

# 887 Fulton Street (Former Berkeley's Building) Section 106 Inventory and Evaluation Report

Prepared for:  
City of Fresno under U.S. Environmental  
Protection Agency Brownfields Funding

Prepared by:  
Stantec Consulting Services Inc.

Date:  
November 21, 2025

Project/File:  
203724380

## Disclaimer

The conclusions in the Report titled 887 Fulton Street (Former Berkeley's Building) Section 106 Inventory and Evaluation Report are Stantec's professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient's own risk.

Stantec has assumed all information received from City of Fresno under U.S. Environmental Protection Agency Brownfields Funding (the "Client") and third parties in the preparation of the Report to be correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec's contract with the Client. While the Report may be provided by the Client to applicable authorities having jurisdiction and to other third parties in connection with the project, Stantec disclaims any legal duty based upon warranty, reliance or any other theory to any third party, and will not be liable to such third party for any damages or losses of any kind that may result.

## Executive Summary

Stantec Consulting Services Inc. (Stantec) conducted this cultural resource assessment on behalf of the City of Fresno (City) as a required component of a Fiscal Year 2025 U.S. Environmental Protection Agency (EPA) Brownfields Revolving Loan Fund (RLF) grant awarded to the City for the removal of hazardous substances in the City. This assessment is focused on the Former Berkeley's Building located at 887 Fulton Street in Fresno, California (subject property). The proposed activities includes mold abatement activities, abatement and removal of regulated building materials (asbestos-containing materials [ACM] and lead-based paint [LBP]), removal and replacement of the interior drop ceiling, and removal and replacement of the building's roof.

In 2025, the EPA awarded a Brownfields RLF grant to the City for use on contaminated properties within an area consisting of Downtown and Southwest Fresno neighborhoods. The subject property at 887 Fulton Street was designated to receive a portion of the grant money for abatement of hazardous materials (hereinafter referred to as the "Project"). The award of a Brownfields grant constitutes a federal undertaking as defined in 36 Code of Federal Regulations [CFR] 800.16(y). Therefore, the Project requires compliance with Section 106 of the National Historic Preservation Act of 1966 (NHPA), as amended. In accordance with relevant federal guidelines, this report identifies and documents potential historic properties within the Project's Area of Potential Effects (APE), evaluates the resources for inclusion in the National Register of Historic Places (NRHP) and California Register of Historical Resources (CRHR), and assesses the Project's potential to result in adverse effects on historic properties.

The Project's APE consists of the footprint of one building at 887 Fulton Street that would be subject to permanent direct or indirect effects from the implementation of the Project (see Appendix A for APE delineation). Identification efforts included a records search at the Southern San Joaquin Valley Information Center (SSJVIC) of the California Historical Resources Information System (CHRIS) in Bakersfield, California, Sacred Lands files maintained by the Native American Heritage Commission (NAHC), and desktop research with a built environment field survey of the Project APE. The current Project proposes no ground disturbance within the developed Project parcel, and an archaeological pedestrian survey was considered unnecessary. The records search included review of records for the entire APE and a surrounding radius of 0.25 miles.

The records search completed at the SSJVIC identified one previously recorded cultural resource, the Town of Fresno, below the vertical extent of the Project APE (see *Table 1*). The Town of Fresno was recommended eligible for listing in the National Register of Historic Places (NRHP) as an archaeological historic district.<sup>1</sup> Additionally, desktop research identified that the building at 887 Fulton Street was

## 887 Fulton Street (Former Berkeley's Building) Section 106 Inventory and Evaluation Report

### Executive Summary

previously surveyed and recorded in 2012 as part of the *Historical Resources Evaluation Report (HRER) for the Fulton Mall Reconstruction Project, City of Fresno, California, Federal Project Number TCSPL-5060(263)* by Historic Resources Group. The report recommended the subject property eligible for local designation and not eligible for listing in the NRHP. For the purposes of the Project, the subject property was revisited, surveyed, and evaluated to comply with the Section 106 process.

Two Stantec architectural historians surveyed one built resource within the Project APE within Assessor's Parcel Number (APN) 468-282-21T. The surveyed building is vacant. The parcel owner is listed as the Successor Agency to the Redevelopment Agency who has a Disposition and Development Agreement with the Fresno Area Hispanic Foundation. Based on the findings of this report and previous reports on the building, this study recommends the building at 887 Fulton Street not eligible for listing in the NRHP/CRHR under any criteria. An overall finding of No Historic Properties Affected is appropriate for the proposed Project.

### Preparer Qualifications

This report was prepared by Stantec personnel who meet the Secretary of the Interior's Standards and Guidelines for Professional Qualifications in Archaeology, Architectural History, and History (as defined in 36 CFR Part 61).

Stantec architectural historian Alana Vidmar received a Bachelor of Arts degree in Community, Environment, and Planning from the University of Washington, and a Master of Science degree in Conservation of Historic Buildings from the University of Bath. She meets the Secretary of the Interior's professional qualifications for Architectural History and History. She supports clients in compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), National Register of Historic Places (NRHP) evaluations, and various state historic preservation laws and regulations. Her skills include conducting background reviews, built-environment documentation, preparing historic context statements, various states' historic property inventory forms, and NRHP nomination forms.

Stantec senior associate architectural historian Rebecca Riggs has 10 years of experience in architectural history and cultural resource management, including in-depth research knowledge and evaluation of historical buildings, structures, and landscapes and regulatory compliance relating to the built environment. She received a Bachelor of Arts in History from Monmouth College and a Master of Arts in Public History from California State University, Sacramento. She has served as architectural historian on several documentation projects, including Section 106 and 110 of the NHPA, National Environmental Policy Act (NEPA), and California Environmental Quality Act (CEQA). Ms. Riggs has extensive experience with development, research, field survey and recordation, report documentation, mitigation development and implementation, and agency review of projects. She meets the Secretary of the Interior's Professional Qualification Standards for Historic Preservation in Architectural History and History.

Stantec architectural historian Madeline Josa has experience working on several types of documentation projects, including Section 106 of the NHPA, NEPA, and CEQA, with resources ranging from hydroelectric infrastructure to historic landscapes. She holds a Bachelor of Arts in History from the University of California, Santa Barbara and a Master of Studies degree in Women's, Gender, and Queer History from the University of Oxford. She also has experience in the field doing cultural resource and built environment

Executive Summary

surveys. Ms. Josa is particularly skilled in research development and technical writing, as well as copyediting. She meets the Secretary of the Interior's Professional Qualification Standards for Historic Preservation in History.

Stantec archaeologist Dr. Jenna Santy contributed to this report. Dr. Santy has a Ph.D. in Anthropology-Archaeology from the University of California, Santa Barbara. She has more than 10 years of experience in cultural resource management and meets the Secretary of the Interior's Standards for Archaeology.

