☒ Reject all proposals. Reason:

Remarks:

The Department of Public Utilities and the Public Works Department have jointly elected to utilize the Infor Enterprise Asset Management (EAM) software platform to manage linear assets in Sewer Collections, Water Distribution and Street Maintenance. This is an existing software system currently in use at DPU –Wastewater. Instead of installing a different IT system, we will purchase additional licenses and expand the existing EAM system to other users thereby reducing the redundancy between CMMS platforms. EAM will be used to manage work orders, service requests, resource tracking, project reporting and warehouse management.
