BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

The Department of Transportation seeks Council approval to award a construction contract to modernize and update passenger amenities, improve accessibility and increase safety at Manchester Transit Center, located at 3590 North Blackstone Avenue in Fresno, California. This facility is a major transit hub for FAX and allows customers to transfer between six separate bus lines. Staff recognizes the facility has suffered from deferred maintenance due to economic constraints. Update of this major transfer hub will provide a safer, more welcoming, attractive, and convenient environment for the large population of FAX customers using the facility. This project will contribute to the overall efforts by FAX to improve service.

The remodel and revitalization of Manchester Transit Center will address the following elements:

- New transit shelters and associated amenities.
- Redesigned and improved ADA path of travel between transit shelters and customer service building.
- Redesigned landscaping and security lighting.