# 1 Project Location and Undertaking Description

Stantec Consulting Services Inc. (Stantec) conducted this cultural resource assessment on behalf of the City of Fresno (City). The City proposes utilizing a Brownfields Cleanup Revolving Loan Fund grant, the undertaking, to complete environmental cleanup activities at 887 Fulton Street (Assessor's Parcel Number [APN] 468-282-21T), historically known as the Berkeley's Building (see **Appendix A**). The Project activities would include mold abatement activities, abatement of asbestos-containing materials (ACM) and lead-based paint (LBP) as needed, removal of the interior ceiling, restoration of the interior and exterior including construction of a new drop ceiling, and reparation or replacement of the roof.

The building at 887 Fulton Street opened in 1961 as Berkeley's department store. The store was built during a period of post-war commercial redevelopment in Downtown Fresno between 1945 and 1970. The redevelopment included renovation of older buildings with new façades, and construction of new buildings in Modern and Mid-Century Modern architectural styles. Berkeley's occupied another building in downtown Fresno and relocated to the new building after it was constructed. The owner and president of Berkeley's, Gilbert C. Berkeley, was in favor of the redevelopment of downtown Fresno, and relocated his store there as a gesture of his support of the effort.<sup>2</sup>

The purpose of the proposed Project is to facilitate hazardous cleanup activities and restoration of the subject property. The Project would specifically include:

1. Site preparation by establishing security fencing, drop boxes, decontamination areas, appropriate containment, barrier, and air-filtration systems and other work area preparations as necessary.
2. Repairing and/or replacing the roof as necessary to prevent further moisture intrusion through the roof on a long-term basis and enable mold abatement work on the interior of the building to be completed without risk of reoccurrence.
3. Establishing appropriate containment, barrier, and air-filtration systems as necessary for workers.
4. Removal of the interior drop ceilings.
5. Restoring the building, which may include repairing or rerouting any plumbing or water lines located in areas above the ceiling that are impacted by the ACM removal process and roof replacement. This is a requirement to restore the building envelope post abatement as these repaired utility lines would be located within the roofing/ceiling materials to service roofing equipment (heating, ventilation, and air conditioning [HVAC], emergency sprinkler systems, and water supply lines) as necessitated by a building restoration plan.

---

<sup>2</sup> Historic Resources Group, California Department of Parks and Recreation 523 Series Form for 887 Fulton Mall, on file at Fresno County Library (Fresno, 2012).

6. Abating ACM and LBP in other areas of the building as needed
7. Constructing a new drop ceiling.
8. Offsite transportation and disposal of hazardous building materials.
9. Removal of temporary fencing and general subject property cleanup.

The proposed Project would not include ground-disturbing activities.

## **1.1 Regulatory Context**

### **1.1.1 National Historic Preservation Act**

In 2025, the U.S. Environmental Protection Agency (EPA) awarded a Brownfields Revolving Loan Fund grant to the City of Fresno for use on contaminated properties in the City of Fresno. The subject property at 887 Fulton Street was designated to receive a portion of the grant money. The National Historic Preservation Act (NHPA) of 1966, as amended, requires federal agencies or those they fund or permit to consider the effects of their actions on historic properties. The Advisory Council on Historic Preservation (ACHP) Section 106 implementing regulations (36 Code of Federal Regulations [CFR] Section 800) define "historic properties" as follows:

*Any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register of Historic Places (NRHP) maintained by the Secretary of the Interior. This term includes artifacts, records, and remains that are related to and located within such properties. The term includes properties of traditional religious and cultural importance to an Indian tribe or Native Hawaiian organization that meet the National Register criteria (36 CFR Part 800.16[1]).*

To determine whether an undertaking could affect NRHP-eligible properties, cultural resources, including archaeological, ethnographical, and architectural properties, must be inventoried and evaluated for listing in the NRHP. For a property to be considered for inclusion in the NRHP, it must normally be at least 50 years old and meet the criteria for evaluation set forth in 36 CFR Part 60.4, as follows:

- A) *That are associated with events that have made a significant contribution to the broad patterns of our history; or*
- B) *That are associated with the lives of persons significant in our past; or*
- C) *That embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master or that possess high artistic values or that represent a significant and distinguishable entity whose components may lack individual distinction; or*
- D) *That have yielded, or may be likely to yield, information important in prehistory or history.*

As described above, a resource must possess integrity in addition to historical significance. The aforementioned seven aspects are defined as follows:

*Location: the place where the historic property was constructed or the place where the historic event took place.*

*Design: the composition of elements that constitute the form, plan, space, structure, and style of a property.*

*Setting: the physical environment of a historic property that illustrates the character of the place.*

*Materials: the physical elements combined in a particular pattern or configuration.*

*Workmanship: the physical evidence of the crafts of a particular culture or people during any given period of history.*

*Feeling: the quality that a historic property has in evoking the aesthetic or historic sense of a past period of time.*

*Association: the direct link between a property and the event or person for which the property is significant.*

NRHP analysis is based upon all pertinent cultural resources guidance and best practices including that of 36 CFR Part 800 and technical bulletins including *National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation*.<sup>3</sup>

## **2 Cultural Context**

### **2.1 Prehistoric Context**

Human occupation in the region likely began as early as 13,000 years ago during the initial stages of the Holocene when Clovis big-game hunters presumably inhabited the area. Subsequent periods of soil erosion and deposition as well as ground disturbance from intensive agriculture, however, have led to the destruction of many of the earliest cultural sites in the Central Valley. This has had the effect of severely limiting prehistoric archaeological research in the Fresno area.<sup>4</sup>

Based on evidence that is available, prehistory in the valley is generally divided into five periods: Paleo-Indian (11,550 to 8550 BC), Lower Archaic (8550 to 5550 BC), Middle Archaic (5550 to 550 BC), Upper

---

<sup>3</sup> U.S. Department of the Interior, National Park Service, *National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation* (2022).

<sup>4</sup> J. S. Rosenthal, G. G. White, and M. Q. Sutton, *Chapter 10: The Central Valley*. In *California Prehistory: Colonization, Culture, and Complexity*, Terry L. Jones and Kathryn A. Klar, editors (AltaMira Press, Lanham, Maryland, 2007), 147–163.

Archaic (550 BC to AD 1000), and Emergent (AD 1000 to AD 150).<sup>5</sup> In broad terms, the Lower Archaic period is characterized by big-game hunting. The Middle Archaic is characterized by a shift in subsistence strategy to a diversified diet of plant and animal resources, including fish. The Upper Archaic saw an increase in the consumption of storable staple plant foods, such as acorn, evidenced by the relatively higher numbers of seed-grinding implements in typical artifact assemblages from this period. The Emergent period dates from approximately AD 1000 to the historic period and includes ethnographically recorded Yokuts habitation of the area.<sup>6</sup> Changes in the types and distribution shell beads and projectile points observed during this period perhaps reflect the cultural complexity documented among the Southern Valley Yokuts at the time of European contact. For a more complete discussion of the region's prehistoric context, see Rosenthal et al. 2007.

