BACKGROUND OF PROJECT (To be completed by Evaluating Department/Division. Explain need for project/equipment):

FAX Facility Fire Alarm is not in compliance with the City of Fresno Fire Department code requirements. The existing fire alarm, when triggered, sends the Fire Department a location at MSC buildings instead of the correct location at FAX. Also, the fire pull devices are not ADA compliant in the existing locations. FAX is adding additional strobes and pull stations in locations that previously had none in order to provide increased fire safety and coverage.

DEPARTMENT CONCLUSIONS AND RECOMMENDATION:

☐ Award a contract in the amount of \$ _____
to _____
as the lowest responsive and responsible bidder.

Remarks:

☒ Reject all bids. Reason: The specification section for required contractor license's to be responsive lists only one construction classification as acceptable. This specification limited the available fire alarm contractors that are qualified to bid on this project. By revising this specification for fire alarm specialty contractors we will receive more qualified bids with more competitive pricing.
