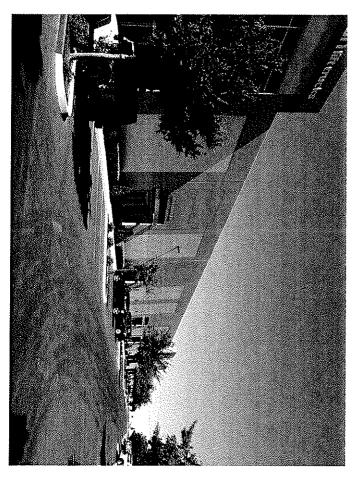

- Added enhanced streetscape option.
- Removed most façade design standards.

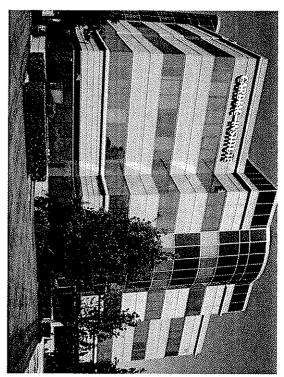

# Changes After the **SEPTEMBER DRAFT**

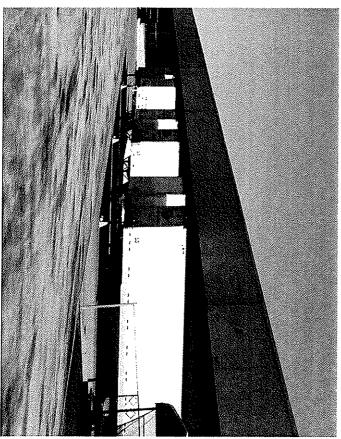

- Added blended parking requirement for large shopping centers.
- Removed maximum parking requirement.
- Made many adjustments to the signage section.

# **EMPLOYMENT DISTRICTS**

# DEVELOPMENT STANDARDS

### MARCH DRAFT

- Added enhanced streetscape option for the Office District.
- Removed some façade design standards.
- Clarified regulations pertaining to rendering facilities.
- Allowed auto sales and retail up to 6,000 s.f., in the IL zone.

# Changes After the **SEPTEMBER DRAFT**

- Allowed day care in industrial districts with a CUP.
- Allowed General Markets and Healthy Food Grocers in the BP, RBP, and IL districts.
- Removed limit of 1 driveway for sites under 1 acre.

### SEPTEMBER DRAFT

- Removed bike shower requirement from industrial and business park zones.
- Reduced parking lot shading requirement to 30% in industrial districts.
- Reduced other landscape requirements (dimensions, size of trees, etc).

# **SPECIAL USES**

# DEVELOPMENT STANDARDS

### Changes After the

### MARCH DRAFT

- Added restrictions to CRV recycling centers.
- Added restrictions to liquor stores.
- Expanded opportunities for mobile vendors.
- Expanded opportunities for farmer's markets.

## **DOWNTOWN**

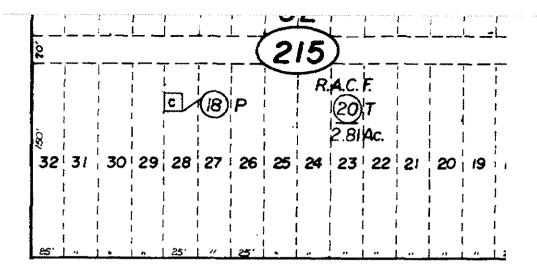

THE RMX ZONE

 No less than 80% of the street frontage must be occupied by a building, in keeping with the historic pattern of a continuous streetwall along Fulton.