## 2.2 Ethnographic Context

The Project is in the traditional tribal territory of the Southern Valley Yokuts.<sup>7</sup> The Southern Valley Yokuts inhabited the southern end of the San Joaquin Valley from the lower Kings River near Fresno to the Tehachapi Mountains south of Kern Lake.<sup>8</sup> The nearest ethnographic village site, *Musahau*, is 14.8 miles east.<sup>9</sup> Prehistoric activity focused on the vast swamps adjacent to water courses in the area, including Buena Vista, Tulare, and Kern Lakes and the Kings, Kaweah, Tule, and Kern Rivers. Indigenous peoples relied heavily on the animal and plant resources supported by these features. Parts of Southern Valley Yokuts territory not directly supplied by rivers were relatively dry, receiving only five to ten inches of rain annually with summer temperatures frequently exceeding 100 degrees.<sup>10</sup>

Like many other California indigenous groups, the Southern Valley Yokuts relied on a combination of hunting, fishing, and gathering. Lake trout, chub, perch, and suckers were fished nearly year-round with nets set from shore or dragged by tule boats. Snares were used to trap geese, ducks, and other waterfowl. Mussels and other shellfish were collected and steamed on tule mats. Seeds and wild roots, including tule roots, were also gathered and consumed.<sup>11</sup>

The Southern Valley Yokuts were able to occupy village sites on a semi-permanent basis due to the abundance of resources near lakes and rivers. Tule mats over wooden frameworks formed the village

residences. Each community would also have a communal sweathouse but did not typically have dance houses.<sup>12</sup>

## 2.3 Historic Overview

The first Europeans to traverse the region were Spanish explorers led by Gabriel Moraga in 1805 and 1806. They followed two rivers through the valley and named them the Kings River and the San Joaquin River.<sup>13</sup> This was the first of several Spanish explorations of the San Joaquin Valley in the early nineteenth century and they were followed in 1826 by the first Euro-American explorer to the area, Jedediah Smith. Despite these early explorations, settlement in the area did not occur until after the discovery of gold in California in 1848.<sup>14</sup>

Even after California achieved statehood in 1850, present-day Fresno County was largely devoid of Euro-American settlement. The gold rush resulted in a population boom in other parts of the state, turning small outposts and rudimentary towns into the thriving cities like San Francisco, Sacramento, and Stockton. Those who emigrated to California traveled to the foothills in search of gold and largely ignored any potential the San Joaquin Valley may have held. Early wagon roads utilized routes established by local indigenous populations that extended along the foothills and branched into the mountains. The main route, known as the Stockton-Los Angeles Road, was surveyed and established in 1850 by Lieutenant George Derby. The road ran north-south between the namesake cities, but the San Joaquin Valley remained generally undeveloped.<sup>15</sup>

To support these early trails, various improvements were made, and amenities established at points along the route. At this time, the San Joaquin Valley had an expansive wetlands system fed by unchecked rivers that flowed from the mountains running into large bodies of water like the Tulare and Kern lakes, which are dry in modern-day. In the early 1850s, to facilitate the crossing of these rivers, several ferries were established along the stage route. Hotels, general stores, and other businesses followed, creating the foundations of early townsites in the region.<sup>16</sup>

At the time of statehood in 1850, present-day Fresno County was divided between Mariposa, Merced and Tulare Counties. Following the decline of the gold rush, miners made their way down into the San Joaquin Valley and settled along established stage routes and near ferry crossings along the Kings and San Joaquin Rivers. One of the first settlements in present-day Fresno County was Rootville, founded in 1851. By 1854, it was renamed Millerton and when Fresno County was formed in 1856, it became the first county

seat. It remained the county seat until 1874, when many of the residents abandoned the town and relocated to the newly founded town of Fresno, which was subsequently named the county seat.<sup>17</sup>

The Southern Pacific Railroad (SPRR) began quickly laying tracks through the San Joaquin Valley in 1870, and Fresno was founded as a station along the tracks. SPRR purchased the land for the town from the German Syndicate, and a three-square mile area was surveyed and plotted as a town with space for a train station and a courthouse in 1872. After the completion of the railroad through the new town, Fresno quickly grew to include a general store, hotel, restaurants, and a post office.<sup>18</sup> As more people moved to the area, the Fresno Canal and Irrigation Company completed construction on a series of large irrigations canals to facilitate the use of the arid land for agriculture. The predominant crops included grapes, cotton, figs, and citrus fruits. Fresno was incorporated in 1885 and the success of agriculture in the area continued the growth of the population of Fresno into the turn of the twentieth century.<sup>19</sup>

The agricultural industry that surrounded Fresno led to the construction of processing plants and manufacturing facilities for agricultural goods, including fruits, grains, and livestock. Fresno's proximity to the railroad fueled the development of industrial areas in southern Fresno in the early twentieth century.<sup>20</sup> After World War I, the boundaries of the city were expanded to the north and east to accommodate the construction of new residential neighborhoods. Growth of the local economy and population slowed during the Great Depression, but experienced an uptick between 1940 and 1950, when the population of Fresno increased by 30,000.<sup>21</sup> Development in Fresno continued to increase in the Post-War period. The move and expansion of the Golden State Highway in 1948 provided an industrial connection between the nearby railroad and the new freeway and spurred the construction of new industrial buildings in southern Fresno.<sup>22</sup>

### **Fulton Mall Development**

In the 1960s and 1970s, following World War II and its immediate aftermath, there was a movement across the United States to revitalize and redevelop the downtown centers of cities and towns. The City of Fresno was an early adopter of this movement, and its downtown revitalization plan served as a model for other cities across the United States.<sup>23</sup> Beginning in 1958, business owners in downtown Fresno were dismayed by dwindling sales, and an extensive economic study proved their fears were not unfounded. As a result, the City of Fresno decided to create a comprehensive plan to revitalize the entire Central Business District.<sup>24</sup> The plan, known as the Fresno Plan, was primarily developed by Victor Gruen and Associates,

<sup>24</sup> *Western City Magazine*, "Fresno's Mall In The Making," August, 1964.

and included a six-block outdoor pedestrian mall known as Fulton Mall. The Fulton Mall was designed in tandem with Garrett Eckbo, championed as a pioneer in modernist landscape design.<sup>25</sup> Victor Gruen and Associates released an illustrated comprehensive plan for the Fulton Mall in January 1960 for the City of Fresno, and construction to redesign traffic patterns began within a few months.<sup>26</sup> Shortly after, businesses began moving into the buildings along Fulton Mall as early as 1961, including the Berkeley's department store to 887 Fulton Street.<sup>27</sup> Construction of the pedestrian mall portion of the project began in the beginning of 1964 and was completed later that same year. The Fulton Mall officially opened to the public on September 1, 1964, and was hailed as an exemplary effort in urban renewal and downtown revitalization.<sup>28</sup>

The Fulton Mall received numerous design awards and honors from architecture institutes and federal government departments. Due to its early success in the nationwide trend of downtown city revitalization, representatives from other American cities traveled to Fresno to see and learn from the Fulton Mall's design and development. The Fulton Mall was successful and popular for several years following its construction but began to decline as early as the beginning of the 1970s.<sup>29</sup>

Further development and expansion of the area surrounding the mall failed to occur in the 1970s, resulting in a lack of economic growth of the Fulton Mall. In addition, a new indoor shopping mall, called Fashion Fair, opened in north Fresno in 1970. The opening of the indoor mall did not benefit the development of the Fulton Mall. Many retailers chose to move away from the downtown Fulton Mall and move towards the suburban Fashion Fair, resulting in most of the original Fulton Mall retailers being gone by the early 1980s. The Fulton Mall continued to decline over the course of the 1980s.<sup>30</sup>

In 2014, the Fresno City Council voted to reopen Fulton Street to automobile traffic in an effort to again revitalize the Fulton Mall. The project was undertaken in 2016 to upgrade sidewalks, provide street parking, install new streetlights and traffic signals, and install wayfinding signage. The project also restored and replaced street art along Fulton Street and improved landscaping. Fulton Street re-opened in October 2017.<sup>31</sup> Efforts to bring businesses and residential development to Downtown Fresno have been ongoing.<sup>32</sup>

### Property History

The property at 887 Fulton Street was constructed in 1961 (*Figure 1*). The building was designed by Fresno architect Alastair Simpson. The interior was designed by Los Angeles firm Burke, Kober and Nicolais, and the contractor was the Harris Construction Company. The total cost of the building was \$1.2 million. The building was owned by the Rowell Company, O. J. Woodward and the T. W. Patterson Building Company. It was not purpose-built for Berkeley's department store, but store owner Gilbert C. Berkeley was the first person to lease the building.<sup>33</sup>

*Figure 1. Berkeley's department store, 1961.*<sup>34</sup>

Berkeley's opened as Bruckner's department store in 1919 and occupied four other locations prior to opening at 887 Fulton Street. The company was an upscale women's clothing retailer. Berkeley's owner, Gilbert C. Berkeley, was a proponent of the Downtown Fresno revitalization efforts and construction of Fulton Mall. He served on several local economic boards, including the Hundred Percenters, Fresno Community Council, Fresno Convention Bureau, and Fresno State College Bulldog Boosters. Berkeley

---

<sup>33</sup> Ward W. Grimes, "Berkeley's Will Open In New Quarters," *Fresno Bee*, April 9, 1961, 41-F.

<sup>34</sup> Grimes, "Berkeley's Will Open In New Quarters."

hoped to set an example for other business owners by moving to Fulton Mall and investing in the revitalization efforts. During construction of the subject property, Berkeley purchased the building to the south and the department store occupied that building until the new building was completed.<sup>35</sup>

Berkeley's closed its Fulton Mall store in 1982 and relocated to Manchester Center.<sup>36</sup> After the store closed, the building was utilized for small events, including a warehouse sale for the Walter Smith company, and a Christmas bazaar sponsored by the Friendship Center for the Blind.<sup>37</sup> In 1991, Nita Shops proposed to remodel the building, which had been vacant since 1982, for use again as a clothing store. The proposed remodel of the ground floor would cost \$30,000 to \$40,000.<sup>38</sup> Nita Shop liquidated in April 2007, and the building at 887 Fulton Street has since been vacant.<sup>39</sup> The property was purchased by the City of Fresno in 2007 and then sold to the Fresno Area Hispanic Foundation under a Disposition and Development Agreement in May 2024.<sup>40</sup> Little has changed on the exterior of the building with the exception of the removal of "Berkeley's" signs from the Fulton Street and Kern Street façades and boarding of the windows.

### **3 Area of Potential Effects**

The proposed Area of Potential Effects (APE) for the 887 Fulton Street inventory and evaluation report is the footprint of the building. The building is approximately 0.26 acres in area. The APE is bound by Fulton Street to the northeast, a public square at the terminus of Kern Street to the northwest, Homerun Alley to the southwest, and 865 Fulton Street to the southeast (see **Appendix A**, Project Map). The APE was defined following guidance at 36 CFR Section 800.16 that describes an APE as follows:

*geographic area or areas within which an undertaking may directly or indirectly cause changes in the character or use of historic properties, if any such properties exist. The area of potential effects is influenced by the scale and nature of an undertaking and may be different kinds of effects caused by the undertaking.*

The Section 106 regulations are specific and require that an APE is identified prior to taking the necessary steps to identify historic properties. The building at 887 Fulton Street is the only property that would be affected by the proposed cleanup work. Fulton Street and Homerun Alley would be utilized for ingress and egress to perform the work.

<sup>40</sup> "\$1 vacant building in Fresno to become business incubator," *Fresno Bee*, May 6, 2024, 1.

The building that would be affected is vacant and in disrepair. The property was previously recorded in a California Department of Parks and Recreation (DPR) 523 Series Form and recommended eligible for local designation and ineligible for listing in the NRHP (**Appendix B**). The recommendation does not appear to have been reviewed by the State Historic Preservation Officer (SHPO).

## 4 Methods and Findings

Cultural resources investigations for the Project included a records search conducted at the Southern San Joaquin Valley Information Center (SSJVIC) of the California Historical Resources Information System (CHRIS), a desktop literature review, and a built environment pedestrian survey of the entire Project APE.

### 4.1 SSJVIC Records Search and Desktop Review Results

On October 13, 2025, Stantec archaeologist Jenna Santy requested a record search at the SSJVIC of the CHRIS (SSJVIC reference No. 25-413, **Appendix C**) to identify previously recorded resources and studies within 0.25 mile of the Project APE. Resource inventories, including the California Register of Historical Resources (CRHR) and California Historical Landmarks, were also consulted, as well as historic topographic maps, historic aerial imagery, General Land Office (GLO) plat maps, and listings of resources on the Archaeological Determinations of Eligibility listing and California Office of Historic Preservation Built Environment Resources Database (BERD).

Additionally, historical research was conducted by Rebecca Riggs and Madeline Josa that was focused on the history of the region, including the residential and commercial development. Preliminary research included a review of current and historic maps and previous reports, as well as research at the San Joaquin Valley Heritage & Genealogy Center in the Fresno County Public Library. Ms. Riggs and Ms. Josa conducted primary and secondary research to develop appropriate historical contexts for the evaluation of the one identified property in addition to the surrounding neighborhood. Resources consulted included digital history publications, digital periodicals, local historical contexts, and local periodicals that address the development of the region.

The records search identified one previously recorded resource below the vertical extent of the APE (*Table 1*), and 36 resources within 0.25 miles of the APE (**Appendix D**). The previously recorded resource below the APE is a historic-period archaeological historic district. Four previous studies were conducted within or immediately adjacent to the Project APE (*Table 2*). Nineteen (19) previous studies have been conducted within a 0.25-mile buffer of the APE (*Table 3*).

Additionally, desktop research identified one previously recorded resource within the APE (*Table 4*). The record for the resource, a historic-age building, does not appear to have been submitted to or reviewed by the SHPO.