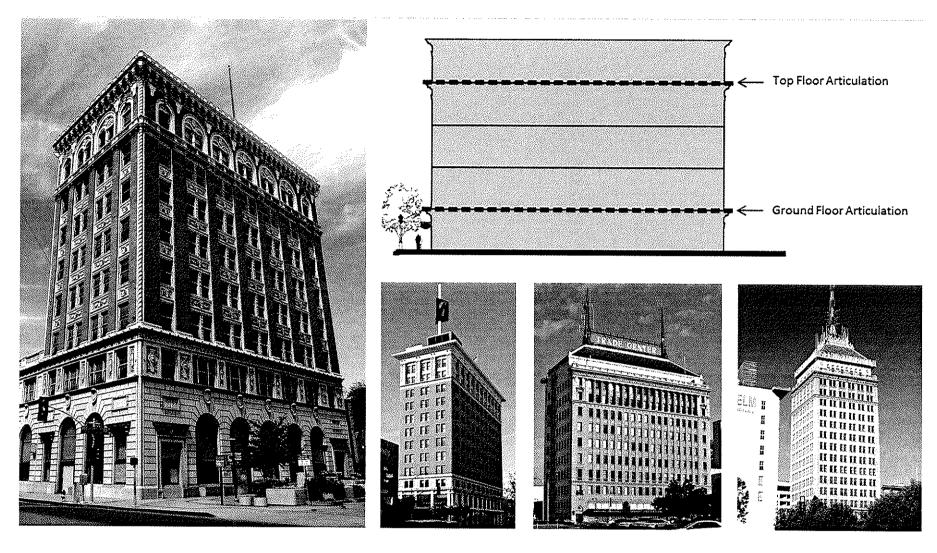

• Pedestrian connections directly into ground floor uses must be provided at a rate of at least 1 per 100 feet of frontage.

 Facades must have an articulation (such as an offset in the building plane, or a column or pilaster) every 25 feet, which happens to be the width of the first lots along Fulton in the original plat for the area.

 The elevations of multi-story buildings must be broken into base, middle, and top elements by cornices, belt courses, material changes, or step backs which is a technique use in many historic buildings along Fulton, including the Pacific Southwest Building, the Patterson Building, Bank of Italy Building, Helm Building, and the Mattei Building, among others.

### Building Materials and Finishes.

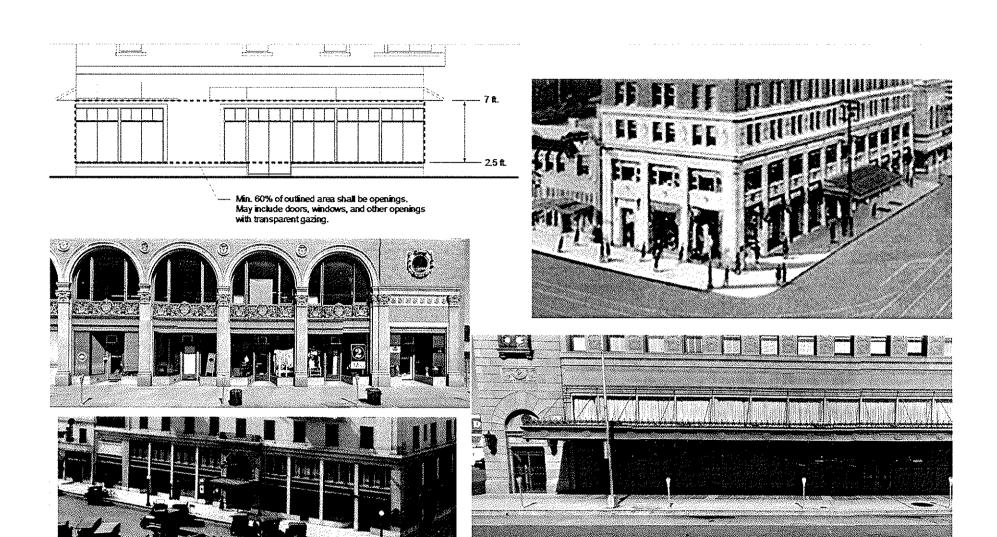

- 1. Each side of a building that is visible from a street or passenger railway shall be designed with a complementary level of detailing and quality of materials.
- 2. A minimum of two exterior wall finish materials shall be used.
- Veneers should turn corners, avoiding exposed edges and continue down the side of a building to a logical break, such as a change in wall plane.
- 4. Trim materials and finishes shall be differentiated from adjacent wall cladding materials and finishes. Acceptable trim materials shall be wood, precast concrete, stone, tile, or similar materials. Stucco trim shall be permitted at the discretion of the Review Authority, and in such instances it shall feature a smooth finish that contrasts significantly from adjacent stucco wall cladding.
- Building entrances and common areas shall include finishes and materials that are durable and high quality and distinguish these spaces from other elements of the building.
- 6. Parking areas and structures shall be designed to be compatible with the architectural character, materials, and colors of the overall development.

 There are several standards requiring high quality building materials and finishes.

 At least 70% of windows must have a vertical proportion, meaning they are taller than they are wide, which matches the pattern of historic buildings.

• 60% of the ground floor (between 2.5 feet and 7 feet from the sidewalk) must consist of windows and doors, which is consistent with the historic storefront pattern on Fulton.

 Building walls are required to be parallel to the street (no sawtooth pattern) and to have no slope (no pyramids) which is consistent with the historic building pattern.