*Table 4. Previously Recorded Resources within the APE from Desktop Research*

P-Number	Resource Name	Author(s)	Year	Evaluation Recommendation
N/A	887 Fulton Mall	Historic Resources Group	2012	5S3

## 4.2 Native American Consultation

A Sacred Lands File search request was completed by the Native American Heritage Commission (NAHC) on October 2, 2025, and the results of that search were negative for previously known tribal cultural resources. The NAHC provided the EPA a list of Native American contacts for the APE. As the lead federal agency, the EPA is responsible for tribal consultation pursuant to Section 106. [Update with consultation results/information].

### 4.3 Letters to Interested Parties and Public Outreach

The EPA will send letters to interested parties on DATE. The interested parties in the project area are the Fresno County Historic Society and the Fresno County Historical Museum. In addition, the City of Fresno will notify the public of their intention to demolish the building at one of the City Council meetings in early YEAR, and provide opportunity for comment.

### 4.4 Built Environment Field Survey

A built environment field survey for the Project was conducted by Stantec architectural historians Rebecca Riggs and Madeline Josa on October 16, 2025, and involved walking on the public right-of-way adjacent to the Project APE (see **Appendix A**) with a representative from the City of Fresno.

The purpose of the built environment survey was to identify potentially significant architectural resources in the APE. 887 Fulton Street, Berkeley's Building, was documented. Digital photographs using a digital single-lens reflex camera were taken and included overview and detail photographs of the building and photographs of the setting. Positioning data accuracy was checked through visual observations and cross-checked with modern aerial photography, county records, and mapping.

The Project APE consists of the footprint of the building at 887 Fulton Street that has the potential to be affected by the Project. Ms. Riggs and Ms. Josa documented the adjacent properties to get a sense of the overall feeling of the subject property, compared to localized and adjacent construction and changes. The APE is within the Fresno downtown core and is surrounded by one- to three-story commercial buildings constructed between 1945 and 1970 in the Modern and Mid-Century Modern architectural styles. The adjacent commercial buildings are all similar in massing, scale, and purpose to the subject property, and many are vacant or abandoned and in disrepair. Directly west and south of the APE, separated by Homerun Alley, is a minor league baseball stadium, owned by the City of Fresno.

Built in 1961, 887 Fulton Street is a multi-level two-part commercial block building constructed in the Mid-Century Modern style. The building has a concrete foundation, rectangular plan, and a flat roof with what appears to be aluminum coping. Two façades of the building, those that face Fulton and Kern Streets, are clad in split-face concrete brick and have tile cladding at the base of the building over the concrete foundation. Near the center of each of these façades is a recessed entryway to the building. Each entryway has one set of glazed double doors below a transom. The façades each have multiple large, fixed-pane glass display windows on the ground level, which are currently boarded over. The Fulton Street side has three display windows and the Kern Street side has three display windows and two additional rectangular windows. The display windows and entryways are protected by a cantilevered segmental arch vault concrete canopy. In the center of the Kern Street façade is a large rectangular window with 12 panes that spans almost the full height of the building.

The façade above the wall shared with 865 Fulton Street and the façade facing the baseball stadium are clad in smooth faced concrete brick. The façade facing the baseball stadium has an unadorned recessed doorway and a vent opening. The entirety of the exterior of the building has patches of visible mold and water damage, including the concrete canopies (*Figure 1 through Figure 13*).

*Figure 2. Overview of 887 Fulton Street from Fulton Street, facing south (Stantec, 2025).*

Figure 14. Entrance to 887 Fulton Street on Homerun Alley, facing east (Stantec, 2025).

## 5 Evaluation of Identified Resources

The records search and literature review identified one previously recorded historic-period archaeological district below the vertical extent of the APE, and one previously recorded building within the APE. No known subsurface resources have been located within the archaeological district below the APE, though several have been located within the vicinity (within 0.10 miles).<sup>41</sup> Therefore, the potential for buried cultural resources beneath the APE is moderate to high. However, due to the lack of ground disturbance associated with the Project, the potential to encounter buried cultural resources during Project activities within the APE is low.

The subject property, a former department store, is within the APE and is more than 50 years old. The building was previously recorded with a recommended California Historical Resource status code of 5S3: "Appears to be individually eligible for local listing or designation through survey evaluation." The building

---

<sup>41</sup> Lawson.

was recommended not eligible for listing in the NRHP. The recommendations do not appear to have been reviewed by the SHPO.

The property was revisited and analyzed under the appropriate themes identified in the historic context (development of downtown Fresno) for this specific Project. The property was re-evaluated according to the NRHP and CRHR significance criteria (**Appendix E**).

## **5.1 Berkeley Building**

887 Fulton Street was previously recorded and evaluated as part of the Historical Resources Evaluation Report for the Fulton Mall Reconstruction Project and was recommended not eligible for listing in the NRHP. This evaluation concurs with the previous NRHP recommendation, as well as recommending 887 Fulton Street not eligible for listing in the CRHR.

887 Fulton Street is not significantly associated with events that have made a significant contribution to broad patterns in local, state, or national history. 887 Fulton Street was constructed during the revitalization efforts in Downtown Fresno and development of Fulton Mall from 1960 to 1970. Mere association with these events is not enough to qualify the property for inclusion in the NRHP. Research did not reveal that 887 Fulton Street is significantly associated with Downtown Fresno revitalization efforts or Fulton Mall's development. The building was not purpose-built for the Berkeley's department store, and research did not reveal that the store was significant in commercial history. Therefore, 887 Fulton Street is recommended not eligible for listing in the NRHP/CRHR under Criterion A/1.

887 Fulton Street was not found to be associated with the lives of persons significant in local, state, or national history. The building was owned by several individuals and companies – Rowell Company, O. J. Woodward and the T. W. Patterson Building Company – but is most closely associated with Gilbert C. Berkeley as the owner of Berkeley's department store, the first and longest occupant of the building. Berkeley moved to Fresno from New York City in 1943, and shortly after began work at Bruckner's department store. He and his wife Miriam Slater Berkeley purchase Bruckner's and renamed the store Berkeley's before the store moved to 887 Fulton Street. He was active in civic and commercial affairs in Fresno and was a successful business owner. Research did not reveal, however, any specific impacts Berkeley had on commerce in Fresno that can be tied to the building at 887 Fulton Street. He was one of several business owners who supported the Downtown Fresno revitalization and construction of Fulton Mall. Therefore, 887 Fulton Street is recommended not eligible for listing in the NRHP/CRHR under Criterion B/2.

887 Fulton Street does not embody the distinctive characteristics of a type, period, or method of construction. The building was designed in the Mid-Century Modern style, the most common architectural style in the post-war era. The style was typically applied to smaller-scale commercial properties such as

offices, restaurants, and shopping centers.<sup>42</sup> The building at 887 Fulton Street is a typical example of the style. It is not an excellent example of the style because it does not articulate a particular design concept or exhibit a high quality of design that embodies the integral characteristics of the style. For this reason, the building also does not possess high artistic value. The building does not represent the work of a master. Designer Victor Gruen designed master plans for several shopping centers across the United States but was not the designer of this building. Local architect Alastair Simpson worked for several firms and partnerships before establishing his own firm in 1953. His work throughout the San Joaquin Valley was extensive. He is best known for his design of his own home in Fresno, the Frazier Mountain Park Elementary School in Frazier Mountain, the Fresno Community Hospital complex, and several other hospitals and educational facilities.<sup>43</sup> The building at 887 Fulton Street is not recognized in literature as one of his most notable projects and is not an important example of his work. Both the interior designers Burke, Kober and Nicolais and contractor Harris Construction Company were prolific firms that designed properties throughout California. The building at 887 Fulton Street is not a significant example of the work of either firm. The building does not represent a significant and distinguishable entity whose components may lack individual distinction. In 2013, Fulton Mall was evaluated for listing in the NRHP as potential historic district. The study concluded that the Fulton Mall corridor does not retain sufficient integrity to constitute a historic district.<sup>44</sup> For these reasons, the subject property is recommended not eligible for listing in the NRHP/CRHR under Criterion C/3.

887 Fulton Street is not a source or likely source of important information regarding history, building materials, construction techniques, or advancements in architecture or engineering. Such buildings are well documented in the historic record and use common construction materials and techniques that would not be deemed significant. Therefore, the subject property is recommended not eligible for listing in the NRHP/CRHR under Criterion D/4. The subject property was not evaluated for archaeological significance.

The subject property is recommended not eligible for listing in the NRHP/CRHR under any criteria and so an evaluation of integrity is not warranted.

## **6 Effects of the Undertaking**

The NHPA, as amended, in 36 CFR Section 800.5 (a)(1) defines adverse effects as impacts to a historic property as the result of a federal undertaking that may directly or indirectly alter characteristics of a historic property that qualify it for inclusion in the NRHP. Section 800.5(a)(2) identifies examples of effects, which

---

<sup>42</sup> City of Los Angeles, *Los Angeles Citywide Historic Context Statement: Context: Architecture and Engineering, Sub-Context: L.A. Modernism, 1919-1980* (Department of City Planning, Los Angeles, 2021), 128, 143.

<sup>43</sup> Pacific Coast Architecture Database (PCAD), "Alastair Simpson (Architect)," <https://pcad.lib.washington.edu/person/3304/>; "Simpson, Alastair," *Fresno Bee*, December 10, 1992, B8.

<sup>44</sup> P. Travis and Phillip Vallejo, California Department of Parks and Recreation District Record for Potential Fulton Street/Fulton Mall Historic District, on file at Fresno County Public Library, Fresno, 2013.

include physical destruction or damage to the property; relocation of the property; alterations not consistent with the Secretary of the Interior's Standards; change of use or physical features of a property's setting; visual, atmospheric, or audible intrusions; neglect resulting in deterioration; or transfer, lease, or sale of a property out of federal ownership or control without adequate protections.

The building at 887 Fulton Street was evaluated and is recommended not eligible for listing in the NRHP/CRHR under any criteria. The property is vacant and in poor physical condition.

The proposed Project includes mold abatement activities, abatement of ACM and lead-based paint LBP as needed, removal of the interior ceiling, restoration of the building interior and exterior including construction of a new drop ceiling, and reparation or replacement of the roof. All proposed work would occur within the footprint of the existing building at 887 Fulton Street. There would be no ground-disturbing activities. No historic properties are present. Therefore, Stantec recommends a finding of **No Historic Properties Affected** for the undertaking.

\*e. Other Locational Data: APN: # 46828221T

\*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

Located on the southwest side of Fulton Mall, at the corner of Kern Street, this commercial building is rectangular in plan and capped with a flat roof with no eaves. The building displays a series of single-pane display windows and a recessed glass entry, sheltered beneath a canopy made of barrel vaults. The upper façade is characterized by faux stone- or concrete-clad siding, with no ornamental detailing. In good condition, the property exhibits a good degree of integrity.

b. Builder: Unknown

\*B10. Significance:

Theme Mid-20<sup>th</sup> Century Commercial Redevelopment Area: Downtown Fresno

Period of Significance: 1945 – 1970

Property Type: Commercial

Applicable Criteria: N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity)

887 Fulton Mall was constructed during Fresno's downtown postwar commercial redevelopment period (1945 to 1970). In the years after World War II, city officials and downtown business and property owners embraced some of the most advanced ideas in architecture, urban design and planning to revitalize downtown and stay competitive with the burgeoning suburbs. Property developers constructed new buildings in modernist and mid-century architectural styles while many older buildings were revamped with new facades. The embrace of modernist ideals to transform downtown Fresno culminated in the adoption of the Victor Gruen plan for the Central Business District and construction of the Fulton Mall.

☒ Continuation ☐ Update

**\*B10. Significance (continued from page 2):**

887 Fulton Mall opened in 1961 as the new location for Berkeley's, a women's apparel store. Berkeley's (originally Bruckner's) had been operating in Downtown Fresno since 1919. Commenting on the relocation to 887 Fulton Street, owner and President Gilbert C. Berkeley stated "We made our move to this new location on our conviction that Fresno's downtown central core will continue as the hub of the San Joaquin Valley's retail activity." The building has high integrity and appears to be unaltered since its construction save for the removal of the original Berkeley's signage.

While 887 Fulton Mall does retain a good degree of integrity, its association with the revitalization efforts in downtown Fresno in and of itself is not a sufficient contextual theme for listing in the National Register under Criteria A. Additionally 887 Fulton Mall is not associated with any individuals significant in national, state, or local history (Criterion B) and although constructed in the Mid Century Modern style it does not exhibit a significant level of design or use of material, nor does it represent the work of a master or have high artistic value (Criterion C). For these reasons the building at 887 Fulton Mall does not appear to be eligible for listing in the National Register of Historic Places.

Following community input solicited at the City's Historic Preservation Commission meeting held May 20, 2013, 887 Fulton Mall appears to be individually eligible to Fresno's Local Register of Historic Resources under Criteria I as a rare, intact example of a post World War II department store associated with Mid-20th Century Commercial development in downtown Fresno, reflecting Fresno's extensive revitalization efforts in the 1950s and 1960s. The Commission may choose to take action in the future on a recommendation to the City Council for designation pursuant to FMC 12-1609.

Please forward a copy of any resulting reports from this project to the office as soon as possible. Due to the sensitive nature of archaeological site location data, we ask that you do not include resource location maps and resource location descriptions in your report if the report is for public distribution. If you have any questions regarding the results presented herein, please contact the office at the phone number listed above.

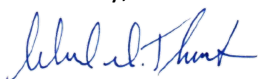

The provision of CHRIS Data via this records search response does not in any way constitute public disclosure of records otherwise exempt from disclosure under the California Public Records Act or any other law, including, but not limited to, records related to archeological site information maintained by or on behalf of, or in the possession of, the State of California, Department of Parks and Recreation, State Historic Preservation Officer, Office of Historic Preservation, or the State Historical Resources Commission.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the CHRIS Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

Should you require any additional information for the above referenced project, reference the record search number listed above when making inquiries. Invoices for Information Center services will be sent under separate cover from the California State University, Bakersfield Accounting Office.

Thank you for using the California Historical Resources Information System (CHRIS).

Sincerely,

Celeste M. Thomson  
Coordinator

\*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

887 Fulton Street is a multi-level two-part commercial block building constructed in the Mid-Century Modern style (Figure 1 through Figure 12). The building has a concrete foundation, rectangular plan, and a flat roof with what appears to be aluminum coping. Two façades of the building, those that face Fulton and Kern Streets, are clad in split-face concrete brick and have tile cladding at the base of the building over the concrete foundation. Near the center of each of these façades is a recessed entryway to the building. Each entryway has one set of glazed double doors below a transom. The façades each have multiple large, fixed-pane glass display windows on the ground level, which are currently boarded over. The Fulton Street side has three display windows and the Kern Street side has three display windows and two additional rectangular windows. The display windows and entryways are protected by a cantilevered segmental arch vault concrete canopy. In the center of the Kern Street façade is a large rectangular window with 12 panes that spans almost the full height of the building (see Continuation Sheet).

- B1. **Historic Name:** Berkeley's department store, Berkeley Building  
B2. **Common Name:** 887 Fulton Street  
B3. **Original Use:** Commercial B4. **Present Use:** Vacant  
\*B5. **Architectural Style:** Mid-Century Modern  
\*B6. **Construction History:** (Construction date, alterations, and date of alterations)

The property at 887 Fulton Street was constructed in 1961 (**Figure 13**). The building was designed by Fresno architect Alastair Simpson. The interior was designed by Los Angeles firm Burke, Kober and Nicolais, and the contractor was the Harris Construction Company. The total cost of the building was \$1.2 million. The building was owned by the Rowell Company, O. J. Woodward and the T. W. Patterson Building Company. It was not purpose-built for Berkeley's department store, but store owner Gilbert C. Berkeley was the first person to lease the building.<sup>2</sup>

**\*B6. Construction History (Continued):**

Berkeley's opened as Bruckner's department store in 1919 and occupied four other locations prior to opening at 887 Fulton Street. The company was an upscale women's clothing retailer. Berkeley's owner, Gilbert C. Berkeley, was a proponent of the Downtown Fresno revitalization efforts and construction of Fulton Mall. He served on several local economic boards, including the Hundred Percenters, Fresno Community Council, Fresno Convention Bureau, and Fresno State College Bulldog Boosters. Berkeley hoped to set an example for other business owners by moving to Fulton Mall and investing in the revitalization efforts. During construction of the subject property, Berkeley purchased the building to the south and the department store occupied that building until the new building was completed.<sup>3</sup>

Berkeley's closed its Fulton Mall store in 1982 and relocated to Manchester Center.<sup>4</sup> After the store closed, the building was utilized for small events, including a warehouse sale for the Walter Smith company, and a Christmas bazaar sponsored by the Friendship Center for the Blind.<sup>5</sup> In 1991, Nita Shops proposed to remodel the building, which had been vacant since 1982, for use again as a clothing store. The proposed remodel of the ground floor would cost \$30,000 to \$40,000.<sup>6</sup> Nita Shop liquidated in April 2007, and the building at 887 Fulton Street has since been vacant.<sup>7</sup> The property was purchased by the City of Fresno in 2007 and then sold to the Fresno Area Hispanic Foundation under a Disposition and Development Agreement in May 2024.<sup>8</sup> Little has changed on the exterior of the building with the exception of the removal of "Berkeley's" signs from the Fulton Street and Kern Street façades and boarding of the windows.

#### B10. Significance (Continued):

##### Historic Context:

The first Europeans to traverse the region were Spanish explorers led by Gabriel Moraga in 1805 and 1806. They followed two rivers through the valley and named them the Kings River and the San Joaquin River.<sup>10</sup> This was the first of several Spanish explorations of the San Joaquin Valley in the early nineteenth century and they were followed in 1826 by the first Euro-American explorer to the area, Jedediah Smith. Despite these early explorations, settlement in the area did not occur until after the discovery of gold in California in 1848.<sup>11</sup>

Even after California achieved statehood in 1850, present-day Fresno County was largely devoid of Euro-American settlement. The gold rush resulted in a population boom in other parts of the state, turning small outposts and rudimentary towns into the thriving cities like San Francisco, Sacramento, and Stockton. Those who emigrated to California traveled to the foothills in search of gold, and largely ignored any potential the San Joaquin Valley may have held. Early wagon roads utilized routes established by local indigenous populations that extended along the foothills and branched into the mountains. The main route, known as the Stockton-Los Angeles Road, was surveyed and established in 1850 by Lieutenant George Derby. The road ran north-south between the namesake cities, but the San Joaquin Valley remained generally undeveloped.<sup>12</sup>

To support these early trails, various improvements were made, and amenities established at points along the route. At this time, the San Joaquin Valley had an expansive wetlands system fed by unchecked rivers that flowed from the mountains running into large bodies of water like the Tulare and Kern lakes, which are dry in modern-day. In the early

1850s, to facilitate the crossing of these rivers, several ferries were established along the stage route. Hotels, general stores, and other businesses followed, creating the foundations of early townsites in the region.<sup>13</sup>

At the time of statehood in 1850, present-day Fresno County was divided between Mariposa, Merced and Tulare Counties. Following the decline of the gold rush, miners made their way down into the San Joaquin Valley and settled along established stage routes and near ferry crossings along the Kings and San Joaquin Rivers. One of the first settlements in present-day Fresno County was Rootville, founded in 1851. By 1854, it was renamed Millerton and when Fresno County was formed in 1856, it became the first county seat. It remained the county seat until 1874, when many of the residents abandoned the town and relocated to the newly founded town of Fresno, which was subsequently named the county seat.<sup>14</sup>

The Southern Pacific Railroad (SPRR) began quickly laying tracks through the San Joaquin Valley in 1870, and Fresno was founded as a station along the tracks. SPRR purchased the land for the town from the German Syndicate and a three-square mile area was surveyed and plotted as a town with space for a train station and a courthouse in 1872. After the completion of the railroad through the new town, Fresno quickly grew to include a general store, hotel, restaurants, and a post office.<sup>15</sup> As more people moved to the area, the Fresno Canal and Irrigation Company completed construction on a series of large irrigations canals to facilitate the use of the arid land for agriculture. The predominant crops included grapes, cotton, figs, and citrus fruits. Fresno was incorporated in 1885 and the success of agriculture in the area continued the growth of the population of Fresno into the turn of the twentieth century.<sup>16</sup>

The agricultural industry that surrounded Fresno led to the construction of processing plants and manufacturing facilities for agricultural goods, including fruits, grains, and livestock. Fresno's proximity to the railroad fueled the development of industrial areas in southern Fresno in the early twentieth century.<sup>17</sup> After World War I, the boundaries of the city were expanded to the north and east to accommodate the construction of new residential neighborhoods. Growth of the local economy and population slowed during the Great Depression, but experienced an uptick between 1940 and 1950, when the population of Fresno increased by 30,000.<sup>18</sup> Development in Fresno continued to increase in the Post-War period. The move and expansion of the Golden State Highway in 1948 provided an industrial connection between the nearby railroad and the new freeway and spurred the construction of new industrial buildings in southern Fresno.<sup>19</sup>

### Fulton Mall Development

In the 1960s and 1970s, following World War II and its immediate aftermath, there was a movement across the United States to revitalize and redevelop the downtown centers of cities and towns. The City of Fresno was an early adopter of this movement, and its downtown revitalization plan served as a model for other cities across the United States.<sup>20</sup> Beginning in 1958, business owners in downtown Fresno were dismayed by dwindling sales, and an extensive economic study proved their fears were not unfounded. As a result, the City of Fresno decided to create a comprehensive plan to revitalize the entire Central Business District.<sup>21</sup> The plan, known as the Fresno Plan, was primarily developed by Victor Gruen and Associates, and included a six-block outdoor pedestrian mall known as Fulton Mall. The Fulton Mall was designed in tandem with Garrett Eckbo, championed as a pioneer in modernist landscape design.<sup>22</sup> Victor Gruen and

Associates released an illustrated comprehensive plan for the Fulton Mall in January 1960 for the City of Fresno, and construction to redesign traffic patterns began within a few months.<sup>23</sup> Shortly after, businesses began moving into the buildings along Fulton Mall as early as 1961, including the Berkeley Department Store to 887 Fulton Street.<sup>24</sup> Construction of the pedestrian mall portion of the project began in the beginning of 1964 and was completed later that same year. The Fulton Mall officially opened to the public on September 1, 1964, and was hailed as an exemplary effort in urban renewal and downtown revitalization.<sup>25</sup>

The Fulton Mall received numerous design awards and honors from architecture institutes and federal government departments. Due to its early success in the nationwide trend of downtown city revitalization, representatives from other American cities traveled to Fresno to see and learn from the Fulton Mall's design and development. The Fulton Mall was successful and popular for several years following its construction but began to decline as early as the beginning of the 1970s.<sup>26</sup>

Further development and expansion of the area surrounding the mall failed to occur in the 1970s, resulting in a lack of economic growth of the Fulton Mall. In addition, a new indoor shopping mall, called Fashion Fair, opened in north Fresno in 1970. The opening of the indoor mall did not benefit the development of the Fulton Mall. Many retailers chose to move away from the downtown Fulton Mall and move towards the suburban Fashion Fair, resulting in most of the original Fulton Mall retailers being gone by the early 1980s. The Fulton Mall continued to decline over the course of the 1980s.<sup>27</sup>

In 2014, the Fresno City Council voted to reopen Fulton Street to automobile traffic in an effort to again revitalize the Fulton Mall. The project was undertaken in 2016 to upgrade sidewalks, provide street parking, install new streetlights and traffic signals, and install wayfinding signage. The project also restored and replaced street art along Fulton Street and improved landscaping. Fulton Street re-opened in October 2017.<sup>28</sup> Efforts to bring businesses and residential development to Downtown Fresno have been ongoing.<sup>29</sup>

## Evaluation

887 Fulton Street was previously recorded and evaluated as part of the Historical Resources Evaluation Report for the Fulton Mall Reconstruction Project and was recommended not eligible for listing in the NRHP. This evaluation concurs with the previous NRHP recommendation, as well as recommending 887 Fulton Street not eligible for listing in the CRHR.

887 Fulton Street is not significantly associated with events that have made a significant contribution to broad patterns in local, state, or national history. 887 Fulton Street was constructed during the revitalization efforts in Downtown Fresno and development of Fulton Mall from 1960 to 1970. Mere association with these events is not enough to qualify the property for inclusion in the NRHP. Research did not reveal that 887 Fulton Street is significantly associated with Downtown Fresno revitalization efforts or the Fulton Mall development. The building was not purpose-built for the Berkeley's department store, and research did not reveal that the store was significant in commercial history. Therefore, 887 Fulton Street is recommended not eligible for listing in the NRHP/CRHR under Criterion A/1.

\*Resource Name or #: 887 Fulton Street

887 Fulton Street was not found to be associated with the lives of persons significant in local, state, or national history. The building was owned by several individuals and companies – Rowell Company, O. J. Woodward and the T. W. Patterson Building Company – but is most closely associated with Gilbert C. Berkeley as the owner of Berkeley's department store, the longest occupant of the building. Berkeley moved to Fresno from New York City in 1943, and shortly after began work at Bruckner's department store. He and his wife Miriam Slater Berkeley purchase Bruckner's and renamed the store Berkeley's before the store moved to 887 Fulton Street. He was active in civic and commercial affairs in Fresno and was a successful business owner. Research did not reveal, however, any specific impacts Berkeley had on commerce in Fresno that can be tied to the building at 887 Fulton Street. He was one of several business owners who supported the Downtown Fresno revitalization and construction of Fulton Mall. Therefore, 887 Fulton Street is recommended not eligible for listing in the NRHP/CRHR under Criterion B/2.

887 Fulton Street does not embody the distinctive characteristics of a type, period, or method of construction. The building was designed in the Mid-Century Modern style, the most common architectural style in the post-war era. The style was typically applied to smaller-scale commercial properties such as offices, restaurants, and shopping centers.<sup>30</sup> The building at 887 Fulton Street is a typical example of the style. It is not an excellent example of the style because it does not articulate a particular design concept or exhibit a high quality of design that embodies the integral characteristics of the style. For this reason, the building also does not possess high artistic value. The building does not represent the work of a master. Designer Victor Gruen designed master plans for several shopping centers across the United States but was not the designer of this building. Local architect Alastair Simpson worked for several firms and partnerships before establishing his own firm in 1953. His work throughout the San Joaquin Valley was extensive. He is best known for his design of his own home in Fresno, the Frazier Mountain Park Elementary School in Frazier Mountain, the Fresno Community Hospital complex, and several other hospitals and educational facilities.<sup>31</sup> The building at 887 Fulton Street is not recognized in literature as one of his most notable projects and is not an important example of his work. Both the interior designers Burke, Kober and Nicolais and contractor Harris Construction Company were prolific firms that designed properties throughout California. The building at 887 Fulton Street is not a significant example of the work of either firm. The building does not represent a significant and distinguishable entity whose components may lack individual distinction. In 2013, Fulton Mall was evaluated for listing in the NRHP as potential historic district. The study concluded that the Fulton Mall corridor does not retain sufficient integrity to constitute a historic district.<sup>32</sup> For these reasons, the subject property is recommended not eligible for listing in the NRHP/CRHR under Criterion C/3.

887 Fulton Street is not a source or likely source of important information regarding history, building materials, construction techniques, or advancements in architecture or engineering. Such buildings are well documented in the historic record and use common construction materials and techniques that would not be deemed significant. Therefore, the subject property is recommended not eligible for listing in the NRHP/CRHR under Criterion D/4. The subject property was not evaluated for archaeological significance.

The subject property is recommended not eligible for listing in the NRHP/CRHR under any criteria and so an evaluation of integrity is not warranted.
